To pay the dividends or interest on all these securities requires a net yearly income of $630,000, or, according to the profits of last year's traffic, a gross business of $2,100,000 to $2,200,000. It is very probable, however, that in the future the road will be much more cheaply run than heretofore, not only on account of the lower price of materials, but because a much larger business does not involve equally increasing expenditures.

The road is well stocked and in good order. It

is in good and energetic hands, and from the report of the trustees and managers it appears that the recent outlays on the track and bridges have been much larger than will be ordinarily required.

New York and Oswego Midland Railroad.

A writer in the N. Y. *Evening Post*, says that much uncertainty has been felt respecting the line of this road, the decision depending on the willingness of different towns to subscribe to the stock.

Syracuse, the chief of these, not being disposed to contribute, will be left widely to the left of the line, which, beginning at Oswego, is to pass north and east of Oneida Lake, and enter the rich Chenango Valley at the village of Hamilton. From there it will run through the villages of Earlville, Sherburne, North Norwich, Norwich and Oxford. Leaving the valley at the latter point, it will pass southeastwardly towards New York, through Guilford and North Bainbridge to Sidney, near the junction of the Unadilla and Susquehanna, at or near where the railroad leading to Carbondale, Scranton, Wilkesbarre, Harrisburg and Baltimore, connects with the Albany and Susquehanna road. From Sidney the new road will follow a southeasterly course through Delaware and Sullivan counties, until it strikes Middletown, in Orange county.

Its course from there on is still undecided. Passing southerly up the Wallkill and over the ridge dividing the headwaters of that stream from those of the Passaic, three feasible routes offer to the choice of the company. One would run directly to Newark and thence, on an air line, to such ferry across the Hudson as may be selected. Another would run, in the most suitable direction, to Paterson, and on by air line to New York, while a third, poorest in wealth and population, but shortest and easiest in grades would lead midway between Newark and Paterson, across the morasses lying west of the Bergen hills.

The company has no charter to build a railroad across New Jersey, and hence many influential persons and villages are striving to persuade the directors to buy a charter, now existing, which authorizes the construction of a road from the Hudson to the Delaware River on a line north of Newark, and three miles distant from it. This would scarcely be to the interest of either Newark or the company.

Newark has now no direct railroad connections with either Central New York, the Canadas, Michigan, or the region around Lake Superior; yet it is one of the great manufacturing centres of the Union. A direct road thence to those regions would not injure the business of the railroads from New York to Philadelphia, but, by leading through fertile and populous regions, would be of immense advantage to the manufacturers of Newark.

From Rome, on the Central road, a railroad runs to Watertown and Ogdensburg, with extensions to Henderson, Cape Vincent, Sackett's Harbor and other lake ports. By running the Midland road north and east of Oneida Lake, an easy connection with this road is acquired, and not only the entire trade and travel of all the lake towns from Ogdensburg to Oswego is secured, but also the business of the great counties of Lewis, Jefferson and St. Lawrence, with that of Canada West, on the opposite shore of Lake Ontario. Added to this, a short connecting road from Norwich, through Homer to Auburn, will secure a valuable connection with Rochester, Buffalo and Niagara Falls.

Two railroads are now building southerly from Utica, one by way of Clinton to Hamilton, and the other by Sangersfield, to Sherburne. The first makes a direct connection between Hamilton and Utica; the latter will, probably, when the Midland becomes assured, change its direction, and from Sangersfield, run to New Berlin, and thence down the populous Unadilla to Sidney, thus not only connecting with the Midland, and securing a short line to New York, but also with the Carbondale coal road. This would secure to it, from Utica, the shortest of all lines to New York, to Washington, and to the coal fields, and would be so palpably to its interest and that of Utica, that the change would probably be made, and the cost of an extra road be saved. The coal trade alone of the above route would make it a success.

Norwich will be the centre point on the Midland road. It is forty-five miles from Binghamton on the Erie Railroad, the same distance from Utica on the Central Railroad, and about a hundred and ten miles west of the Hudson River.

Dubuque, Platteville and Monroe Railroad.

Hon. H. Robbins, President of this road, in an address to the people of Dubuque, stated that the gap of 22 miles between Monroe and Gratiot would be under contract in less than thirty days. It would cost $600,000. Cars would be running to Platteville by next 4th of July. Mr. Beecher, President of the Mineral Point road, had taken 150,000 of stock. He had contracted for $300,000 worth of iron for the D., P. & M. road, and this road will not be encumbered a dollar's worth to pay for it. Platteville will build 16 miles, but she can't do any more. He would guarantee $250,000 from Milwaukee to help build the road from Platteville to Dubuque, and $100,000 from parties along the route, between the two places. They only ask the sum of $400,000 in stock from Dubuque. He said if Dubuque would give $200,000 on the road, they would trust them for the other $200,000, and the road would be running to Eagle Point by the 1st of September next.

Corrosion of Boilers.

An interesting paper "On the Corrosion of Locomotive Boilers, and the Means of Prevention," has been published in the proceedings of the Institution of Mechanical Engineers. The subject has excited attention from the frequency of boiler explosions, as many as fifty-five steam boilers having exploded in the kingdom within a single year, involving a great loss of life and property. It is stated that the wear of a locomotive boiler in from five to eight years, during which it will have evaporated ten million gallons of water, is equivalent to thirty years' wear of a stationary boiler. Mr. Kirtly, the author of the paper referred to, points out the chemical and mechanical agencies by which the waste of the boiler plates is occasioned, and also on the cause of weakness, in the change of temperature produced by the supply of cold water to the boiler, which, however, can be remedied by care in feeding. In the opinion of Mr. Kirtly, all these sources of weakness and of danger may be avoided by an improved mode of constructing boilers. It is pointed out that since the tyres of wheels have been manufactured of one single piece, without joint or weld, the breaking of tyres has become much less frequent than before. Therefore, it is urged that if a boiler is made of one great hoop, instead of a number of plates, it will be much less liable to explosion than one made in the ordinary way. It is stated that for six years past nineteen of these welded boilers have been in constant use on the Midland Railway, England, and with such satisfactory results that the same mode of construction has been permanently adopted for all the engines on the line. Each of the boilers has traveled one hundred and seventy-five thousand miles, and is in good condition. The cost is said to be somewhat higher than at present, but this is warranted by the great saving in after repairs and the diminution of risk.

Pittsburg, Ft. Wayne & Chicago Railway.

The earnings and expenses of this road for the months of October, 1866 and 1867, have been as follows:

	1866.	1867.
Earnings	$757,441 32	$765,568 06
Expenses	439,189 85	395,134 34
Net earnings	$318,251 47	$370,433 72

This shows an increase in earnings of $8,126 74; with a decrease in expenses of $44,055 51—making the increase in net earnings, $52,182 25.

The earnings and expenses from January 1, to October 31, 1866 and 1867, were:

	1866.	1867.
Earnings	$6,232,060 82	$5,967,802 66
Expenses	4,318,920 85	4,018,633 12
Net earnings	$1,913,139 97	$1,949,169 54

This shows a decrease in earnings, during the ten months, of $264,258 16; with a decrease in expenses of $300,287 73—making the increase in net earnings, $36,029 57.

Utica and Black River Railroad.

The extension of this road is a matter of special interest to the people of Utica, as well as to the inhabitants of the northern part of Oneida and Lewis Counties. We learn that the work of laying the rails has been completed to Port Leyden, and that a large force of laborers is engaged on the track between Port Leyden and Lyon's Falls, and the company expect to have the rails laid to the latter named place by the first of December. In the meantime, this extension of the road necessitated a change in the route through Boonville. The road now passes through the suburbs of the village, about a quarter of a mile further east. Already a new and commodious depot and freight house are in process of erection at that place. A hotel has also been constructed near the depot by an enterprising resident of Boonville. With the contemplated extension fully completed, a want which has long been felt by the people of the northern counties will be fully supplied.

☞ The City Council of Cincinnati have passed a resolution granting a connection through the city between the Little Miami and the Ohio and Mississippi Railroads, by a track through Front street, and also settled with the latter company for a perpetual occupation of their present location on West Front street.

☞ A railroad is projected from Paterson, through Pompton, to the Ringwood Mining district.

Important to Dealers in Stocks.

The Supreme Court of New York has recently rendered two decisions of importance to dealers in stocks. The first was in the case of Oaks *vs.* Drake, in which the opinion was delivered by Judge Ingraham. The other was in the case of Markham *vs.* Jaudon, the opinion being delivered by Judge Leonard. The opinions together hold that where a banker or broker invests his own means in the purchase and carrying of stocks for his employer the relation created is not that of pledger and pledgee, so as to require the broker to give notice of time and place of sale if he wishes to sell the stocks upon the customer failing to respond, but he may sell after demand of the money and a reasonable opportunity to the customer to pay it and without notifying the customer of the time or place of sale. On the latter of these two cases it is held that the customer does not become the owner of the stocks until he has paid for them, and until then the parties are simply in the relation of special contractors with each other—a relation more resembling that of vender and vendee than that of pledger and pledgee. If the decisions as rendered stand as the law, and the broker really becomes the owner of stocks he may have bought for a customer on a margin, with right to sell without notice on the exhaustion of the margin, the outsiders' stock in trade is very materially narrowed.

The Hoosick Tunnel.

The Boston correspondent of the Springfield *Republican* says that the Council, by a unanimous vote, have annulled the contract made by the commissioners in July with Messrs. Dull, Gowan & White for completing certain portions of the tunnel, including the central shaft. They authorized the commissioners to resume possession of all the tools, machinery, &c., belonging to the State, to make an immediate settlement with the contractors, prosecute the work upon the east end, and make all necessary arrangements for repairing the machinery at the central shaft and for completing that part of the enterprise.

Erie and Niagara Railway.

W. A. Thomson, Esq., President of the Erie and Niagara Railway Company, met the County Council of Elgin here to-day, and they voted their support to his application to Parliament for an extension of the Erie and Niagara Charter, to enable the said company to extend their line through the Lake Shore Counties to the Detroit River. This enterprise meets general approbation and will be strongly supported by the whole people.—*St. Thomas Dispatch.*

☞ Mr. Charles O. Russell, the former Superintendent of the Western Railroad, has been elected Superintendent of the newly formed Boston and Albany Railroad; and Mr. Abraham Firth, formerly of the Boston and Worcester Railroad, has been chosen assistant Superintendent. Mr. Russell will reside, as heretofore, in Springfield, and Mr. Firth in Boston.

☞ The opening of the railroad over Mont Cenis, which it was hoped would take place next month, is now again postponed. It has been found that the engines, which are of French manufacture, are not sufficiently powerful, and a number of new ones are now in process of construction in England. It is altogether probable that the road will not be opened before next spring.

Point of Rocks Railroad.

We learn that contracts have been awarded for the construction of six sections of this road, two of which are between Rockville and Washington, and the others in the vicinity of Seneca. Messrs. Offutt & Watkins are the successful contractors for the heavy work between Rockville and the District. It is intended to complete the road to Silver Springs and put it in running order at once. From Silver Springs to Rockville the same course will be adopted, and so on until the whole line shall have been completed by sections, varying from six to twelve miles each. At the same time the heavy work upon the whole line of the road will be under contract.

☞ The double track of the Pennsylvania Railroad has been completed all the way from Philadelphia to Pittsburg. The extensive section of masonry which has for a long time past been constructing at the narrows, near Mount Union, has been completed. This was the only break in the double track, and now this great line of communication through Pennsylvania has its double track from one end to the other.

☞ The Utica, Chenango and Susquehanna Valley Railroad was opened on the 14th inst., to Waterville, by an excursion train of nearly three thousand people, and a banquet at Waterville, at which numerous speeches were made. The first section of the road is twenty-one miles in length. The road is graded sixteen miles beyond the first section to within five miles of Sherburne.

☞ The contract for grading, masonry, etc., on the Lynchburg and Danville Railroad from Lynchburg to Staunton river, including the bridge over that stream, has been awarded to Messrs. Adams & Scott on terms very favorable to the company, involving the payment of a portion of the cost in Pittsylvania county bonds at par.

☞ During the month of October there was shipped from Minneapolis over the St. Paul road, 32,098 bbls. flour, 4,656,333 feet lumber, and 219,442 lbs. merchandise paying a freight of $22,126 43. The amount of freight received was 1,160,313 lbs.

☞ The Minnesota Valley Railroad transported during the month of October 7,876 passengers, 742,250 feet of lumber, 44,980 bushels of wheat, 24,682 barrels of flour, 2,415,840 pounds of merchandise, besides a large quantity of minor freight.

☞ Mr. William B. Gilbert, has been appointed Chief Engineer of the New Central Railroad, in place of Mr. Charles Hilton, who resigned on the 1st instant.

☞ The receipts of the St. Louis and Iron Mountain Railroad Company for the month of October were $51,629 79.

☞ Messrs. Smith & Latrobe, Engineers and Bridge Builders, have removed from No. 7 Law Buildings, to 49 Lexington street, Baltimore, Md.

☞ Col. R. B. Bullock has been elected President of the Macon and Augusta R. R. Co.

☞ The Florida Central Railroad is being put in good running order.

☞ The Union Pacific Railroad was opened to Cayenne on the 13th inst.

RAILROAD IRON.

65 TONS RAILROAD IRON, 25 lbs. per yard, on hand and for sale by

CHAS. J. PUSEY & CO.,
152 Broadway, NEW YORK.

FOR SALE.
A TANK ENGINE,

Just repaired and in complete order.

8 WHEELS, Truck in front.
DRIVERS, 36 inches in Diameter.
GUAGE, 4 feet 8½ inches.
CYLINDERS, 12½ in. diam., 16 in. Stroke.
117 COPPER TUBES, 1¾ in. diameter, 10 feet inches long.
FIRE BOX—round end—3 ft. 6 in. by 4 ft. 2 in.
BOILER SHELL, 42 in. diameter.
WEIGHT, 18 Tons.

The Engine is now at Jersey City.

500 MILES
OF THE
Union Pacific Railroad
Running West from Omaha
Across the Continent,
ARE NOW COMPLETED.

The Union Pacific Railroad Company have built a longer line of railroad in the last eighteen months than was ever built by any other company in the same time, and they will continue the work with the same energy until completed. The Western Division is being pushed rapidly eastward from Sacramento by the Central Pacific Company of California, and it is expected that

THE ENTIRE GRAND LINE

to the Pacific will be open for business in 1870. MORE THAN ONE-THIRD OF THE WORK HAS ALREADY BEEN DONE, MORE THAN ONE-THIRD OF THE WHOLE LINE IS NOW IN RUNNING ORDER, AND MORE LABORERS ARE NOW EMPLOYED UPON IT THAN EVER BEFORE. More than

Forty Million Dollars in Money

have already been expended by the two powerful companies that have undertaken the enterprise, and there is no lack of funds for its most vigorous prosecution.

The Union Pacific Company therefore offer their First Mortgage Bonds to the public with the assurance that they represent the largest and most valuable corporate property in the world. The first question asked by an investor is, "Are the bonds safe?"—the second, "Are they profitable?" To answer, in brief:

1. The early completion of the whole line is as certain as any future business event can be.

2. The Union Pacific Railroad bonds are issued upon what promises to be one of the most profitable lines of railroad in the country. For many years it must be the only line connecting the Atlantic and Pacific; and being without competition, it can maintain remunerative rates.

3. The net earnings of the sections already finished are *several times greater* than the gold interest upon the First Mortgage Bonds upon such sections, and if not another mile of the road were built, the part already completed would not only pay interest and expenses, but be profitable to the Company.

4. The Union Pacific Railroad Bonds can be issued only as the road progresses, and therefore can never be in the market unless they represent a *bona fide* property.

5. Their amount is strictly limited by law to a sum equal to what is granted by the U. S. Government, and for which it takes a *second* lien as its security. This amount put upon the first 517 miles west from Omaha is only $16,000 per mile.

6. The fact that the U. S. Government considers a second lien upon the road a good investment, and that some of the shrewdest railroad builders of the country have already paid in five million dollars upon the stock (which is to them a third lien), may well inspire confidence in a first lien.

7. Although it is not claimed that there can be any better securities than Governments, there are parties who consider a first mortgage upon such a property as this the very best security in the world, and who sell their Governments to re-invest in these bonds—thus securing a greater interest.

8. As the Union Pacific Railroad bonds are offered for the present at 90 cents on the dollar and accrued interest, they are the cheapest security in the market, being more than 15 per cent. less than U. S. stocks.

9. At the current rate of premium on gold, they pay

OVER NINE PER CENT. INTEREST.

FIRST MORTGAGE BONDS whose principal is so amply provided for, and whose interest is so thoroughly secured, must be classed among the *safest* investments. They pay

SIX PER CENT. IN GOLD,

and are offered for the present at NINETY CENTS ON THE DOLLAR, and accrued interest at Six Per Cent. in Currency from July 1.

Subscriptions will be received in New York at the Company's Office, No. 20 Nassau street, and by

CONTINENTAL NATIONAL BANK, 7 Nassau st.,
CLARK DODGE & CO., Bankers, 51 Wall st.,
JOHN J. CISCO & SON, Bankers, 33 Wall st.,

and by the Company's advertised Agents throughout the United States. Remittances should be made in drafts or other funds par in New York, and the bonds will be sent free of charge by return express. A NEW PAMPHLET AND MAP, showing the Progress of the Work, Resources for Construction, and Value of Bonds, may be obtained at the Company's Offices or of its advertised Agents, or will be sent free on application.

JOHN J. CISCO, Treasurer, New York.
October 28th, 1868.

COLLINS & CO.'S NEW PATENT SCREW WRENCH.

THE STRONGEST AND MOST DURABLE WRENCH IN MARKET.

All Consumers have noticed that their wrenches first fail by reason of the forcing back of the handle, and by the springing of the bar. Our improvement remedies both these defects, the bars being finished wider than any other wrench in market, and the handle cannot be displaced, as all strain on it is prevented by the screw thimble, D, (see cut.) Already adopted as *the best* by the principal railroads and machine shops, and for sale by Hardware dealers generally. Address

TO RAILROAD CAR BUILDERS AND OTHERS.

The undersigned, being the duly authorized Agent in the United States for the sale of **PEACOCK & BUCHAN'S CELEBRATED AND APPROVED PAINT COMPOSITIONS**, Nos. 1, 2, 3, and 4, solely manufactured in Southampton, England, invites the attention of Railroad car builders, owners and others to the PAINT COMPOSITION No. 3, IN ALL COLORS AND TINTS. It is hermetically soldered up in convenient sized tins of 7 lbs., 14 lbs., and 28 lbs. each, and warranted to keep good in any climate for many years. Being MIXED READY FOR IMMEDIATE USE, it will be found of great advantage, as it can be packed away like preserved meats, and will not deteriorate. It has been opened after TEN YEARS and found to be quite good and READY FOR USE. Being ground first on roller mills of polished granite, and then of burnished steel, by steam power, it is as fine as artist's color, and is applicable to the first-class Railroad Car, Counting House, or Drawing-Room, or the cabin of the yacht, steamer, or sailing ship—each tin forming a ready Paint Pot. It dries in a few hours, with a beautiful brilliant surface, without any stickiness or unpleasant smell, and stands longer than ordinary paint—never blistering, cracking, or flaking. IT IS GENERALLY ADOPTED BY THE CHIEF RAILWAY COMPANIES OF EUROPE, AND IS **CHEAPER AND BETTER THAN ANY OTHER** PAINT IN THE MARKET.

JOINT STOCK COMPANY.
OFFICE 157 (Room 19) BROADWAY,
NEW YORK.
W. C. POTTER, Vice Pres't.
J. M. ALLEN, Sec. and Treas. **LICENSES GRANTED.**

PLASTIC SLATE
FOR
Roofing & Other Purposes.
The process of reconstructing Slate Stone from a disintegrated state was
PATENTED FEBRUARY 21ST, 1865.
It is a combination of
Pulverized Slate and Viscous Matter,
(the latter possessing qualities of geological and chemical affinity for the former,) and is a development of one of the simple but unalterable tendencies of nature.
As a Roofing Material it Stands Unrivalled.
A mastic—it adapts itself to every shape and slope. Non-combustible, impervious, non-expansive, and undecaying.
Frost does not Crack nor Heat Dissolve it.
The only roofing material ever discovered that will resist the action of the elements as long as the structure it protects. Being susceptible of little, if any wear, from exposure, and
Perfectly Fire-Proof,
It is unequalled as a coating for Railroad and Farm Buildings, Fences, Bridges, bottoms of Vessels, Vaults, etc.

ENGINEER'S FIELD BOOK,
By C. S. CROSS, Civil Engineer.
THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—
1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.
It is a plain, clear and most valuable book for practical Railroad Engineers. Sent **free by mail,** upon receipt of the price. For sale at this office. Price **$1.50.**

LYONS' TABLES.
To Civil Engineers and Contractors.
FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

Sheet No.			Sheet No		
1. General Table for all Bases and all Slopes.			13. for Base 18 ft. Slop.		1½ to 1
2. For Side Hill Cuts and Fills.			14. " 20 "		1½ to 1
3. Base 12 ft. Slopes		1½ to 1	15. " 24 "		1½ to 1
4. " 14 "		1½ to 1	16. " 24 "		1½ to 1
5. " 15 "		¼ to 1	17. " 25 "		1½ to 1
6. " 15 "		1 to 1	18. " 26 "		1½ to 1
7. " 16 "		1½ to 1	19. " 28 "		¼ to 1
8. " 16 "		¼ to 1	20. " 30 "		1 to 1
9 " 16 "		1 to 1	21. " 30 "		1¼ to 1
10. " 18 "		¼ to 1	22. " 30 "		1½ to 1
11. " 18 "		½ to 1	23. " 32 "		1 to 1
12. " 18 "		1 to 1	24. " 32 "		1½ to 1

The Tables are printed in clear, bold type on tinted paper, sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.
Sent, **free by mail,** in separate sheets, at **25c.** each

American Railroad Journal.

New York, Saturday, November 30, 1867.

Washington County Railroad.

This road was completed on the 20th inst., and regular passenger and freight trains commenced running between Baltimore and Hagerstown on the 25th inst. The road is 23 miles in length, extending from its junction with the Baltimore and Ohio road, at Weverton, through the battle field of Antietam to Hagerstown. At Hagerstown it connects with the Cumberland Valley Railroad thence to Harrisburg, 74 miles, and through that road with the Lebanon Valley, Northern Central and Pennsylvania Railroads.

Until the opening of this road, the large travel from Hagerstown and its vicinity which reached the Baltimore and Ohio Railroad at Martinsburg and Frederick was conveyed in stage coaches. The economy of this new avenue must add greatly to the business and social intercourse between Washington County and the adjacent counties of Pennsylvania and Baltimore. Much heavy and costly work upon this line was encountered, and the rapidity with which it has been constructed is worthy of note. Great, permanent and valuable results to all interests connected with it are confidently anticipated.

Pittsburg and Steubenville Railroad.

The sale of the Pittsburg and Steubenville (Pan Handle) Railroad, which took place at Pittsburg on the 6th inst., was confirmed by the Supreme Court on the 20th inst., and a decree entered in the words following, to wit; "And now, November 20, 1867, it is ordered that the sale of the Pittsburgh nnd Steubenville Railroad, made to Wm. J. Howard Esq., for the sum of one million nine hundred and sixty thousand dollars, report whereof has heretofore been made to this Court, be confirmed absolutely, without prejudice, however, to the rights of John Smith, Samuel Mc Farland, John Russell, Thomas Huston, Joseph McKnight, G. Veneman, Dr. W. Dounnan, Wm. Criss, J. McBurney, W. S. A. Proudfit, John Mc Farland, who this day filed of record a statement of their several exceptions to the confirmation of the sale aforesaid, to participate in the proceeds of sale.

The Seven Competing Anthracite Coal Carriers.

The quantity of coal forwarded from the anthracite mining districts, *via* rail and canal down the Schuylkill, *via* rail and canal down the Lehigh, and *via* the three routes east from the Lackawanna, for last year and this year, to dates given in the weekly tables, compares as below, to wit:

	1867. Tons.	Cwt.	1866. Tons.	Cwt.
Phila. & Reading R.R.	3,271,098	09	3,571,079	13
Schuylkill Canal	919,576	17	1,198,853	09
Lehigh Valley R. R.	1,799,975	17	1,636,614	14
Lehigh Canal	906,393	17	981,030	18
Del. Lack. and W. R.R.	1,502,495	12	1,802,339	09
Del. and H. Canal	1,224,613	00	1,190,644	00
Penn. Coal Co.	748,174	11	429,702	66
Total	10,372,828	03	10,810,264	09

Cameron and Kansas City Railroad.

This road was finished on the 22d inst. It is about 46 miles in length. In connects with the Hannibal and St. Joseph Railroad at Cameron, 35 miles cost of St. Joseph, and *via* that road with the Chicago, Burlington and Quincy, and the Toledo, Wabash and Western Railroads. It also furnishes an additional speedy route to St. Louis *via* the North Missouri Railroad. At Kansas City it connects with the Missouri River Road, and Union Pacific and Missouri Pacific Roads; and there are in progress of construction the West Branch of the North Missouri Road, Kansas City and Neosho Valley Road, to Galveston, Texas. Traffic from all these roads will concentrate there, and much of it pass over the bridge now building across the Missouri River.

Louisville and Nashville Railroad.

The following is a condensed statement of the earnings of the Main Stem and Branches for the year ending June 30, 1867:

	Memphis Branch.	Lebanon Branch.	Main Stem.
Passengers	$79,526 58	$81,788 79	$708,872 91
Freight	67,556 89	94,768 20	982,580 18
Express	5,977 40	5,655 16	71,210 76
Mails	5,100 00	6,895 00	27,990 00
Miscellaneous	446 81	501 38	4,543 44

Total Main Stem	$1,790,197 24
" Lebanon Branch	189,108 53
" Memphis Branch	158,607 13
" Bardstown Branch	20,961 67

Total Main Stem and Branches, viz:

From passengers	$877,264 72	
" freight	1,152,477 35	
" express	88,542 64	
" mail	40,025 00	
" miscellaneous	5,564 86	
		$2,158,874 57

Running expenses, viz:

Repairs of road	$250,062 19	
" bridges	58,089 00	
" build'gs, etc.	35,182 87	
" cars	89,247 67	
" engines	69,676 14	
Motive power	94,043 71	
Fuel	108,342 68	
Oil and waste	16,342 75	
Watchmen	7,494 96	
Water supply	18,404 28	
Salaries	22,505 00	
Transportation	390,379 82	
Internal revenue tax	72,850 47	
Reconstruction	17,238 81	
Improvement account	14,921 50	
General expenses	84,528 91	
Miscellaneous	4,095 64	
		1,348,405 90

Net earnings (37.54 per cent.)	$810,468 67
Interest account	182,912 71
Balance	$627,555 96

The following is a comparative statement of the earnings, expenses, etc., during the past and preceding years:

	1865–'66.	1866–'67.
Earnings	$3,143,189 47	$2,158,874 57
Expenses	1,551,134 70	1,348,405 90
Net earnings	$1,592,054 77	$810,468 67
Interest	177,076 83	182,912 71
Balance	$1,414,978 44	$627,555 96

This shows a decrease in gross earnings of $984,314 90; with a decrease in expenses of $202,728 80—making the decrease in net earnings, $781,586 10. The balance to credit of Income Account is also less by $787,422 48. The President, in his report, says:

The past year the freight and travel to and from the South has been very much diminished, probably more than it will be in coming years, because of the scarcity in that country. The company forwarded over their road free of cost provisions for the destitute, the freight amounting to $11,679 10.

By reference to the last report, it will be seen the bonded debt was $3,105,000; by this report it is $2,965,000, showing a reduction of $140,000 for the year ending June 30, 1867. The interest, amounting to $182,912 71, has been paid, and $106,566 49 added to construction.

The cost of operating the road is much greater than was hoped, and particularly on the branches. This resulted from the diminished business and reduced tariff, the rebuilding of the Cumberland River Bridge to the extent of $40,000, back taxes to the Commonwealth of Kentucky of $53,564 28, the robbery of the pay-train at Bristow of $8,264 70, and some other extraordinary casualties, exceeding in all $120,000. The cost of a train of ten or twelve cars is nearly as much as a train of fifteen or twenty. Small trains, after paying expenses, yield little or no profit, while larger trains pay well. The Report of the Superintendent exhibits the benefit of the several branches to the profits of the Main Stem, and proves the benefit of the branches to the business of the company.

The Lebanon Branch Extension has been located to London, and most of the line put under contract to that place. The grade of the first eight miles has been finished, and the next six miles, to Mount Vernon, well advanced, so that the track may be extended to that place by April next. There has been expended to the 1st July, 1867, on the heavy sections from Mount Vernon to London, $90,032 92, and the work has progressed since that time. The light sections, of about seven miles, have not been contracted for, because they can be in the spring and finished in time for track laying. The line was surveyed to the State Line, and is ready for location, and is comparatively light work.

Upon application of the citizens of Madison, Garrard and Lincoln Counties, who have agreed to furnish $750,000 cash, the company agreed to construct a branch from Stanford through Lincoln and Garrard Counties to Richmond, in Madison County, a distance of about thirty-three miles as located, and give them $750,000 in the stock of this company six months after the completion of the road. They are also to furnish the right of way, depot grounds, etc. The road, by estimate, can be built for the $750,000, and will add very much to the business of the road from Louisville to Stanford.

Application was made by the Elizabethtown and Paducah Railroad, branching at Elizabethtown, in Hardin County, and extending through the southern tier of counties, to subscribe to their stock. The application was submitted to the Board, under whose direction the President subscribed $100,000. Individuals having taken $100,000, the $100,000 by this company gave the necessary amount required by their charter to enable them to organize, which has been done, and the route is now under survey and location.

The company arranged with the Memphis and Ohio and the Memphis, Clarksville and Louisville Railroads for a through business with those roads from Louisville to Memphis, hoping they would be able to put those roads in good order, and that the joint operation would be profitable to all parties. They have not had the means to put the roads in condition. The joint operation has not proved profitable, as the company had to advance to those companies $128,775 11, without any immediate prospect of reimbursement. The company then thought of consolidating the roads by obtaining part of their stock and giving them part of ours, and providing for the debts of the roads and the means of putting them in good order for the joint benefit.

The company have been unfortunate with the Cumberland River Bridge at Nashville. The first bridge was built on the joint account of this company and the Edgefield and Kentucky Railroad Company, and was burned by General Floyd when the Confederates vacated Nashville. The second bridge was built by General Buell for the Government, and sold by the War Department to the Louisville and Nashville Railroad at the cost of $33,000, no part of which was paid by the Edgefield and Kentucky Railroad; and it has so far decayed that the Louisville and Nashville Railroadwere compelled to rebuild it, which they have commenced, and it is now nearly completed, and will cost between $65,000 and $70,000. They are constructing an iron bridge of the Fink patent, with an iron draw. It will be one of the best bridges in the country.

The bridge over the Ohio River to connect our road with the Jeffersonville road has been contracted for and the masonry commenced, with prospect of completion within the contract time—the 1st September, 1869. It is expected the masonry will be so far finished as to allow more than half the iron superstructure to be put up the coming year.

The stock subscription is about $1,000,000—$300,000 subscribed by each of the railroads, and the balance by individuals. The estimated cost of the bridge is about $1,500,000. It is contemplated to raise the balance by an additional subscription, or by a mortgage on the bridge. The bridge will greatly increase the business of both roads, and yield to Louisville the advantage of the market of the southern portion of Indiana. The superstructure will be nearly one mile long, and it will be one of the finest bridges in America, and its cost will compare most favorably with similar superstructures.

The Louisville and Nashville Railroad Company, in an effort to do a freighting business beyond Nashville, under the zealous action of the business men of Louisville, agreed to give through bills of lading over some of the southern roads, and supposed when they delivered the freight to the Nashville and Chattanooga and the other roads, they would be exonerated from liability. Under the arrangement they gave bills of lading for freight, which they delivered to the Nashville and Chattanooga road at Nashville, who were to forward it to destination. A portion was taken to Chattanooga and near there, and was on the track when the great flood of March last overflowed the city, and the goods were wet and damaged, and some of the freight was used by the Nashville and Chattanooga Railroad Company to feed their hands, and some sold. The Nashville and Chattanooga Company have refused to settle with the owners and freighters, and the Louisville and Nashville Railroad have been sued in several cases on these through bills of lading, the shippers and owners refusing to look to the Nashville and Chattanooga Company, being, as they say, advised by counsel that the Louisville and Nashville Company are liable on their through bills. The Company have now arranged their bills of lading so as to leave no doubt where the liability rests.

The total length of the Main Stem is 185 miles; sidings, 19.10 miles—total, 204.10. Length of Lebanon Branch, 85 miles; sidings, 7.89 miles—total, 92.89 miles. Length of Bardstown Branch, 18 miles; sidings, 0.69 mile—total, 18.69 miles. Length of Memphis Branch, 46 miles; sidings, 3.59 miles—total, 49.59 miles. Total length of road and branches, 365.27 miles of which 334 miles are main lines, and 31.27 are sidings.

The following statement, from the report of the Superintendent, contains in a condensed form the general results of the operations of the Main Stem and Branches during the past and preceding years:

	1865–'66.	1866–'67.
Earnings	$3,180,497 24	$2,158,874 57
Operating expenses	1,551,134 70	1,348,405 90
Net earnings	$1,579,362 54	$810,468 67
Proportion of expenses to earnings	49.50 per ct.	62.46 per ct.
No. of miles run by trains	769,621	760,843
Earnings pr. mile of train	$4.06	$2.84
Expenses " "	2.01	1.77
Net earnings " "	$2.05	$1.07
Earng's per mile of road	$10,336 07	$6,477 26
Expenses " "	5,122 07	4,045 61
Net earnings " "	$5,214 00	$2,431 65
Length of road in operat'n	303.10 m.	333.30 m.
No. of passengers carried	533,678	358,747
Do. carried one mile	46,063,709	20,247,471
Tons of freight carried one mile	26,960,849	27,504,811

The results of the operations of the Main Stem and Branches are shown separately in the annexed statement:

	Main Stem.	Lebanon Branch.	Memphis Branch.	Bardstown Branch.
Gross earnings	$1,790,197 24	$189,108 53	$158,607 18	$20,961 67
Operating expenses	1,045,519 19	141,180 05	137,385 99	24,370 67
Net earnings	$744,678 05	$47,978 48	$21,221 14	$8,409 00
Loss				
Proportion of expenses to earnings	58.40 per ct.	74.63 per ct.	86.68 per ct.	116.26 per c.
No. of miles run by trains	577,430	87,138	84,999	11,276
Earnings per mile of train	$3.10	$2.17	$1.86	$1.86
Expenses per mile of train	1.81	1.62	1.61	2.16
Net earnings per mile of train	$1.29	$0.55	$0.25	
Loss				$0.30
Length of road in operation	185 miles.	85 miles.	46 miles.	17.8 miles.
Earnings per mile of road	$9,676 74	$2,224 80	$3,447 98	$1,211 65
Expenses per mile of road	2,651 45	1,660 85	2,986 65	1,408 70
Net earnings per mile of road	$4,025 29	$564 45	$461 33	
Loss				$197 05

In 1865–'66 the gross earnings of the Main Stem were $2,883,974 04; the expenses, $1,289,755 97; and the net earnings, $1,594,218 07—showing a decrease in earnings of $1,098,776 80; with a decrease in expenses of $244,286 78, making the decrease in net earnings, $849,540 02.

Only 54.8 miles of the Lebanon Branch were in operation in 1865-'66, the earnings upon which were $121,673 85; the expenses, $116,927 36; and the net earnings, $4,746 49. In 1866-'67, 85 miles were in operation. A comparison of the business of this branch during the past and preceding year shows an increase in earnings of $67,434 68; with an increase in expenses of $24,202 69—making the increase in net earnings, $43,231 99.

The gross earnings of the Memphis Branch in 1865-'66, were $105,255 85; and the expenses $115,350 82—showing a loss of $10,094 97; the increase of earnings the past year was therefore $53,351 28; with an increase in expenses of $22,035 17—showing an improvement of $31,316 11.

The earnings of the Bardstown Branch in 1865-'66, were $19,593 50; and the expenses, $29,100 55—showing a loss of $9,507 05. This year the loss in operating was only $3,409—an improvement of $6,098 05.

Statements are given showing the benefits of the several branches to the profits of the Main Stem: From which it appears that while the earnings from passengers, freight, etc., arriving at or forwarded from stations on the Lebanon Branch amounted to $296,500 72, the proportion due the branch therefor was only $189,108 53—leaving for the Main Stem and other branches, $107,392 19—the net revenue upon which is estimated at $49,666 88; making the total net revenue derived from the Lebanon Branch, directly and indirectly, $97,645 36.

The total earnings from freight received at and forwarded from the Memphis Branch were $288,522 81; of which only $67,556 89 were due the branch, leaving for the Main Stem, $170,965 92, the net revenue upon which was $73,686 41; to which add net earnings of the Main Stem derived from through passenger business, $29,588 64, and the net earnings of the branch itself, $21,221 14—making the total net earnings, $124,496 19.

The business to and from stations on the Bardstown Branch amounted to $52,209 98, of which $20,961 67 were due the branch, leaving for the Main Stem, $31,248 31, the net earnings upon which were $12,037 21.

The equipment of the road consists of: 66 locomotives; 45 passenger, 15 baggage, 8 express, 364 box, 98 rack, 43 gondola, 119 flat, 82 gravel and stone, 11 boarding and 1 wrecking cars. There have been added during the year 1 locomotive, 3 passenger, 5 baggage and 41 box cars.

The number of miles run by locomotives with passenger trains has been 452,795; with freight trains, 408,232; distributing trains, 68,459—total, 929,486.

Number of local passengers carried north, 153,140; do., south, 146,755—total, 299,895. Number of through passengers carried north, 28,308; do., south, 30,544—total, 58,852. Total local and through, 358,747. Total mileage of through passengers, 10,471,274; do., local, 9,776,197—total local and through, 20,247,471. Miles traveled by each passenger, 56.4; do., by each local passenger, 32.6 Tons of freight carried one mile north, 17,843,077; do., south, 9,661,741—total, 27,504,811.

Statement showing cost, resources and liabilities of Main Stem and Branches, exclusive of Lebanon Branch Extension:

Total cost of road to June 30, 1866		$10,062,763 94
Added during last fiscal year		105,566 49
		$10,168,330 43
Due from transportation department & U. S. Gov't.	$185,093 34	
Due for mail service	31,403 75	
Lebanon Branch extension mortgage bonds	524,000 00	
City of Louisville bonds L. B. extension	304,288 75

President.—JAMES GUTHRIE.

Directors.—James Guthrie, H. D. Newcomb, James B. Wilder, James Whitworth, W. H. Smith, Russel Houston, J. H. Lindenberger.

Secretary.—WILLIS RANNEY.

Gen'l Superintendent.—ALBERT FINK.

Railroads of California.

The following is a list of railroads in California, their projected length and number of miles completed June 30, 1867:

Names and Termini.	Total Length.	Miles Completed.
Central Pacific, Sacramento to Fort Bridger	900	98
Sacramento Valley, Sacramento to Folsom	22½	22½
Western Pacific, Sacramento to San Jose	120	20
Placerville and Sacramento Valley, Folsom to Placerville	36	26
California Central, Folsom to Lincoln	21	21
Yuba, Lincoln to Marysville	24	18
California Northern, Marysville to Oroville	26	26
San Francisco and San Jose, San Francisco to San Jose	50	50
San Francisco and Alameda, Encinal to Vallejo Mills	26	14
Oakland, Oakland Point to Clinton	4	4
Napa Valley, Suscol to Calistoga	36	4

The following are proposed railroads:—California Pacific, Vallejo to Sacramento and Marysville; California and Oregon, Central Pacific Railroad to Oregon line; Southern Pacific, San Jose southward; Copperopolis, Stockton to Copperopolis.

Scranton Street Railroad.

The Scranton *Register* says that the survey of the route for the Scranton and Providence Street Railway line from Green Ridge to Dunmore has been made, and it is the intention of the company to commence building it forthwith. It is presumed that the road will be constructed and ready for use early in the coming year. The route is said to be an easy one, the highest grade encountered being 2½ to every hundred feet, but the average will reach hardly 1½ to the 100 fee

American Railroad Journal.

Saturday, November 30, 1867.

Stock Exchange and Money Market.

Money has been tending toward renewed ease, in the call loan form, since our last. The supply has been gaining on the demand from speculative sources, and lenders have been more liberal of accommodation to the street operators. Up to Saturday, 7 per cent. was the ruling price. During the first half of the current week, the market was gradually working in favor of borrowers, until Wednesday, when the rates were quoted down to 6@7 per cent. In the discount market, however, there has been no relaxation. The failure of a leading grocery house on Thursday of last week, and two or three minor suspensions, increased the distrust of lenders in mercantile solvency. Very little favor has been shown to business paper, of short or long dates, the best grades of which have met with a slow sale at from 7½@10 per cent, per annum. The city banks lost heavily in their legal tender and deposit lines, last week; while gaining handsomely in their specie hoard. They added nearly a million to their loan averages; and reduced their circulation a little. The U. S. Sub-Treasury business was on an extensive scale, last week, in the line of both receipts and disbursements, leaving the cash balance on hand on Saturday nearly a million and a half less than on the preceding Saturday. The banks are said to be gaining currency, this week, from the influx of funds from the northwest. The drain to the south and southwest is not, as yet, much of a tax on their resources. The specie reserve of the banks is now $15,499,110, against $15,202,865 same time last year. The city bank deposits are now $174,721,683, against $213,414,984 week ending Nov. 24, 1866. The legal tender reserve amounts to $51,121,911, against $62,359,254 same time last year. The circulation now stands at $34,129,911, against $31,361,418 same time last year. The loans are now $249,342,649, against $267,920,415 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $96,667,634 a day, against a daily average of $82,536,188 the preceding week, and $85,898,658 the week ending with Nov. 9. The current week's exchanges average about $95,500,000 a day. The city banks, last week, gained $1,764,146 of specie, but lost $3,207,739 of legal tender, and $3,021,170 of deposits. They increased their loans, $903,835; and reduced their circulation, $4,455.

National Bank notes to the amount of $49,120 were issued last week, making the total issue to 1,671 banks thus far, $304,535,671, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $5,237,595, leaving, with the existing 1,630 banks, (having an aggregate capital of $419,500,000,) an actual circulation at this date, of $299,298,076. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,682,750; and for the public deposits, $38,001,950—making a total of $378,684,700. The Treasury Department last week redeemed and destroyed $512,346 of worn and mutilated fractional currency, and issued $351,970 of new.

The U. S. Sub-Treasury receipts, week ending with Nov. 23, were $22,874,687, including $1,466,212 from customs duties; payments, $24,237,035, including $2,047,000 of coin interest; balance at the close of the week, $108,932,729, against $110,295,077, at the close of the preceding week, showing a decrease of $1,352,348. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $8,748,773 including $240,000 from customs; and payments, $8,560,639; on Tuesday, receipts, $2,064,300 including $288,000 from customs, and payments, $1,261,942. The balance at the close of business on Tuesday stood at $109,023,120, against $110,174,752 a week previous.

The aggregate issue of coin certificates by the U. S. Sub-Treasury, in this city, up to Nov. 23, was $231,631,080; aggregate redemptions, $201,438,000; leaving outstanding on Saturday last, certificates to the amount of $30,193,080.

The Philadelphia Bank movement the past week shows a decrease in loans, of $754,524;

a decrease of $5,719 in specie; an increase in legal tenders of $575,165; an increase of $89,538 in deposits; and an increase of $22,300 in circulation. The Bank Clearings show an increase of $292,465, and the balances, an increase of $173,947.

Government revenues are down to an unusually low average. Both excises and customs are yielding very meagrely. The excises, last week, yielded $2,114,000, against $2,050,000, the preceding week; customs at the port of New York $1,466,212, and at the outports, about $470,000 (in coin) more, making the grand total income for the week equal about $4,825,700 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with July 30, 1867, were $265,853,195. The receipts thus far in the new fiscal year, which began on the 1st of July, have been about $82,500,000.

Government received $6,767,381 from customs, through the port of San Francisco, from Jan. 1, to Nov. 4, 1867.

The Gold speculation profited a little by the various impeachment reports and rumors from Washington on Saturday and Monday, under which, the price was engineered up to 140⅞@141. Subsequently, the operators for a rise seemed to think that impeachment was not by any means "a fixed fact," and they manifested considerable eagerness to realize. The later dealings indicated a weak and irregular market; the closing quotations having been 139⅛@139¼. The increasing foreign demand for American stocks and produce is operating very decidedly against buoyancy in the Gold market. The export inquiry for specie has for the present ceased to be of any consequence. The Scotia on Wednesday took out 168,000 francs. Current customs call is very limited. The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1867, have been $2,938,405, against $9,173,783 same time last year. The customs demand for Gold last week, averaged $244,368 a day; thus far, this week, it has been equal to $264,000 a day, or equal to a weekly aggregate of $1,584,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $45,994, and from California, none. The total customs revenue of the Government, in coin, at this port, thus far in the current calendar year commencing with Jan. 1, 1867, has been $110,035,166, against $123,253,333 same time in the preceding fiscal year. The total receipts of California gold at this port since Jan. 1, 1867, have been $25,409,634, against $38,297,350 same time last year, showing a decrease this year, of $12,806,716. The exports of specie from this port, last week, were $346,075. The total outflow of specie from the port, since Jan. 1, 1867, has been $45,723,804, against $57,931,877 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $2,047,000, making the total coin interest disbursements through the Government office, since Jan. 1, 1867, $59,027,981, against $46,745,010 for the preceding calendar year. The specie exports from San Francisco, from Jan. 1, to Nov. 4, reached $34,766,342, against $38,499,629 same time last year, showing a decrease, in 1867, of $3,733,287.

Bills on London, drawn against export purchases of our stocks and produce have been in liberal supply in the exchange market, since our last, and have tended to depress prices. The demand for sterling drafts has been moderate for the season. The market closed in favor of purchasers. Bankers' 60 day bills on London closed at 109@109¼, and on Paris to 5.18¾@5.15; sight bills on London to 109⅜@109¾; and on Paris to 5.13¾@5.12½. The offerings of produce bills have been comparatively heavy this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $4,484,083, making the total value of exports since Jan. 1, 1867, $171,609,530, against $171,903,037 same time in the preceding year.

Government securities have held their own, in value, quite steadily, all the week. Toward the close, they exhibited symptoms of increased firmness and buoyancy. The relaxation in the call loan market tended to stimulate purchases, especially on the part of the great dealers of Wall and Nassau streets. The main call has been for the later issues of the new Five Twenties, the supply of which has been much less extensive, and the price of which advanced ¼ per cent. on Tuesday. The Ten-Forties have also been quite freely sought after, chiefly by foreign buyers, at buoyant prices. Conversions of Seven-Thirties have been on an extensive scale, since our last, the aggregate having been $11,978,550; and since October 15, $44,100,900. The 5-20 bonds now given in exchange have attached to them the current half year's coin-interest coupon, maturing Jan. 1. On and after Dec. 1., Government will give in exchange only bonds ex the 1st of January coupon. The exchange on the current terms makes the bonds cost only about 107⅞ to the receivers. The new basis of exchange will make a difference of equal to about one per cent. against parties who fail to convert their holdings of the Seven-Thirties within the current week. Government detectives have eventually discovered and arrested the principal counterfeiters of the Seven-Thirty notes. U. S. sixes of 1881 closed here on Wednesday at 113@113⅛; U. S. Five-twenties of 1862, 108@108⅛; U. S. Five-twenties of 1864 at 105@105¼; U. S. Five-twenties of 1865 at 106@106⅛; U. S. Five-twenties of 1865, consolidated, 107⅞@108; U. S. Five-twenties of 1867, 107⅞@108; U. S. Ten-forties at 102⅛@102¼, and U. S. Seven-thirties at 105¼@105½. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

December, 1864..119⅛	September, 1865..115¾
May, 1865 .....117⅛	October, 1865....115½
August, 1865....116¼	

The latest quotations at the London Stock Exchange compare as follows with former returns:

General business has been on a restricted scale, since our last, though the leading kinds of domestic produce have favored buyers decidedly. Breadstuffs and Provisions have been very dull. Middling cotton closed heavily at 16¾@17¾ cents, as the extremes per lb., which is a full 1¼ cents a lb. lower than the quotations of the preceding week. The stock of cotton now here is estimated at about 42,500 bales. The receipts at the port this week, have averaged about 4,000 bales a day. The receipts during the cotton year, ending Sept. 1, 1867, were 657,431 bales, against exports of 470,596 bales. The receipts at all the shipping ports from Sept. 1, 1866, to Aug. 31, 1867, were 1,951,998 bales, against 2,154,476 bales the preceding cotton year; estimated stock at close of the year, 80,296 bales against 253,000 bales same time last year, exports, 1,554,664 bales, against 1,557,054 bales the preceding year. The receipts at all the ports, since Sept. 1, 1867, have been 352,000 bales, against 354,500 bales same time last year; exports, same time, 130,000 bales, against 131,000 bales same time last year; stock on hand at latest dates, 180,000 bales, against 338,000 bales same date last year. Beeves have been less active and lower, this week, ranging from 8@17c.; receipts, 5,343. Calves in limited demand and heavy at 8@11½c.; receipts, 991. Sheep and lambs continue plenty and heavy, at 3½@5½c., and 5@6½c., respectively; receipts, 39,847. Swine in less request and quoted down to 6¼@6⅞ per lb., live weight; receipts, 28,761. The demand for foreign merchandise has been quite light. There has been more actively in the retail, than there has been in the wholesale dry goods trade. Prices of seasonable fabrics have shown a little more steadiness. The total imports of foreign dry goods, last week, were $831,595, and the total amount marketed $903,733. The value of foreign merchandise imported last week, was $2,366,089—making the grand total specie value of last week's imports of dry goods and merchandise, $3,197,684, and since Jan. 1, 1867, $221,674,046, against $263,038,191 same time in the preceding fiscal year. The ocean freight market has been decidedly less active, since our last, at former rates, with 448 vessels of all classes in port. For Liverpool we quote flour at 2s. 6d.@2s. 9d. per bbl.; grain at 8½d.@9d. per bushel; cotton at ¼d. per lb.; and heavy goods at 22s. 6d.@82s. 6d. per ton, all by sailing vessel.

Railway and miscellaneous stocks have been moderately active, since our last, and toward the close, there has been increasing buoyancy in prices. The fluctuations in the miscellaneous list have been very wide, particularly in the steamship shares, and the express stocks. The latter closed at much higher rates.

We are indebted to the Bureau of Statistics in the United States Treasury Department for the following interesting figures touching the Export of Cotton from the United States for the past twelve years:

June 30.	Weight of Export.	Value in Currency.	Value in Gold.
1856....	1,351,481,701	.....	$128,382,351
1857....	1,048,282,475	.....	131,575,859
1858....	1,118,624,012	.....	131,386,661
1859....	1,386,468,556	.....	161,484,928

1867....	666,576,314	202,911,410	143,908,801

During the last year the Export to Great Britain

alone was 524,320,348 pounds weight, valued in currency at $161,021,504, or 30 7-10ths cents per pound, equal to $114,199,649 in Gold, or 21¾ cents per pound. The British Trade tables show that 524,267,520 pounds weight of American Cotton were imported into the United Kingdom for the same twelve months, at a declared value of £28,207,940, which, at $4 84 to the pound sterling, is equivalent to $136,526,429 in Gold, or 26 cents per pound.

At the monthly auction sale of Scranton Coal on Wednesday, 60,000 tons were disposed of at a shade easier prices, ranging from $3.50@$5.25 per ton of 2,240 lbs., deliverable at Elizabethport, N. J.

The New York exports, exclusive of specie, for the week ending Nov. 26, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week.....	$3,466,611	$4,481,083
Prev. reported.....	168,436,426	166,609,530
Since January 1.....	$171,903,037	$171,090,613

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$1,694,768	$831,595
Gen. merchandise.....	2,840,324	2,366,089
Total for the week.....	$4,535,092	$3,197,684
Previously reported....	258,503,099	218,476,362
Since January 1.....	$263,038,191	$221,674,046

The Cotton Tax.

We give elsewhere the Report of Hon. David A. Wells, Special Commissioner of the Revenue, to Hon. Hugh McCulloch, Secretary of the Treasury, prepared for transmission to Congress in advance of his Annual Report, expressing his views upon the proposed repeal of the Cotton Tax. Mr. Wells states that during the year preceding the imposition of the Internal Revenue tax of three cents per pound upon raw cotton by the act of July 13, 1866, the average price of middling cotton at New York had been over forty cents per pound, and during the succeeding year the average price was over twenty-five cents per pound. At these prices the tax upon cotton was undoubtedly less burdensome than many other taxes. But it has generally been assumed that the cotton tax was a temporary measure and was to be repealed whenever it seemed likely to seriously impede domestic production or give an undesirable stimulus to foreign culture. Mr. Wells regards these contingencies as now imminent, and submits in his report certain facts and statistics in support of the opinion that the time has now arrived when the policy of raising revenue from a tax upon cotton should no longer be adhered to.

Vermont Central Railroad.

The Treasurer for Trustees and Managers of the Vermont Central and Vermont and Canada R. Rs. gives notice that coupon No. 3 of the first mortgage bonds Vermont Central Railroad, less Government tax, due December 1, 1867, will be paid in the bonds of the Trustees and Receivers, Vermont Central and Vermont and Canada Railroads, dated July 1, 1867, and payable twenty years from date, with interest semi-annually at the rate of seven per cent. per annum, issued by virtue of a decree of the Court of Chancery of Vermont, and secured by a pledge of the stock bonds and earnings of the Stanstead, Shefford and Chambly Railroad. Coupon No. 2 of the second mortgage bonds, of the Vermont Central Railroad, less Government tax, will be paid in the same manner, to the holders of said bonds, who comply with the decree of the Court of Chancery authorizing said loan, by taking said bonds to the amount of five per cent. of the par value of their bonds, in addition to their coupons.

☞ The Hudson River Railroad Company is engaged in laying down a new track between Rhinebeck and Albany.

Railroad Earnings.--Weekly.

The earnings of the Michigan Central Railroad for the 3d week in Nov., 1867, were.. $87,414 00
Corresponding week of previous year.. 85,614 00

Increase $1,800 00

The earnings of the Chicago and Rock Island Railroad for the third week in Nov., 1867, were..... $111,200 00
Corresponding week of previous year.. 79,864 00

Increase $31,336 00

The earnings of the Toledo, Wabash and Western Railroad for the 3d week of Nov., 1867, were..... $82,873 28
Same week in 1866..... 87,281 46

Decrease $4,408 18

The earnings of the Chicago and Alton Railroad for the third week in November, 1867, were $103,702 00
Corresponding period previous year.. 87,400 00

Increase..... $16,302 00

The earnings of the Chicago and Northwestern Railroad for 3d week in Nov., 1867 .. $293,529 00
Corresponding week previous year .. 225,355 00

Increase $68,174 00

The earnings of the Detroit and Milwaukee Railroad for the week ending November 21, 1867, were $39,009 00
Corresponding week of 1866..... 35,911 00

Increase $3,098 00

The earnings of the Western Union Railroad for the third week in Nov., 1867 ..... $19,650 91
Corresponding week previous year.... 16,837 89

Increase $2,813 02

The earnings of the Michigan Southern and Northern Indiana Road for the 3d week in Nov., 1867, were..... $97,134 00
Corresponding week of 1866..... 99,482 00

Decrease $2,348 00

The earnings of the Marietta and Cincinnati Railroad the 2d week in Nov., 1867... $30,294 00
Corresponding week previous year.... 26,100 00

Increase $4,194 00

The earnings of the Atlantic and Great Western Railway for the second week in Nov., 1867, were..... $122,890 00
Corresponding week previous year... 138,166 00

Decrease $15,276 00

The earnings of the Virginia and Tennessee Railroad for the second week of Nov., were $21,200, an increase of $3,101 on the same week last year. Total for the fiscal year commencing 1st of July, $353,887, an increase of $60,250 on same time in 1866.

Point of Rocks Railroad.

This road will cost the Baltimore and Ohio Company over $60,000 per mile. The mile and a quarter that has been graded at Parr's Ridge, over the Summit, about eleven miles east of Point of Rocks, has cost the company $70,000. The difficulties that have attended the procuring of the right of way in a portion of Montgomery County will be satisfactorily arranged in a few days, and then Mr. Randolph, with his corps of engineers and contractors, will commence the work in good earnest. We learn that it is the intention of the Attorney of the company to proceed, in a short time, to condemn the right of way in every case where he has not succeeded in bargaining with the owners of the land, and that some of the heavier sections will soon be let out.

The Cotton Tax.

REPORT FROM COMMISSIONER WELLS IN FAVOR OF ITS REPEAL.

TREASURY DEPARTMENT,
Office of Special Commissioner of the Revenue,
WASHINGTON, November 21, 1867.

HON. HUGH MCCULLOCH, *Secretary of the Treasury.*

SIR:—As the question of the repeal of the Internal Revenue tax now levied upon raw cotton is likely to be brought to the attention of Congress at an early day, I have thought it expedient to anticipate so much of my annual report as relates to this subject, and accordingly herewith submit to you the accompanying statement, with the request that the same, if approved, be transmitted to Congress.

To this statement there is appended the report of the Committee of the Commissioners of the United States to the Paris Exposition, to whom was referred the consideration and examination of the samples of cotton there exhibited—a document which it has seemed desirable should be made public at the present time, rather than to allow the same to be delayed until the complete publication of the reports of the Commissioners.

When the Internal Revenue tax of three cents per pound was imposed upon raw cotton by the act of July 13, 1866, the average price of "middling" cotton in New York for the preceding 12 months had been in excess of 40 cents per pound, and for the 12 months next succeeding was in excess of 25 cents per pound; at which range of prices the tax in question was undoubtedly less burdensome than the taxes imposed and still maintained on other forms of domestic industry.

At the same time it has been generally assumed in almost all previous reports and debates on the subject, that the tax on cotton was a temporary measure, called for and only to be defended on the ground of the necessities of the nation, and to be repealed at the earliest moment when its continuance seemed likely to prove a serious impediment to domestic production, or an undesirable stimulus to the foreign cultivator. That these contingencies are now imminent, and that the time has arrived when the policy of raising revenue from a tax upon cotton should no longer be adhered to, will, it is believed, appear evident from the following facts and statistics:

The principal competitor to the United States in the production of cotton is India, and the price of India cotton has been materially advanced during the past five years through two agencies—first, by improvements in machinery for its manufacture; and secondly, in consequence of an improvement in its quality, due to increased care in handling, to the use of exotic seed, and to the transfer of native seed from districts which have heretofore yielded the best staple to those where the production has been inferior. It is to this latter agency that the recent marked improvement in India cotton is, perhaps, more especially to be attributed than to any other. But be the causes what they may, it may be affirmed that where India cotton formerly bore the relation of one-half to two-thirds the value of American, it now bears the relation of two-thirds to three-quarters, while a portion of the crop is fully equal to middling uplands for the manufacture of heavy fabrics.

Evidence exists tending to show that the present tax of two and a half cents per pound on American cotton is equal to a premium of at least 50 per cent. upon the cost of raising cotton in India, and by some authorities it is alleged to be even greater. The tax, therefore, could with propriety be imposed only while the aggregate supply of cotton was less than the demand, and the price consequently far above the normal rate. The largest consumption of cotton in Europe in any one year was in 1860, when it amounted to 4,321,000 bales, equal to 1,844,700,000 pounds. Of this amount the United States furnished 85 per cent., and there can be but little doubt that a surplus of cotton goods was produced in that year, even with the stimulus which the low cost of the staple then prevailing undoubtedly afforded to consumption.

In the year 1866, Europe obtained a supply of 4,513,023 bales, averaging 362 pounds each, equal to 1,633,714,326 pounds, of which less than 40 per cent. was from the United States. But this quantity, although somewhat less in pounds than the supply of 1860, was too great for the demand for consumption at the prices ruling, and about 300,000 bales were added to the stock on hand in European markets; which stock, on the 1st of January, 1867, the close of the European cotton year, was as follows: In Great Britain, 581,570 bales; on the continent, 160,000 bales; total, 741,570 bales.

If we estimate cotton at 400 pounds to the bale (as has been the custom in the United States in the returns of the census,) the comparative supply will appear as follows, subject to a slight variation, from the fact that the cotton year of Europe is made up to the 1st of January, and that of the United States to the 1st of September—in bales of 400 pounds each:

CONSUMPTION OF EUROPE IN 1860.

American, about	3,911,750
Other varieties	700,000
Total	4,611,750

SUPPLY OF EUROPE IN 1866.

American, about	1,600,000
Other varieties	2,483,285
Total	4,084,285

The consumption of Europe in 1862, the year of smallest supply and of highest prices, was 750,500,000 pounds, or in bales of 400 pounds, 1,876,250. The proportion of American cotton in this year was somewhat larger than at a later date; but in 1864, it was less than eight per cent. of a total of over 2,500,000 bales.

The crop of 1866, in the United States, for the year ending Sept. 1, 1867, is estimated to have been from 1,000,000 to 1,800,000 bales, out of a total delivery of 2,000,000 bales, the surplus being old cotton; but while this product was far more than could have been anticipated by the most sanguine friends of free labor, the crop in question was in reality a failure, it having been cut short by a season more unfavorable than almost any heretofore experienced.

The season of 1867 has, however, proved most propitious, and the amount to come forward is estimated by few commercial authorities at less than 2,500,000 bales of 460 pounds each, and may even reach an aggregate ot 3,000,000 bales.

In considering the subject of the production of cotton in the United States, with reference to the influence of the tax, it is desirable to take a large, rather than a small, estimate of the present crop; and we assume, therefore, the product of the year to be 2,750,000 bales, of 460 pounds each. If from this we deduct 1,000,000 bales for home consumption, and for an addition to the small domestic stock to be held over, we have 1,750,000 bales available for export, or 2,125,000 bales, estimated at 400 pounds each. If, now, other countries shall produce as much cotton as in 1866, (and there is no evidence as yet of appreciable decrease,) the quantity from other countries than the United States, estimated in bales of 400 pounds each, will be 2,485,000; making a total available cotton supply to Europe of 4,610,000 bales. Such a supply will be equal to that of the year 1860, when there was, undoubtedly, a surplus; but of this quantity the United States will now furnish less than 47 per cent., instead of 85 per cent. in the year referred to.

In short, under the stimulus of high prices, the world has produced more cotton than it can consume at the prices of the day. To cheapen prices may greatly extend the consumption after recovery from the first shock of so great a change. But, in this fall of prices, the profit of the producer, resting upon the higher prices which invited his outlay, has, to a very great extent, and for the time, been lost.

When the American crop was in its supremacy,

the average prices of Surat cotton in Liverpool for the 20 years, 1841 to 1860, ranged from 3d. to 5¼d. per pound. When it was 3d., in 1845, the import to Great Britain was only 155,000 bales; when it was 5¼d., in 1857, the import was 680,000 bales. Thus, it appears, that price regulated the quantity imported; and neither the import to Europe, nor the export from India, was any measure of the production of that mysterious country. Though its export in annual average had been only about 500,000 bales, and much of that to China, when the American war made its sudden call for cotton, in 1861–'2, India contributed more than 1,000,000 bales that season. There is no evidence that there was any larger or more successful planting that year than previously; only that price called it out, and the stock left for home use was by so much the less. Doubtless, in the succeeding years, cotton planting in India was increased, as elsewhere, by the stimulus of wonderfully-remunerative prices to the producers and forwarders.

It is, however, safe to assume that there has always (at least in modern days) been a latent capacity in that country to throw upon the market an extra, and, perhaps, unexpected, half million of bales of cotton in any year, when the price should offer sufficient inducement; and an equal capacity to consume at home the whole production, when at so low prices that it could not be exported to Europe or China. Since the completion of many hundred miles of railways in India, that power of adding promptly to the world's supply of cotton has been greatly increased.

It therefore becomes evident that low prices for cotton must be anticipated for a considerable period, during which the domestic production should not be discouraged by the continued imposition of a direct tax. But with the relief that will be afforded by the prompt removal of the existing tax, the Commissioner fully believes that the United States will speedily regain control of the cotton market, again and supply by far the larger portion of the total demand of Europe for consumption. In this opinion, moreover, he finds himself sustained by what may be regarded as the best authorities on cotton in this country, and particularly by the late Commissioner of the United States to the Paris Exposition, the Hon. E. R. Mudge of Massachusetts, to whom, as chairman of a committee, the subject of the future supply of cotton was especially referred for investigation by his colleagues on the Commission. The conclusion of the report of this Committee, not heretofore made public, is as follows:

Having carefully observed what has been done and is doing by other nations, the Committee present the following conclusions:

First: That cotton-growing in the Southern States, if untaxed, can be conducted profitably and successfully, as against all competition elsewhere.

Second: That if burdened by a tax sufficient to be worth to the Treasury the cost of its collection, it cannot at present, if ever, be successfully prosecuted.

Third: That, already familiar to our people, in all its details, it is only industry immediately available and practicable to the great body of the laboring population of the South for the profitable employment of surplus labor, that is, beyond the necessities of crops for subsistence, in the production of something salable and exchangable, whereby wealth can be regained; and,

Fourth: That the importance of a large production of cotton, as the chief export of the country, in adjusting balances of trade and exchanges, and especially in its bearing upon the future position of the public debt, so largely held and to be held abroad, cannot well be overstated, and so far transcends the value of the present tax that to preserve the latter at the cost of losing the former would be a "ha'penny, 'orth of wisdom to a pound of folly."

The whole amount of Internal Revenue derived from the tax on raw cotton for the fiscal year ending June 30, 1867, was $23,769,078 80; and although this sum comprises nearly all the revenue derived from the southern section of the country, and constitutes an amount that can ill be spared from the Treasury, yet, under all the circumstances, the Commissioner has no hesitation in recommending the immediate passage by Congress of an act repealing the entire tax upon raw cotton, and the corresponding existing duty on imported cotton, the same to take effect on its passage.

As yet but a small quantity of the new crop of cotton has been marketed, but if the repealing act be delayed to a later period, it will evidently work injustice to those producers who may be forced to send their crop forward immediately, unless the removal of the tax should be deferred to take effect at the close of the present cotton year, Sept. 1, 1868.

If a repeal of the tax, to take effect immediately, should be enacted by Congress, it is important that one contingency should be effectually provided against. Contracts, it is understood, are proposed, and possibly already made, for the purchase of cotton, tax unpaid, to be held in store until the repealing legislation of Congress has taken effect—thus insuring to the speculator, or exporting buyer, a gain equivalent to the amount of the tax. It seems desirable, therefore, that the act of repeal should be so worded as to relieve from the payment of tax only so much cotton as, at the date named in the act, remained unsold by the producer; all cotton having passed out of the hands of the producer to pay the tax, if it has not already done so. Only in this way can the relief go where it is intended, viz., to the impoverished cultivator.

It may be interesting in this connection to mention that the Committee of the Commissioners of the Paris Exposition, assisted by B. F. Nourse, Esq., of Boston, have collected, and caused to be suitably arranged, a series of samples of cotton from nearly all the cotton-growing districts of the world, which collection they proffer to the Government, with the suggestion that it be placed, for preservation and reference, in one of public offices at Washington, in which suggestion the Special Commissioner cordially concurs. I am, Sir, yours, most respectfully,

DAVID A. WELLS,
Special Commissioner of the Revenue.

Atlantic and Pacific Railroad.

The Atlantic and Pacific Railroad Company has a location along the thirty-fifth parallel, from a point as yet undefined, in the Valley of the Canadian River, to the Pacific Ocean, and from such undefined point, (which will probably be in the neighborhood of Webber's Falls or North Fork Town,) there are to be two branches, one running to Springfield in Missouri, and the other to Fort Smith, there connecting with the Little Rock and Fort Smith Railroad. By reason, as alleged, of improper treatment at the hands of the authorities of Missouri, in connection with their work, the company have concluded to commence the work of construction at Fort Smith.

We are glad that the company have at last concluded under its new *regime*, to do that which it ought to have decided to do from the beginning, if for no other reason than that they will, at Fort Smith, have a river communication at once that can be relied upon for six or eight months in the year; whereas, at their initial point in Missouri, to wit., Springfield, they would be one hundred miles from any means of communication by river or rail with the East. Besides, the connection by rail between Fort Smith and Memphis may reasonably be expected to be completed long before the connection can be made between St. Louis and Springfield, as we learn from a reliable source that a contract has just been made in New York which will secure our connection with Fort Smith, by rail, within a very short period of time. We also understand that the Southwest Pacific Railroad Company, upon whose success the connection at Springfield must depend, contemplate a suit with the authorities of Missouri, which must necessarily cause delay in its construction. There seems therefore, a probability, if not a certainty, that Memphis will soon have it within her power to reach forth and grasp the rich trade of New Mexico and the intermediate country. Should this prove to be the case, we earnestly hope that nothing shall be wanting on the part of our authorities and citizens to secure so rich a prize.

It is needless to comment upon the very great advantages Memphis must derive from the construction of this trans-continental road, and everything that can be done by the authorities and the people of Arkansas and Tennessee toward the furtherance of this great enterprise should be done without delay and without reluctance.—*Memphis Appeal.*

Debt of Alabama.

The Alabama State Convention has adopted the following resolutions relating to the debt and finances of the State:

Resolved, That it is the determination of this Convention to recognize all legitimate indebtedness of the State of Alabama, and we hold that said indebtedness should ever be held sacred.

In this list of obligations we enumerate:

First. The entire bonded debt due Jan. 10, 1861.

Second. The bonded debt created since 1865, in funding coupons due and unpaid.

Third. Bonds issued in extending matured debts of 1866.

Fourth. Bonded or other indebtedness created during the last two years, together with "tax receipts" or "certificates," by authority of law for paying legitimate expenses of the Provisional Government. *Provided*, however, that no indebtedness (bonded or otherwise) created by the State of Alabama during the late Rebellion, or indebtedness created during the last two years, for the benefit, directly or remotely, of any interest of the Rebel State or Confederate Government shall in any manner be recognized by this Convention.

The present debt of the State is as follows:

Amount of bonds bearing 5 per cent. interest, payable in London, 1866, and renewed 20 years		$648,000
Back interest on same, funded with 5 per cent. bonds		64,000
Amount of bonds bearing 6 per cent. interest, payable in London in 1870		688,009
Back interest on same, funded with 6 per cent. bonds		82,560
		$1,482,560
Amount of bonds bearing 5 per cent. interest payable in New York	$2,109,000	
Back interest on same, funded with 5 per ct. bonds, payable in 1866	473,850	
		2,582,850
Amount of bonded debt		$4,065,410
Amount of 8 per cent. bonds sold since 1865, issued by Act of Legislature, approved December 15, 1865		55,500
Sixteenth Section Trust Fund		1,710,000
University Trust Fund		300,000
Total debt		$6,130,910

☞ R. B. Lewis, Esq., the present Chief Engineer of the Connellsville and Southern Pennsylvania Railroad, has been elected President of the Huntingdon and Broad Top Mountain Railroad Company.

☞ A railroad convention was to have been held at Greensburg, Ky., on the 23d inst., with a view of extending the Lebanon Branch of th Louisville and Nashville Railroad to Chattanooga.

☞ The contract for building the New Have and Derby Railroad has been awarded to Georg D. Chapman of New York.

The Honduras Railway.

A loan of £1,000,000 is proposed for an interesting project in connection with the irrepressible question of the transit across Central America. On this occasion the route is one of 230 miles through the State of Honduras, from Puerto Caballos, on the Atlantic, to the Bay of Fonseca, on the Pacific, which, although much longer than that of Panama, has the advantage of saving 1,108 miles in the steam navigation between New York and California and British Columbia. The allegation is that it can be constructed for £8,000 per mile, and, indeed, a contract has been entered into for its entire completion at that rate, including stations and rolling stock. Even at this low charge, however, the cost would be nearly £2,000,000, or double the sum now asked. To provide for the balance a novel, but legitimate, commercial plan has been agreed upon. The State of Honduras is to hypothecate all its domains and mahogany forests as security for the £1,000,000 loan and its redemption by yearly drawings within 17 years, and the proceeds of this loan are to make a section of the railway which will reach these forests and enable the timber to be brought down for shipment. According to the views of the projectors, ample funds will thus be supplied for all further wants. The bonds are to bear 10 per cent. interest, and to be issued at the price of 80, with a sinking fund of 3 per cent. per annum for their redemption at par. Each bond is also to be accompanied by a free share entitling the holder to a proportionate participation in one-half of the net profits of the railway for 15 years after the bond itself should have been repaid. In a speculative sense these terms appear attractive, but they require to be carefully weighed. Without any disparagement to the honesty of the intentions of the Honduras Government, it may be assumed that its financial ability is too weak and untried, while the experience of money lending to the small Republics of Central and South America has in a general way been too discouraging to cause any serious value to be attached to its guarantee of such a loan unless everything in connexion with it should go well. Still with the facilities that exist for ascertaining positively whether the line can be built on the low terms named, and whether the timber described is actually available and is also of the asserted commercial value in the European and American markets, there ought to be sufficient certainty to place the matter in the position of a fair and rational venture.

Both in London and New York a conviction is very generally entertained among those of the mercantile classes by whom attention has been given to the prospects of the future traffic between the Atlantic and Pacific, that if every one of the routes from time to time suggested during the last twenty years—namely, the Atrato, the Chiriqui, the Nicaragua, the Honduras, and the Tehuantepec—were opened up, they would each have an extraordinary business, and would all yield rapidly increasing revenues. Any distrust that may be entertained with regard to them is solely in relation to the probabilities of there being a particle of good faith in the estimates on which subscriptions are invited, or a reasonable ground to believe that the funds will not be squandered in wholesale jobbery among promoters, engineers, and contractors. If these causes of want of confidence could be dispelled it might not be in vain, even at the present time, to attempt to obtain concurrence in enterprises such as this. The Panama line last year paid 24 per cent. in dividends, and gave in addition a bonus of 40 per cent. out of accumulated profits, and this in the face of the check to traffic by enormously high fares and the dangers of its notorious climate. Of the Honduras line it has been stated by Col. Stanton, who surveyed it with a party of Royal Engineers, that the harbors at both termini are unexceptionable, and that it can be constructed without any sharper curves or heavier gradients than are to be found in existing lines over which locomotives work without difficulty. It is the question of the mahogany forests on which more satisfaction is mainly required. The prospectus states that "careful estimates have satisfied the Honduras Government" on that point. But the estimates likely to satisfy a Government desirous of borrowing money are not necessarily convincing, to the parties who are invited to lend it, and some well-considered statements from persons of repute in the trade should therefore be obtained. It may be hoped and expected that they would strengthen the claims of the enterprise to consideration. Messrs. Bischoffsheim, Goldschmidt & Co., of Paris, are the firm by whom it is introduced, in conjunction with the London and County Bank on this side.—*London Times, Nov.* 11.

Interest and Dividends.

The coupons of the Western Pacific Railroad bonds, due December 1, will be paid by Geo. T. M. Davis, 47 Exchange Place, N. Y.

The Chemung R. R. Co. have declared a dividend of three per cent., payable December 2, at the office of the Treasurer, No. 1 Barclay street, N. Y.

The Long Branch and Sea Shore R. R. Co. have declared a dividend of 10 per cent., free of U. S. tax, payable on demand at the Treasurer's office, Hoboken, N. J.

The Rutland Marble Co. have declared a dividend of 2½ per cent., payable December 2, at the office of the company, 48 Exchange Place, N. Y.

The Pacific Mail Steamship Co. have declared a quarterly dividend of three per cent., payable December 2, at 59 Wall street, N. Y.

The Atlantic Mail Steampship Co. have declared a dividend of 2½ per cent., payable December 10, at No. 5 Bowling Green, N. Y.

Union Pacific Railroad.

The Union Pacific Railroad is now finished 525 miles west from Omaha to the eastern base of the Rocky Mountains, and it is expected that the track will be laid to Evans' Pass, thirty miles further and the highest point between the Atlantic and Pacific Oceans, in January. The maximum grade from the foot of the mountains to the summit is but eighty feet to the mile. Work on the rock cuttings on the western slope will continue during the winter so that track laying may be resumed early in the spring.

☞ Mr. L. B. Rock has been appointed Superintendent of the Eastern and Horicon Divisions of the Milwaukee and St. Paul Railway, in place of D. McCargo, resigned.

☞ Mr. J. M. Toucey, has been appointed Superintendent of the Delaware, Lackawanna and Western Railroad.

☞ Mr. H. C. Atkins has been appointed Superintendent of the Milwaukee and Prairie du Chien Railway, in place of Wm. Jervis, resigned.

500 MILES
OF THE
Union Pacific Railroad
Running West from Omaha
Across the Continent,
ARE NOW COMPLETED.

The Union Pacific Railroad Company have built a longer line of railroad in the last eighteen months than was ever built by any other company in the same time, and they will continue the work with the same energy until completed. The Western Division is being pushed rapidly eastward from Sacramento by the Central Pacific Company of California, and it is expected that

THE ENTIRE GRAND LINE

to the Pacific will be open for business in 1870. MORE THAN ONE-THIRD OF THE WORK HAS ALREADY BEEN DONE, MORE THAN ONE-THIRD OF THE WHOLE LINE IS NOW IN RUNNING ORDER, AND MORE LABORERS ARE NOW EMPLOYED UPON IT THAN EVER BEFORE. More than

Forty Million Dollars in Money

have already been expended by the two powerful companies that have undertaken the enterprise, and there is no lack of funds for its most vigorous prosecution.

The Union Pacific Company therefore offer their First Mortgage Bonds to the public with the assurance that they represent the largest and most valuable corporate property in the world. The first question asked by an investor is, "Are the bonds safe?"—the second, "Are they profitable?" To answer, in brief:

1. The early completion of the whole line is as certain as any future business event can be.

2. The Union Pacific Railroad bonds are issued upon what promises to be one of the most profitable lines of railroad in the country. For many years it must be the only line connecting the Atlantic and Pacific; and being without competition, it can maintain remunerative rates.

3. The net earnings of the sections already finished are *several times greater* than the gold interest upon the First Mortgage Bonds upon such sections, and if not another mile of the road were built, the part already completed would not only pay interest and expenses, but be profitable to the Company.

4. The Union Pacific Railroad Bonds can be issued only as the road progresses, and therefore can never be in the market unless they represent a *bona fide* property.

5. Their amount is strictly limited by law to a sum equal to what is granted by the U. S. Government, and for which it takes a *second* lien as its security. This amount put upon the first 517 miles west from Omaha is only $16,000 per mile.

6. The fact that the U. S. Government considers a second lien upon the road a good investment, and that some of the shrewdest railroad builders of the country have already paid in five million dollars upon the stock (which is to them a third lien), may well inspire confidence in a first lien.

7. Although it is not claimed that there can be any better securities than Governments, there are parties who consider a first mortgage upon such a property as this the very best security in the world, and who sell their Governments to re-invest in these bonds—thus securing a greater interest.

8. As the Union Pacific Railroad bonds are offered for the present at 90 cents on the dollar and accrued interest, they are the cheapest security in the market, being more than 15 per cent. less than U. S. stocks.

9. At the current rate of premium on gold, they pay

OVER NINE PER CENT. INTEREST.

FIRST MORTGAGE BONDS whose principal is so amply provided for, and whose interest is so thoroughly secured, must be classed among the *safest* investments. They pay

SIX PER CENT. IN GOLD,

and are offered for the present at NINETY CENTS ON THE DOLLAR, and accrued interest at Six Per Cent. in Currency from July 1.

Subscriptions will be received in New York at the Company's Office, No. 20 Nassau street, and by

CONTINENTAL NATIONAL BANK, 7 Nassau st.,
CLARK DODGE & CO., Bankers, 51 Wall st.,
JOHN J. CISCO & SON, Bankers, 33 Wall st.,

and by the Company's advertised Agents throughout the United States. Remittances should be made in drafts or other funds par in New York, and the bonds will be sent free of charge by return express. A NEW PAMPHLET AND MAP, showing the Progress of the Work, Resources for Construction, and Value of Bonds, may be obtained at the Company's Offices or of its advertised Agents, or will be sent free on application.

JOHN J. CISCO, Treasurer, New York.

TO RAILROAD CAR BUILDERS AND OTHERS.

The undersigned, being the duly authorized Agent in the United States for the sale of **PEACOCK & BUCHAN'S CELEBRATED AND APPROVED PAINT COMPOSITIONS**, Nos. 1, 2, 3, and 4, solely manufactured in Southampton, England, invites the attention of Railroad car builders, owners and others to the PAINT COMPOSITION No. 3, IN ALL COLORS AND TINTS. It is hermetically soldered up in convenient sized tins of 7 lbs., 14 lbs., and 28 lbs. each, and warranted to keep good in any climate for many years. Being MIXED READY FOR IMMEDIATE USE, it will be found of great advantage, as it can be packed away like preserved meats, and will not deteriorate. It has been opened after TEN YEARS and found to be quite good and READY FOR USE. Being ground first on roller mills of polished granite, and then of burnished steel, by steam power, it is as fine as artist's color, and is applicable to the first-class Railroad Car, Counting House, or Drawing-Room, or the cabin of the yacht, steamer, or sailing ship—each tin forming a ready Paint Pot. It dries in a few hours, with a beautiful brilliant surface, without any stickiness or unpleasant smell, and stands longer than ordinary paint—never blistering, cracking, or flaking. IT IS GENERALLY ADOPTED BY THE CHIEF RAILWAY COMPANIES OF EUROPE, AND IS **CHEAPER AND BETTER THAN ANY OTHER** PAINT IN THE MARKET.

PLASTIC SLATE
FOR
Roofing & Other Purposes

The process of reconstructing Slate Stone from a disintegrated state was
PATENTED FEBRUARY 21st, 1865.
It is a combination of
Pulverized Slate and Viscous Matter
(the latter possessing qualities of geological and chemical affinity for the former,) and is a development of one of the simple but unalterable tendencies of nature.

As a Roofing Material it Stands Unrivalled
A mastic—it adapts itself to every shape and slope. Non-combustible, impervious, non-expansive, and undecaying.

Frost does not Crack nor Heat Dissolve it.

The only roofing material ever discovered that will resist the action of the elements as long as the structure it protects. Being susceptible of little, if any wear, from exposure, and
Perfectly Fire-Proof.
It is unequalled as a coating for Railroad and Farm Buildings, Fences, Bridges, bottoms of Vessels, Vaults, etc.

ESTABLISHED IN 1836.

PHELPS, DODGE & CO.,
Importers of Metals,
AND RUSSIA SHEET IRON,
NOS. 19 AND 21 CLIFF STREET, NEW YORK.
OFFER FOR SALE:

Tin Plates of every description.	Terne Plate for Roofing.
Sheet Iron, R. G., 12 to 18.	Sheet Iron, Nos. 12 to 18.
Russia Sheet Iron.	Galvanized Sheet Iron.
Sheet Zinc and Spelter.	Iron Ware.
Block Tin, Banca and Straits.	Pig and Bar Lead.
Sheet Brass Kettles.	Regulus Antimony.
Sheathing Copper.	Copper Bottoms.
Extra-sized sheets Copper, rolled to order.	Braziers' and Bolt Copper. Rivets, Kettle Ears, etc.

BOYNTON'S
CELEBRATED FURNACES.
FORTY-EIGHT DIFFERENT SIZES and PATTERNS, of PORTABLE and BRICK SET FURNACES for COAL or WOOD, suitable for all classes of PUBLIC and PRIVATE BUILDINGS.

ALSO,

American Kitcheners
Progressive and Morning Star Ranges,
Combination Range and Heater,
Baltimore Fire Place Heaters,
Laundry Ranges and Flat Heaters,
Parlor, Office and Cooking Stoves.

ALSO,

SOLE AGENTS FOR NEW YORK AND BROOKLYN, FOR THE SALE OF
RATHBONE & CO.'S "BRILLIANT,"
the finest SELF-FEEDING, BASE BURNING, REVERTIBLE FLUE HEATING STOVE, ever offered the public. Send for Circulars.

Richardson, Boynton & Co.,
MANUFACTURERS,
234 Water Street, New York.

HOWE'S STANDARD
SCALES

These Scales are placed entirely upon their actual merits, as every Scale is *warranted to give entire satisfaction.* Call and examine our stock of every variety of Scale, also, Certificates from our leading merchants who have had them in use in this city for eleven years. Second-hand Scales of various makers, taken in part pay for ours, for sale cheap.

ENGINEERING WORKS.

ENGINEER'S FIELD BOOK,
By C. S. CROSS, Civil Engineer.

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent **free by mail**, upon receipt of the price. For sale at this office. Price **$1.50.**

LYONS' TABLES.
To Civil Engineers and Contractors.

FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

Sheet No.				Sheet No			
1.	General Table for all Bases and all Slopes.			13.	for Base 18 ft. Slop.		1½ to 1
2.	For Side Hill Cuts and Fills.			14.	" 20 "		1¾ to 1
3.	Base 12 ft.	Slopes	1½ to 1	15.	" 24 "		2 to 1
4.	" 14	"	1½ to 1	16.	" 24 "		1½ to 1
5.	" 15	"	1¾ to 1	17.	" 25 "		1¾ to 1
6.	" 15	"	2 to 1	18.	" 26 "		1½ to 1
7.	" 16	"	1¾ to 1	19.	" 28 "		2 to 1
8.	" 16	"	2 to 1	20.	" 30 "		1 to 1
9	" 18	"	1 to 1	21.	" 30 "		1½ to 1
10.	" 18	"	1½ to 1	22.	" 30 "		1¾ to 1
11.	" 18	"	2 to 1	23.	" 32 "		1 to 1
12.	" 18	"	1 to 1	24.	" 32 "		1½ to 1

The Tables are printed in clear, bold type on tinted paper, sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.

Sent, **free by mail**, in separate sheets, at 25c. each

American Railroad Journal.

New York, Saturday, December 7, 1867.

Boston, Hartford and Erie Railroad.

The act of the Legislature of Massachusetts granting State aid to this company, provides that the Governor, with the advice and consent of the Council, may appoint three commissioners, one of whom shall be a competent engineer, to ascertain from time to time the amount of work performed on the line of the company's railway between Boston and the Erie Railway, and the expenditures properly incurred and made for the same; and to advise and inform the Governor and Council in reference to all matters and things they are called upon to ascertain or verify, under the terms and provisions of the act. It is also provided, that no portion of the State scrip shall be issued unless it shall be made to appear to the satisfaction of the Governor and Council and Commissioners, that the railroad company will be able, either alone or with the aid of other parties than the Commonwealth, to complete a line of railway from Boston to Fishkill; and if at any time after any portion of said scrip shall have been delivered to the Treasury of the company, it shall appear to the Governor and Council and Commissioners, that a through line between Boston and Fishkill will not be completed within five years from the date of the passage of the act, then no further portion of said scrip shall be delivered to the Treasurer of the company; and the Commonwealth shall at all times thereafter, and without notice, have power and authority to sell the bonds held as collateral security for the scrip then issued and outstanding. The following gentlemen have been appointed Commissioners under the act, viz: George T. Bigelow, Emory Washburn and Samuel Ashburner.

Port Royal Railroad.

At a meeting of the stockholders of this company held on the 27th ult., Stephen C. Millett, of Beaufort, S. C., was elected President, and R. E. Robbins, of Boston, with eleven others, Directors. More than half the grading is already complete, and two thousand hands will be put on the work immediately. This road is designed to connect Augusta, Ga., with Port Royal Harbor in South Carolina, and will connect with the Charleston and Savannah Railroad about midway of its termini.

Ogdensburg and Lake Champlain Railroad.

The earnings of this road for the quarter ending October 31, 1867, have been as follows:

	1866.	1867.
August	$86,728 47	$104,500 58
September	90,866 23	106,262 88
October	101,117 35	116,998 54
	$278,832 05	$327,762 00

This shows a gain in August of $17,772 11; in September, $15,376 65; and in October, $15,881 19—making the total gain in three months, $49,029 95. The Ogdensburg *Journal*, from which we have obtained the above figures, says that "the road was never in as good condition or capable of doing as much work as at present, and yet it is taxed to its utmost capacity, working night and day, to move the large amount of freight being received.

Already over two thousand five hundred carloads (25,000 tons) of lumber, flour and grain are at this point for winter distribution throughout the New England States and a large fleet yet to arrive, which ensures the road an unusually large business during the winter.

The new Elevator is a complete success in every particular and adds largely to the facilities of handling grain here. In every respect the prospects of the road were never more bright, or its business better managed, and with the completion of the Niagara Ship Canal and the Portland Road, the stock of this road would hardly be second in value to any in the country."

Virginia Central Railroad.

The earnings of this road for the years ending September 30, 1866 and 1867, have been as follows:

	1866.	1867.
From passengers	$247,625 43	$238,294 57
" freight	196,134 96	279,837 98
" express	26,336 11	20,714 65
" U. S. mail	15,238 48	13,550 00
" rents, etc.	2,114 12	2,113 44
	$487,449 10	$554,510 64
Expenses, viz:		
Conducting transportation and legal and miscellaneous exp.	$149,415 55	$126,311 56
Repairs of road and buildings	127,343 17	119,461 88
Repairs of locomotives and cars	53,235 97	56,499 74
Repairs of workshops and tools	2,500 00	8,461 61
Salaries	12,016 68	11,266 68
Taxes	20,552 30	9,916 46
Insurance	2,071 50	2,800 00
Repairs to real estate	177 82	221 45
Extraordinary expenses and repairs	260,337 13	88,923 52
	$627,650 15	$418,862 90
Excess of receipts	.....	$135,647 74
Excess of expenses	$140,201 05	.....

The gross receipts for the year ending September 30, 1867, compared with those of the preceding year, show an increase of $67,061 54; with a reduction in expenditures of $208,787 25—a gain of $275,848 79.

The ordinary expenses for conducting the operations of the company, in 1865–'66, as given above, were $367,313 02; and in 1866–'67, $329,939 38—a decrease of $37,373 64. The earnings less ordinary expenses, in the former year were $120,136 08; and in the latter year, $224,571 26—a gain of $104,435 18. The ordinary expenses

were 67½ per cent. of the gross receipts. The extraordinary expenses were as follows:

Purchase of two new locomotives	$40,817 04
Building and repairing cars	13,037 18
Re-building depots and water stations	13,205 93
Debt contracted prior to April, 1855	10,476 99
Discount and int. on temporary loans	10,741 94
Work done at shops for extension to Covington	494 44
Land damages paid	150 00
Total, as above	$88,923 52

The entire indebtedness of the company on the 30th of September, was $2,069,934 62—an increase during the past year $189,302 39. This increase of indebtedness has been occasioned in part by the extension of the road from Jackson's river to Covington, costing $117,787 58; and by the purchase of real estate in Richmond to the amount of $9,497. Bonds for interest funded have also been issued, amounting to $101,963 75. There remains unfunded of interest due up to Jan. 1, 1867, about $50,000. The amount of interest paid in cash since October 1, 1866, is $53,920 94. The report says:

The most important subject involving the future prospects of the company, which enlisted the attention of the Board, was the general question whether the scheme of extension and western connections could now be safely undertaken. This subject has always been approached under a full conviction of the pecuniary interest which this company has in it, and of its vital importance to the whole State. Though acting as the representatives of a private corporation, they could not forget their obligations to avail themselves of the position they occupy to bear their part in promoting the general welfare of the Commonwealth, and especially of those interests with which they are more immediately connected.

With one consent for nearly a century, the wisest and best men of our State have looked with earnest hope to the opening the line of communication between the Mississippi valley and the Atlantic coast, across the Alleghany mountains, where the waters of James river and the Ohio approach each other so closely. Its peculiar advantages as to distance, grades, climate, contiguous resources, &c. &c., compared with any other in the United States, are so distinctly marked by the finger of Divine Providence, and the results of its completion will be fraught with such inestimable blessings to our own, and other people, that the neglect to make every possible effort to secure its success would be a criminal responsibility.

It is with such an estimate of the necessity of opening that line your Board have so far acted, and now bring the subject to your farther notice, fully sensible at the same time of the difficulty of the undertaking.

As a preliminary step in this westward march of your improvement, your Board determined that the ten miles of track graded next to Covington should, if possible, be brought into operation, and no longer remain as a tacit confession that we were powerless to move. We need not tell you that in the embarrassed condition of the company, and the general distrust of all southern railroad companies, owing to our unhappy political condition, the purchase of the iron was no easy task, added to the cost of other materials for the superstructure; but without going into details, suffice it to say, with the addition of some personal security, the credit of the company was able to procure it, and the work was done, and thus on the 31st day of July the last section of your road was put in operation to Covington; and now the interesting question presents itself for your consideration, what shall we do in the further prosecution of the great enterprise?

We will present to you a fair statement of the actual condition of the question, that you may intelligently act on it, and come to a judicious conclusion.

At the called meeting in May last you were informed that in obedience to your instructions at the annual meeting in November last, authority was obtained from the Legislature for the company to contract with the commissioners of the two States to undertake the completion of the Covington and Ohio road; in which event, by the terms of the act passed on the 1st day of March, 1867, the company was thereafter to be known as the Chesapeake and Ohio Railroad Company, with some valuable concessions contingently made to it.

The stockholders at the meeting in May passed resolutions of instruction specifying certain conditions as a basis for a contract to build the Covington and Ohio Railroad, the most prominent of which provided that five millions of dollars in money should be raised by subscription of 8 per cent. preferred stock; which sum it was supposed, by resorting to temporary structures at some expensive points, would put the road in operation to steamboat navigation on the Kanawha river, and restraining the new company from mortgaging any of the property of the present company, until the road was in operation to the Kanawha. This was done under the conviction that when completed to that point, a lien on the whole property and franchises of the company from Richmond to the Ohio river would command a loan sufficient to finish the entire road and equip it.

Such was the scheme sanctioned by the stockholders at the called meeting in May, and in conformity therewith a conditional contract was made with the commissioners, a copy of which is as follows:

Memorandum of a Contract for the Construction of the Railroad from Covington to the Ohio river.

The following are the parties to the contract:

First. John B. Baldwin, Geo. W. Bolling, Thomas S. Flournoy, and R. H. Maury commissioners acting for the State of Virginia under the following acts of the General Assembly, namely:

1. "An act to incorporate the Covington and Ohio Railroad Company," passed February 26, 1866.

2. "An act to provide for the completion of a line or lines of railroad from the waters of the Chesapeake to the Ohio river," passed March 1, 1867.

Second. James Burley, Z. D. Ramsdell, Joel McPherson and John S. Cunningham, commissioners acting for the State of West Virginia, under the following acts of the Legislature, viz:

1. "An act to incorporate the Covington and Ohio Railroad Company," passed March 1, 1866.

2. "An act to provide for the completion of a line or lines of railroad from the waters of the Chesapeake to the Ohio river," passed February 26, 1867.

Third. The Virginia Central Railroad Company.

The Virginia Central Railroad Company has contracted with the said commissioners for the construction of the railroad from Covington to the Ohio river upon the terms and according to the provisions of the acts hereinbefore recited, subject only to the following conditions and stipulations, which shall be binding only so far as not inconsistent with the said acts, viz:

1st. That if the amount of money required to put the road in operation from Covington to steamboat navigation on the Kanawha river, with the necessary buildings and equipments, not less than five millions of dollars be not raised within six months from the date of the contract by subscriptions of stock which the Board of Directors believe are available, and they are willing to receive as cash, then and in that case this company shall be relieved from the contract if they desire it.

2nd. The party of the third part shall, on or before the 1st day of December, 1867, file with the Board of Public Works of Virginia, and of West Virginia, a statement in writing, showing the amount of stock raised under this agreement and accepted by the company; and also declaring whether it is the desire of the company to be released from this contract, as provided in the preceding section. The failure to file such a statement shall, at the option of the parties of the first and second part, be taken and treated as an abandonment and annulment of this contract.

3rd. If the said company shall file such a statement, and express a purpose to continue the contract with a subscription of stock less than three millions of dollars, it shall be at the option of the parties of the first and second part to refuse to allow such continuance, and to vacate and annul the contract. Such determination of the parties of the first and second part to be communicated in writing to the party of the third part, on or before the 1st day of January, 1868, under this or the preceding section.

4th. The company will guarantee to those stockholders who furnish the funds to construct and equip the road to steamboat navigation on the Kanawha, and on any such additional stock thereafter subscribed, four per centum semi-annually as preferred dividend on all the stock fully paid, after the road is completed to the Ohio river.

5th. That all the net revenues derived from working the road west of Covington before it is finished to the Ohio river, shall be appropriated to that object.

6th. No part of the earnings accruing east of Covington shall be diverted from the use and benefit of the present stockholders and their successors, until the road is completed to the Ohio river.

7th. The proceeds of all stock or other subscriptions hereafter received, shall be applied exclusively to the construction and equipment of the road west of Covington, until it shall be completed to the Ohio river, unless otherwise provided in the subscription.

8th. No loan shall be made pledging the property of the company east of Covington for the completion or equipment of the road west of Covington, until it shall have been completed and properly equipped to steamboat navigation on the Kanawha river.

9th. If from any cause the work done west of Covington be forfeited, parties who become stockholders for the completion of that part of the road thereby forfeit their stock; and they shall have no interest or voice in the management of the road east of Covington after such forfeiture.

10th. No sale of the stock now owned by the State of Virginia in the Virginia Central Railroad Company, or of any claims held by the State against the company, shall be made to any other person than the Chesapeake and Ohio Railroad Company before the 1st day of December, 1867.

11th. The times named and limited in the preceding section, and in the second and third sections, shall be deemed to be of the essence of this contract. And in case of failure on the part of the parties of the first and second part to notify their option under the second and third sections, such failure shall, in any case, be construed in favor of the continuance of the contract.

A short time thereafter the commissioners of the State of West Virginia published a call for a convention on the 10th of July at the White Sulphur Springs of delegates from the whole country interested. That convention was numerously attended not only from West Virginia, but by representatives from this State and contiguous parts of Kentucky and Ohio, all manifesting a great desire to have the road completed to the Ohio River, with a view to its connection with the railroads of those two States. The terms of the conditional contract had been generally made known before that time, and were fully explained at the convention by the President of this company. The delegates from West Virginia expressed the opinion that it was vain to expect any considerable subscription of stock from their counties payable in usual cash instalments as contemplated by the stockholders of this company, and expressed in the foregoing conditional contract. After mature consideration of the subject, the convention adopted resolutions proposing to raise five millions of dollars of preferred stock, payable in bonds instead of money, as will appear

by the following extract from the proceedings of the convention:

Resolved, That this convention earnestly recommends that at least five millions of dollars be raised by a subscription of stock to enable the Virginia Central Railroad Company to fulfil the contract entered into conditionally with the commissioners of Virginia and West Virginia on the 24th of May, 1867—that at least $2,500,000 should be raised in Virginia, and at least $2,500,000 in West Virginia.

Resolved, That the Legislatures of Virginia and West Virginia be petitioned by the Chesapeake and Ohio Railroad Company (in view of the influence its work will exert favorable to the increase of revenue to the States) to pass acts exempting from taxation the entire property of the Chesapeake and Ohio Railroad Company, including such lands as it may acquire in payment for subscription of stock, or by purchase, during the period of ten years after the completion of the road to the Ohio River.

Resolved, That it be recommended to each county to pledge itself to settle all claims for land damages in the construction of the road within the boundary of each county.

Resolved, That it be recommended to the counties of West Virginia to subscribe not less than the following amounts of eight per cent. preferred stock of the Chesapeake and Ohio Railroad Company, payable in eight per cent. county bonds, (if required by the counties,) convertible into preferred stock, the bonds to be received by the company at a discount of not more than ten per cent.: Mason, $500,000; Putnam, $250,000; Clay, $50,000; Kanawha, $500,000; Fayette, $115,000; Monroe, $200,000; Greenbrier, $250,000; Mercer, $50,000; Raleigh, $50,000; Wyoming, $25,000; Jackson, $100,000; Roane, $50,000; Logan, $25,000; Wayne, $50,000; Cabell, $100,000; Lincoln, $25,000; Boone, $50,000; Nicholas, $50,000; Webster, $10,000; Pocahontas, $50,000. Total, $2,500,000.

Resolved, That it be recommended to Virginia to make her subscriptions in the manner and upon the terms provided for in the resolution relation to subscriptions by counties in West Virginia.

The raising of funds in this way was declared by delegates from West Virginia as the most that could be hoped for, and so far as our State is concerned, the financial and political condition of the country is such, that if cash payments had been insisted on, we could not have calculated on any large corporation or individual subscription of stock.

The people of several localities have voted for subscriptions of stock payable in bonds at 10 per cent. discount, to the amount of $3,550,000, as will be seen by the accompanying list; City of Richmond, $2,000,000; County of Fayette, West Virginia, $150,000; Greenbrier, $250,000; Kanawha, $500,000; Putnam, $300,000; Cabell, $300,000; Fluvanna County, Virginia, $50,000. No county in Virginia has voted against subscription, and a considerable sum is confidently expected from those immediately interested.

Contrary to our expectation all the counties in West Virginia, west of the falls of Kanawha, have made a condition to their subscriptions that the several amounts shall be expended at that end of the line. It was feared at first that this might have a very injurious influence on the success of the work, but on consideration it may possibly have the contrary effect. The people of the States of Kentucky and of Ohio have each manifested a great interest in the general design—the first in the branch which leaves the Kanawha at the mouth of Scary Creek, and would terminate at the mouth of Big Sandy, the latter in that which continues down the river to Point Pleasant.

They have declared their determination to connect with our line in either case where it reaches the Ohio River. In execution of this purpose there is now an active effort being made which promises success to connect our road with the Marietta and Cincinnati Railroad at Hamden, being a distance of only 28 miles from Point Pleasant.

One hundred miles of the western end of the Covington and Ohio road will cost much less for the same distance than the eastern. If the subscriptions of West Virginia can be made available for building that part of the road from the falls of the Kanawha, and either Kentucky or Ohio is thereby stimulated to make connection at the Ohio River, there certainly will be no cause to regret their requiring their subscriptions to be expended there. There is no serious difficulty in this company working that end of the line separately, and if it can be brought into operation while the expensive mountain section between the Greenbrier River and the falls of Kanawha is in a course of construction, the cost of that section would be materially reduced by the facility of getting supplies from the rich valley of the Kanawha, and from Ohio or Kentucky, as the case may be.

The question of embarking in this heavy enterprise without having previously secured an amount of means sufficient to accomplish it, is a very serious one addressed to the pecuniary interest of of the stockholders; but to abandon it under present circumstances, when so much has already been done towards raising means, would be a grave responsibility which your Board is not willing to assume or to recommend. With the road in operation to the White Sulphur Springs, and from the falls of Kanawha to the Ohio, leaving a gap of something over 100 miles, and that connected by the James River and Kanawha Turnpike, none are so skeptical as to believe it would remain long unfinished.

There are plans and propositions not fully developed at the date of this report for the construction of this work, in reference to which the Board expects to obtain more information before the day appointed for the general meeting.

The company have 30 locomotives, 12 passenger, 3 mail and passenger, 2 mail and express, 6 baggage, 114 box, 14 stock, 56 platform and 3 conductor's cars. Number of miles run by locomotives, 300,405. Number of passengers carried west, 55,441; do., east, 54,348—total, 109,789. Total mileage of passengers, 4,936,004. The amount received per passenger per mile was 4.52 cents. Tons of freight carried west, 23,957; do. east, 39,630—total, 63,587. Total mileage of freight, 5,225,008. The average distance freight was carried, 82.17 miles. Amount received per ton per mile, 5.22 cents. Compared with the previous year, the number of passengers shows a falling off of 9,274; and the mileage of do., 833,460. The tonnage of freight shows an increase during the same time of 26,719; and the mileage of freight an increase of 2,290,594. The tonnage of September, 1867, was the heaviest ever carried over the road in any one month. The indications are that the tonnage of the road will continue to increase, and that it will be necessary to increase the number of cars to accommodate the business of the ensuing year.

The track was completed to Covington on the 31st of July. The total length of the road is now 205 miles. The cost of the extension was $117,787 58, of which $80,000 was for iron. A permanent bridge will be required over Jackson's River to replace a temporary structure at that point. Other permanent bridges will also be required.

The road bed is generally in fine order. Some 6¾ miles have been ballasted with gravel and broken stone. The ditching west of Blue Ridge was to have been completed before winter. 11,000 feet of new iron, 45,000 cross ties, and 1,050 feet of new sidings have been used. From 1,200 to 1,500 tons of new rail are needed to put the track in first rate condition.

The financial condition of the company September 30, 1867, was as follows:

Capital stock:		
Subscription by State of Virginia		$2,013,987 52
Subscriptions by individuals		1,339,691 50
		$3,553,679 02
Funded Debt, viz:		
Bonds of the Co., guaranteed by State, payable in 1880	$100,000 00	
Coupon bonds of 1851, payable in 1872	199,000 00	
Coupon bonds of 1854, payable in 1884	965,000 00	
Registered bonds, payable in 1872	7,500 00	
Registered bonds, payable in 1884	18,000 00	
State Loan of 1859-'60, payable in 34 years	210,000 00	
Coupon bonds of 1865, payable in 1876	55,000 00	
Coupon bonds for funding interest, payable in 1877	144,400 00

President.—E. Fontaine.
Superintendent.—H. D. Whitcomb.
Treasurer.—J. Garrett.

☞ A company has been organized at Rochester, New York, to build the Lake Ontario Shore Railroad, from Oswego to Lewiston, on the Niagara river, a distance of about 140 miles. The route is said to be a good one, extraordinarily level and even, and the right of way will be donated by the inhabitants. The capital required is $4,000,000.

One of the Probable Results of Pacific R.R.

The San Francisco *Bulletin* anticipates, with apparent good reason, the transfer of the Australian and New Zealand steam lines from Panama to that city, when the Pacific Railway shall be completed. The subject is already attracting attention in Australia, where Mr. Crosbie Ward, the original promoter of the Panama line, is. This gentleman writes to the Australian press that the distance from Wellington to San Francisco is five thousand eight hundred and sixty-four nautical miles, or seven hundred miles less than to Panama. The San Francisco route will have the advantage of Tahita as a coaling station, exactly on the course between Australia and San Francisco.

If the railway was completed and the route changed as proposed, the mails could be carried from Wellington to San Francisco in twenty-five days; from San Francisco to New York in five days, and from New York to London in twelve days—forty-two days in all, instead of from sixty to seventy days, as at present. Mr. Ward concludes his argument on behalf of the California route as follows:

Such arguments as the foregoing are unanswerable, and taken in connection with the fact that California will, after the completion of the Pacific Railroad, furnish more traffic for the Australian steamers than Panama, must have great weight with the Australians, who will naturally be anxious, when they come to know all the facts, to shorten by ten to twenty days the voyage to Europe, and to escape several thousand miles of ocean traffic. The diversion of a large share of Australasian travel and traffic to the California route may safely be regarded as one of the certainties of the near future.

National Manufacturers' Convention.

As bearing on an important question, the early consideration of which is being urged from various quarters, we give the substance of a report to a meeting of the Detroit Manufacturers' Association, October 18, unanimously adopted by the meeting. At the same time a committee was chosen and measures were adopted for a National Convention of manufacturers at Cleveland, Ohio, December 18, to urge the repeal of taxes on all manufacturers and productions—luxuries excepted—on the general plan suggested in the report.

This important Convention is *only* for tax matters, and *not* for action on tariffs, as some suppose, and promises to be well attended. From the report we extract as follows:

The following principles have been laid down as a guide in the discussion of this subject:

1. Taxation should be so levied as to exempt all articles of prime necessity to the greatest extent possible, and placed upon articles of luxury and where it will be the least obnoxious to the people.

2. It should be so adjusted as to be reliable and collected with the least possible expenditure or Governmental machinery.

In Europe, where taxation has been reduced to a science, it is found that ample revenue can be realized from a few sources, thereby incurring but little expense for the collection of the same. It is very evident that we can profit greatly by imitating their example to some extent, as our system is in many respects very oppressive and burdensome to the people, levying many times exorbitant taxes on articles of prime necessity, and not unfrequently repeating the same four or five times during the transition from the crude materials to the final resting place in the finished fabric or mechanism.

The official estimated expenses of the Government for the fiscal year ending June 30, 1868 is $152,569,597
Interest on public debt 133,678,243

Total $286,247,540

Experience has demonstrated that the following sources of revenue will be ample to meet the current expenses of the Government and pay the interest on the public debt, viz:

Distilled spirits (whiskey)	$50,000,000
Fermented liquors	5,000,000
Tobacco and cigars	20,000,000
Gross receipts (steamboats, railways, &c.)	12,000,000
Banks, insurance, railways, &c. (dividends and deposits)	12,000,000
Licenses, with 50 per cent. added to last year's receipts	27,000,000
Legacies and successions	2,000,000
Stamps	20,000,000
Brokers' sales of foreign bills, gold, &c	3,000,000
Miscellaneous	15,000,000
Total	$166,000,000
Receipts from customs	150,000,000
Total	$316,000,000

This exhibit shows that the revenue from the sources named will furnish $30,000,000 more than the total estimated expenses of the Government, including the interest on the public debt.

The amount to be realized from each source corresponds very nearly to the amount collected from the same sources in 1866, except where a more rigid enforcement of laws will secure a much larger return, as in the case of whiskey and tobacco.

The amount to be realized from licenses has been increased 50 per cent. on former receipts.

This tax is the most reliable and satisfactory of any on the list. Once paid, it is settled for a whole year. It is simple and easily understood by all, and one in which there is but little opportunity for fraud, and can be easily increased or diminished as the necessities of the Government may require.

It will be seen that the sources other than customs, from which revenue will be collected, should the above schedule be adopted by the Government, have been reduced to ten, which greatly simplifies our system of taxation and abolishes three-fourths of all the machinery now in operation for the purpose of collecting the internal revenue, and thereby saves to the Government at least $5,000,000 annually.

Our revenue once centred on a few reliable sources yielding ample means to meet the current expenses of the Government and to pay the interest on the public debt, will stimulate both enterprise and production, and give confidence and stability to all industrial and commercial pursuits.

Cotton is the great export staple of the country, to which we must look to bring up the balance of trade now setting so heavily against us. To abolish the tax on this article will greatly stimulate its production, which will in a very few years reach its former proportions.

Another reason why cotton should be exempt from taxation is that it is a prime article of necessity entering into the consumption of every family 364,036,123 pounds being consumed in this country in 1860.

To abolish the tax on sugar will stimulate its production so that it will soon regain its former magnitude, thereby reducing our imports full $40,000,000 annually.

When we consider the large amount of revenue to be collected by the Government, in addition to the State and municipal taxes, and that there is to be thrown upon the market annually full $6,000,000, fresh productions to be bought and sold by 40,000,000 people, our circulating medium cannot be deemed excessive, and should not be contracted. The productions of the South once reinstated, a home market is furnished for the vast agricultural products of the great Northwest, and for the manufactures of the East.

Hence, a wise policy dictates that the productions of that portion of our country should not only be exempt from taxation, but should receive the fostering care of the Government. Wise legislation, that shall protect well our commercial and industrial interests and give permanency and stability to all governmental affairs, will greatly increase the power of labor in our midst, which, when relieved of excessive taxation, will soon make us the most prosperous and independent nation on the earth.

California Iron Interests.

The development of the iron interest on the Pacific coast is beginning to attract attention in San Francisco. It is claimed that there is scarcely a county in California in which there are not deposits of this mineral of more or less value. The Coast Range has never been thoroughly explored for iron ore; but here and there surface deposits have been found indicating considerable richness, and a good iron mine in any one of the coast counties might be developed with greater certainty of profit than a silver mine. In Oregon a considerable advance has been made in the production of pig iron. The blast furnace is located six miles above Portland, and the ore is said to be of about the richness of 55 per cent. The furnace turns out about 12 tons a day, but half a dozen such furnaces could not satisfy the present consumption on the Pacific coast.

Finances of the United States.

EXTRACTS FROM THE REPORT OF THE SECRETARY OF THE TREASURY.

The finances of the United States, notwithstanding the continued depreciation of the currency, are in a much more satisfactory condition than they were when the Secretary had the honor to make to Congress his last annual report. Since the first day of November, 1866, $493,990,263 34 of interest bearing notes, certificates of indebtedness and of temporary loans, have been paid or converted into bonds; and the public debt, deducting therefrom the cash in the Treasury, which is to be applied to its payment, has been reduced $59,805,555 72. During the same period decided improvement has also been witnessed in the general economical condition of the country. The policy of contracting the currency, although not enforced to the extent authorized by law, has prevented an expansion of credits, to which a redundant and especially a depreciated currency is always an incentive, and has had no little influence in stimulating labor and increasing production. Industry has been steadily returning to the healthy channels from which it was diverted during the war, and although incomes have been small, and trade generally inactive, in no other commercial country has there been less financial embarrassment than in the United States.

On the 31st day of March, 1865, the total debt of the United States was $2,366,955,077 34, of the following descriptions, to wit:

Funded debt	$1,100,361,241 80
Matured debt	349,420 09
Temporary loan certificates	52,452,328 29
Certificates of indebtedness	171,790,000 00
Interest-bearing notes	526,812,800 00
Suspended or unpaid requisitio's	114,256,548 93
U. S. notes (legal tenders)	433,160,569 00
Fractional currency	24,254,094 07
	$2,423,437,002 18
Cash in the Treasury	56,481,924 84
Total	$2,366,955,077 34

The resources of the Treasury consisted of the money in the public depositories in different parts of the country, amounting as above stated to $56,481,924 84; the revenues from internal taxes

and customs duties, and the authority to issue bonds, notes, and certificates, under the following acts to the following amounts:

Act of February 25, 1862, bonds.	$4,023,600 00
Act of March 3, 1864, bonds	27,229,900 00
Act of June 30, 1864, bonds, 7.30 or compound interest notes	79,811,000 00
Certificates for temporary loans, act June 30, 1864	97,546,471 71
U. S. notes for payment of temporary loans, act July 11, 1862	16,839,431 00
Fractional currency, act June 30, 1864	25,745,905 93
Act of March 3, 1865, bonds or interest bearing notes	533,587,200 00
Making a total of	$784,783,508 64

Between the first days of April and September, 1865, the Secretary used his authority to issue securities as follows:

Bonds under the act of February 25, 1862	$4,023,600 00
Bonds under the act of June 30, 1864	6,000,000 00
Compound interest notes, act June 30, 1864	24,978,390 00
Certificates for temporary loans, act June 30, 1864	54,696,384 87
Fractional currency, act June 30, 1864	2,090,648 44
Seven-thirty notes, March 3, 1865	529,187,200 00
Total	$620,976,223 31

On the 31st of August, 1865, the public debt reached the highest point, and was made up of the following items, to wit:

Funded debt	$1,109,568,191 80
Matured debt	1,503,020 09
Temporary loans	107,148,713 16
Certificates of indebtedness	85,093,000 00
Five per cent. legal-tender notes	33,954,230 00
Compound interest legal-tender notes	217,024,160 00
Seven-thirty notes	830,000,000 00
United States notes (legal-tenders)	433,160,569 00
Fractional currency	26,344,742 51
Suspended requisitions uncalled for	2,111,000 00
Total	$2,845,907,626 56
Deduct cash in Treasury	88,218,055 13
Balance	$2,757,689,571 43

Of these obligations, it will be noticed, $684,138,959 were a legal tender, to wit:

U. S. notes	$433,160,569
Five per cent. notes	33,954,230
Compound interest notes	217,024,160
Total	$684,138,959

A very large portion of which were in circulation as currency.

The temporary loans were payable in 30 days from the time of deposit, after a notice of 10 days.

The five per cent. notes were payable in lawful money, in one and two years from Dec. 1, 1863.

The compound interest notes were payable in three years from their respective dates, all becoming due between the 10th day of June, 1867, and the 16th day of October, 1868.

The 7-30 notes were payable, in about equal proportions, in August, 1867, and June and July, 1868, in lawful money, or convertible at maturity, at the pleasure of the holder, into 5-20 bonds.

The certificates of indebtedness would mature at various times between the 31st of August, 1865, and the 2d day of May, 1867.

Since the first day of September, 1865, the temporary loans, the certificates of indebtedness, and the five per cent. notes have all been paid, (with the exception of small amounts of each not presented for payment,) the compound interest notes have been reduced from $217,024,160 to $71,875,040, ($11,560,000 having been taken up with three per cent. certificates;) the seven and three-tenth notes from $830,000,000 to $337,978,800; the United States notes, including fractional currency, from $459,505,311 51 to $387,871,477 39—while the cash in the Treasury has been increased from $88,218,055 13 to $133,998,398 02, and the funded debt has been increased $686,584,800. While this has been accomplished there has been no commercial crisis, and (outside of the Southern States, which are still greatly suffering from the effects of the war and the unsettled state of their industrial interests and political affairs) no considerable financial embarrassment.

The following is a statement of the public debt on the 1st of July, 1867:

DEBT BEARING COIN INTEREST.

5 per cent. bonds		$198,631,350 00
6 per cent. bonds of 1867 and 1868		15,181,141 80
6 per cent. bonds, 1881		283,746,350 00
6 per cent. 5-20 bonds		1,127,531,800 00
Navy pension fund		13,000,000 00
		$1,637,890,641 80

DEBT BEARING CURRENCY INTEREST.

6 per ct. bonds	$14,762,000 00	
3 year compound interest notes	122,394,480 00	
3 yr. 7-30 notes	488,647,425 00	
		625,803,905 00
Matured debt not presented for payment		8,997,595 80

DEBT BEARING NO INTEREST.

U. S. notes	$371,992,029 00	
Fraction currency	28,307,523 52	
Gold certificat's of deposit	19,207,520 00	
		419,507,072 52
Total debt		$2,692,199,215 12
Amount in Treas'ry, coin	$108,419,638 02	
Amount in Treas'ry, currency	71,979,563 77	
		180,399,201 79
Amount of debt, less cash in Treasury		$2,511,800,013 33

The following is a statement of receipts and expenditures for the fiscal year ending June 30, 1867:

Receipts:

From customs	$176,417,810 88
Lands	1,163,575 76
Direct tax	4,200,233 70
Internal revenue	266,027,537 43
Miscellaneous sources	42,824,852 50
	$490,634,010 27

Expenditures:

For civil service	$51,110,027 27
Pensions and Indians	25,579,083 48
War department	95,224,415 63
Navy department	31,034,011 04
Interest on Public Debt	143,781,591 91
	$346,729,129 33
Loans paid	$746,350,525 94
Receipts from loans	640,426,930 29
Reduction of loans	$105,923,615 65

The following is a statement of receipts and expenditures for the quarter ending September 30, 1867:

Receipts:

From customs	$18,081,907 61
Lands	287,460 07
Direct tax	647,070 83
Internal revenue	53,784,927 49
Miscellaneous sources	18,361,462 62
	$121,161,928 62

Expenditures:

For civil service	$13,152,348 08
Pensions and Indians	10,484,476 11
War department	30,587,056 85
Navy department	5,579,704 67
Interest on public debt	88,515,640 47
	$98,269,226 18
Loans paid	$200,176,368 34
Receipts from loans	135,103,282 00
Reduction of loans	$65,073,086 34

The Secretary estimates that the receipts for the three quarters ending June 30, 1868, will be as follows:

From customs	$115,300,000 00
Lands	700,000 00
Internal revenue	155,000,000 00
Miscellaneous sources	25,000,000 00
	$296,000,000 00

The expenditures for the same period according to his estimates, will be:

For civil service	$37,000,000 00	
Pensions & Indians	22,000,000 00	
War department, including $24,500,000 for bounties	100,000,000 00	
Navy department	22,000,000 00	
Interest on the public debt	114,000,000 00	
		295,000,000 00
Leaving a surplus of estimated receipts over estimated expenditures of		$1,000,000 00

The receipts for the next fiscal year, ending June 30, 1869, are estimated as follows:

From customs	$145,000,000 00
Internal revenue	205,000,000 00
Lands	1,000 000 00
Miscellaneous sources	30,000,000 00
	$381,000,000 00

The expenditures for the same period are estimated as follows:

For civil service	$51,000,000 00	
Pensions & Indians	35,000,000 00	
War department, including $25,500,000 for bounties	120,000,000 00	
Navy department	36,000,000 00	
Interest on the public debt	130,000,000 00	
		372,000,000 00
Leaving a surplus of estimated receipts over estimated expenditures of		$9,000,090 00

The foregoing estimates are made on the general average of the receipts and expenditures for the past nine months. The Secretary is hopeful, however, that Congress will take measures to largely reduce expenditures in all branches of the service, so that a steady reduction of the debt may be continued.

☞ Application will be made to the Legislature of Ontario to enlarge the charter of the Erie and Ontario Railway, allowing that company to construct a line to the Detroit River. The Brockville and Ottawa Railroad Company also will apply to the Legislature of Ontario to reduce the capital of the company and create new stock.

☞ The first section of the Lawrence and Galveston Railroad, between Lawrence and Ottawa, 30 miles, will be completed by the 1st of January. The track is now being laid at the rate of a mile a day. Wm. Sturgis, Esq., is President of the company.

American Railroad Journal.

Saturday, December 7, 1867.

Stock Exchange and Money Market.

The Money Market has worked in favor of borrowers on call, since our last. The supply at this point has been gaining on the demand, the influx of currency from the northwest being in excess of the outflow to the South and Southwest. The city banks have increased their resources, in the form of specie and legal tender notes, and have also had a handsome addition made to their deposits; while they have contracted their loans, and circulation. The Government office has reduced its cash reserve, by a few millions. To the principal dealers in the public funds, Money has been available in round sums at 6, and to the leading Stock Exchange firms, at 7 per cent. At these figures, the offerings on call have been quite liberal, largely ahead of the wants of borrowers in a temporary form. The discount market has not relaxed. Very little favor is shown to business paper, either in or out of bank. A number of failures in the mercantile line have been reported during the week, adding to the prevailing distrust of mercantile credits. The best grades of commercial paper are quoted slow of sale at from 7@10 per cent. per annum. The annual message of the President, and the accompanying documents have been quite favorably interpreted, as regards their bearing on the finances and credit of the nation. The report of the Secretary of the Treasury has met with very general approval, both in its business statements, and in its recommendations.

In relation to the prospect of an early resumption of specie payments, the Secretary is of the opinion that "there is not any insuperable difficulty in the way of an early and a permanent restoration of specie standard. It may not be safe to fix the exact time, but with favorable crops next year, and with no legislation unfavorable to contraction at this session, it ought not to be delayed beyond the 1st of January, or at farthermost the 1st of July, 1869. *Nothing will be gained, however, by a forced resumption.* When the country is in a condition to maintain specie payments they will be restored as a necessary consequence. To such a condition of national prosperity as will ensure a permanent restoration of the specie standard the following measures are, in the opinion of the Secretary, important if not indispensable.

The funding or paying of the balance of the interest bearing notes and the continued contraction of the paper currency.

The maintenance of the public faith in regard to the funded debt.

Restoration of the Southern States to their proper relation to the federal government.

If this opinion be correct, the question of permanent specie payments, involving as it does the prosperity of the country, underlies the great questions of currency, taxation and reconstruction, which are now engaging the attention of the people, and cannot fail to receive the earnest and deliberate attention of Congress."

The Secretary regards the funding or payment of the balance of interest-bearing notes, and a continued contraction of the paper currency, as the first measure important, if not indispensable for national prosperity, and as a consequence for a permanent resumption. An encouraging feature of the Message and the Treasury documents is the substantial harmony of all the public officers, on financial topics.

National Bank notes to the amount of $180,320 were issued last week, making the total issue to 1,673 banks thus far, $304,715,991, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $5,270,535, leaving, with the existing 1,639 banks, (having an aggregate capital of $424,394,861,) an actual circulation at this date, of $299,441,456. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,982,750; and for the public deposits, $38,001,950—making a total of $378,984,600. The Treasury Department last week redeemed and destroyed $94,000 of worn and mutilated fractional currency, and issued $136,000 of new.

Both the Secretary and Comptroller of the cur-

rency, in their annual reports, take strong ground, in advocacy of the wisdom, usefulness and economy to the Treasury, of the national banking system. The Comptroller says that of the aggregate number of authorized national banks, four never completed their organization; two were superseded by subsequent organizations with the same titles, and ten are in the hands of receivers.

The specie reserve of the city banks is now $16,572,890, against $14,957,607 same time last year. The city bank deposits are now $175,686,233, against $208,889,177 week ending Dec. 1, 1866. The legal tender reserve amounts to $52,098,132, against $61,485,458 same time last year. The circulation now stands at $34,080,792, against $31,893,849 same time last year. The loans are now $247,815,500, against $263,011,668 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $86,548,452 a day, against a daily average of $96,667,034 the preceding week, and $82,536,188 the week ending with Nov. 16. The current week's exchanges average about $87,192,500 a day. The city banks, last week, gained $1,073,780 of specie, $976,221 of legal tender, and $964,550 of deposits. They reduced their loans, $1,528,140; and their circulation, $49,119.

The U. S. Sub-Treasury receipts, week ending with Nov. 30, were $28,228,390, including $1,234,301 from customs duties; payments, $30,105,136, including $1,404,614 of coin interest; balance at the close of the week, $107,055,983, against $108,932,729, at the close of the preceding week, showing a decrease of $1,876,746. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $1,731,396 including $346,000 from customs; and payments, $791,418; on Tuesday, receipts, $1,382,500 including $336,000 from customs, and payments, $3,885,377. The balance at the close of business on Tuesday stood at $105,493,092, against $109,023,120 a week previous. The aggregate receipts of the office in November were $115,773,911, including $7,304,934 from customs, aggregate payments, $118,589,792, including $16,969,514 of coin interest; balance at the close of the month $107,055,983, against $109,871,865 at the beginning of the month.

The aggregate issue of coin certificates by the U. S. Sub-Treasury, in this city, up to Nov. 30, was $232,690,800; aggregate redemptions, $201,927,000; leaving outstanding on Saturday last, certificates to the amount of $30,763,800.

The receipts of the U. S. Sub-Treasury, Philadelphia, in November, were $6,411,679; payments $7,829,153; balance, at the close, $5,364,054.

The Philadelphia Bank movement the past week shows an increase in loans, of $53,946; a decrease of $6,253 in specie; an increase in legal tenders of $556,647; an increase of $52,256 in deposits; and an increase of $16,479 in circulation. The Bank Clearings show a decrease of $5,716,383, and the balances, a decrease of $631,076.

Government revenues have increased a little since our last, and have been nearly equal to the expenditures. The excises, last week, yielded $3,045,000, against $2,111,000, the preceding week; customs at the port of New York $1,234,301, and at the outports, about $410,000 (in coin) more, making the grand total income for the week equal about $8,929,000 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with July 30, 1867, were $265,920,474, against $310,906,984 the preceding fiscal year; and $211,129,529 fiscal year ending with June 30, 1865. The receipts thus far in the new fiscal year, which began on the 1st of July, have been about $85,000,000.

Commissioner Rollins, in his annual report, gives the following comparative statement of the receipts from excises, in the first four months of the last three fiscal years:

	1865.	1866.	1867.
July	$21,693,470	$27,079,103	$24,734,656
August	34,087,539	38,343,340	17,848,651
September	37,939,415	33,714,718	13,183,606
October	30,457,983	26,414,430	14,486,636

Of the amount collected during the four months of 1865 $52,948,561 were from incomes, and of that in 1866 $43,463,655, while of that in 1867 only $17,733,714 came from these sources.

Government received $6,767,381 from customs, through the port of San Francisco, from Jan. 1, to Nov. 4, 1867.

Gold has been much depressed in price since our last, having fallen to 136⅜@136½, under the influence of largely augmented offerings, and a decided falling off in the demand. The complete accord of the President and Secretary, on the financial issues, as well as on the question of the wisdom and necessity of laboring to bring about an early resumption of specie payments, has tended to lessen the confidence of the *bulls* in further inflation. The speculative inquiry has been very moderate. The customs and export call has been light. The quotations on Wednesday were 137⅛@137¾, the market having been somewhat strengthened by the less favorable foreign news, as regards U. S. securities in London and American produce, especially cotton in Liverpool. The latest sales were at 137¼. The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1867, have been $3,028,223, against $9,264,692 same time last year. The customs demand for Gold last week, averaged $246,860 a day; thus far, this week, it has been equal to $341,000 a day, or equal to a weekly aggregate of $2,046,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $89,818, and from California, $323,619. The total customs revenue of the Government, in coin, at this port, thus far in the current calendar year commencing with Jan. 1, 1867, has been $111,510,400, against $124,502,017 same time in the preceding fiscal year. The total receipts of California gold at this port since Jan. 1, 1867, have been $25,814,253, against $38,297,350 same time last year, showing a decrease this year, of $12,483,097. The exports of specie from this port, last week, were $337,195. The total outflow of specie from the port, since Jan. 1, 1867, has been $45,060,999, against $58,568,448 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, $1,404,614, making the total coin interest disbursements through the Government office, since Jan. 1, 1867, $60,432,595, against $46,957,971 for the preceding calendar year. The specie exports from San Francisco, from Jan. 1, to Nov. 7, reached $34,766,342, against $38,499,629 same time last year, showing a decrease, in 1867, of $3,733,287.

Foreign exchange has been less freely offered and has been in pretty fair demand, since our last, at firmer prices. Bankers' 60 day bills on London closed at 109⅛@109¾, and on Paris to 5.16¼@5.15; sight bills on London to 109¾@110⅛ and on Paris to 5.13¾@5.12¾. The offerings of produce bills have been less extensive this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,957,208, making the total value of exports since Jan. 1, 1867, $175,566,738, against $175,382,922 same time in the preceding year.

Government securities have not been very active, during the week. The investment demand has been moderate at some modification of prices. There has been no speculation of moment. Toward the close, the inquiry became rather more active, and prices favored sellers. The Message, and accompanying Treasury reports, tend to augment the public confidence in the National resources, solvency and uprightness. The President and Secretary very positively and forcibly argue against all projects, thus far mooted, adverse to a rigid maintenance of the public faith with the National creditors. This view of the situation is very favorably regarded by purchasers of the public funds, which close buoyantly, on comparatively light offerings. Of the coin bearing obligations, amounting in all to $1,778,110,991, on the 1st of November there were deposited with the U. S. Treasurer at Washington, in pledge for the circulation of the National banks, bonds to the amount of $340,675,000.

The very latest dealings on Wednesday were on a restricted scale, and at slightly modified prices, under the reduced figures reported from London for the 5-20s of 1862. U. S. sixes of 1881 closed here on Wednesday at 112¼@112½; U. S. Five-twenties of 1862, 107¾@107⅞; U. S. Five-twenties of 1864 at 104⅝@104¾; U. S. Five-twenties of 1865 at 105½@105⅝; U. S. Five-twenties of 1865, consolidated, 107⅝@107¾; U. S. Five-twenties of 1867, 107⅝@107¾; U.S. Ten-forties at 101½@101¾, and U. S. Seven-thirties at 104⅝@104¾. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

December, 1864..1191/8	September, 1865..115¾
May, 1865 .....117⅛	October, 1865....115½
August, 1865....116¼	

Some 24 millions of 7-30s were converted through the U. S. Sub-Treasury, here, last week, making the aggregate conversions, since Oct. 15, nearly 70 millions.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Nov. 13.	Nov. 20.	Dec. 4.
Consols	94 9/16	94½	*93
U. S. 5-20's of 1862	70 5/8	70½	71⅜
Erie	47 1/8	46¾	47¼
Ill. Central	84¾	85¼	89¾

* Ex-dividend.

Railway and miscellaneous stocks have been moderately active. The demand has been almost wholly speculative. Prices have been worked to a higher range, generally. At the close, the market was buoyant for the leading street favorites. General business has been on a moderate scale.

There has been rather more call for produce. Breadstuffs closed buoyantly, in view of the probable immediate closing of the canals. Provisions have been held more firmly. Cotton has been freely offered and purchased, closing on the basis of 16 for middling uplands, per lb. The stock of cotton now here is estimated at about 44,500 bales. The receipts at the port this week, have averaged about 5,000 bales a day. The receipts during the cotton year, ending Sept. 1, 1867, were 657,431 bales, against exports of 470,596 bales. The receipts at all the shipping ports from Sept. 1, 1866, to Aug. 31, 1867, were 1,951,998 bales, against 2,154,476 bales the preceding cotton year; exports, 1,554,664 bales, against 1,557,054 bales the preceding year; estimated stock at close of the year, 80,296 bales against 253,000 bales same time last year. The receipts at all the ports, since Sept. 1, 1867, have been 436,000 bales, against 424,200 bales same time last year; exports, same time, 173,250 bales, against 154,300 bales same time last year; stock on hand at latest dates, 205,000 bales, against 370,000 bales same date last year. There has been increased firmness in the Live stock markets, this week, on less extensive offerings, and a rather better inquiry. Beeves ranged from 8@17c.; veal Calves, 8@12c.; Sheep, 3½@5½c.; lambs, 5@6½c., and Swine, 6¼@6¾ per lb., live weight. The week's receipts have been 4,248 beeves, 559 veal calves, 24,837 sheep and lambs, and 33,294 swine. In foreign merchandise there has been a restricted movement, though buyers in most instances have had any existing advantage. The total imports of foreign dry goods, last week, were $703,761, and the total amount marketed $784,746. The value of foreign merchandise imported last week, was $1,700,940—making the grand total specie value of last week's imports of dry goods and merchandise, $2,404,701, and since Jan. 1, 1867, $224,078,747, against $265,965,871 same time in the preceding fiscal year. The ocean freight market has been steady, but not active, since our last, with 452 vessels of all classes in port. For Liverpool we quote flour at 2s. 6d.@2s. 9d. per bbl.; grain at 8½d.@9d. per bushel; cotton at ¼d.@ 5/16d. per lb.; and heavy goods at 22s. 6d.@37s. 6d. per ton, all by sailing vessel.

The New York exports, exclusive of specie, for the week ending Dec. 3, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week	$3,480,885	$3,957,208
Prev. reported	171,903,027	171,093,613
Since January 1	$175,382,922	$175,050,821

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$902,839	$703,761
Gen. merchandise	2,024,841	1,700,940
Total for the week	$2,927,680	$2,404,701
Previously reported	263,038,191	221,674,046
Since January 1	$265,965,871	$224,078,747

The balance in the Sub-Treasury on Wednesday was $103,196,501 78.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ The following gentlemen have been elected directors of the La Crosse, Trempeleau and Prescott Railroad Company: D. M. Barney, Jesse Hoyt, A. H. Barney, C. W. Thompson, G. C. Fargo, Wm. B. Ogden, A. L. Pritchard, L. Holbrook and M. L. Sykes.

Railroad Earnings.--Weekly.

The earnings of the Chicago and Rock Island Railroad for the fourth week in Nov., 1867, were $82,800 00
Corresponding week of previous year.. 64,556 00

Increase $19,244 00

The earnings of the Chicago and Alton Railroad for the fourth week in November, 1867, were $103,702 00
Corresponding period previous year.. 87,531 00

Increase $16,171 00

The earnings of the Chicago and Northwestern Railroad for 4th week in Nov., 1867 .. $336,808 00
Corresponding week previous year .. 281,565 00

Increase $55,242 00

The earnings of the Detroit and Milwaukee Railroad for the week ending November 28, 1867, were $31,907 00
Corresponding week of 1866 ..... 30,063 00

Increase $1,844 00

The earnings of the Michigan Southern and Northern Indiana Road for the 4th week in Nov., 1867, were $115,131 00
Corresponding week of 1866 ..... 112,204 00

Increase $2,927 00

The earnings of the Marietta and Cincinnati Railroad the 3d week in Nov., 1867.. $32,249 00
Corresponding week previous year.... 24,298 00

Increase $7,951 00

The earnings of the Atlantic and Great Western Railway for the third week in Nov., 1867, were $117,152 00
Corresponding week previous year... 134,421 00

Decrease $17,269 00

The earnings of the Des Moines Valley Railroad for the third week in November, 1867, were $23,248 51; same time in 1866, $19,091 63; increase, $4,156 88.

The receipts of the St. Louis and Iron Mountain Railroad for the week ending Nov. 23, were $13,325 15.

☞ The Indianapolis, Cincinnati and Lafayette Railroad Company have a car fitted up especially for the accommodation of hunting and fishing parties. There are berths in it for sleeping, kitchen arrangements for cooking, &c. They switch the car off on a side track, convenient to the hunting or fishing grounds, as the case may be.

☞ The construction of another branch of the Erie Railway is said to be in contemplation. It is to start from the line of the Newburgh Branch about a mile from Newburgh, running to Canterbury, and thence to the Erie Railway at Turners. The people of New Windsor and Cornwall are anxious for its speedy construction.

☞ The Springfield *Republican* says that work at the Hoosac tunnel, relinquished by Messrs. Dull, Gowan and White, the contractors, will be immediately resumed by the State and pushed forward under the direction of the commissioners.

☞ It is contemplated to extend the Ottawa and Prescott Railroad from Ottawa, along the left bank of the river, up to Alymer, distance nine miles.

☞ The Tennessee Senate has passed a bill appropriating three and a half millions of dollars in aid of the State Railroads.

Louisville and Nashville Railroad.

We gave, last week, an abstract of the reports of the officers of this company for the fiscal year ending June 30, 1867. The following extract from the Report of ALBERT FINK, Esq., General Superintendent, has reference to the connections and extensions of the road:

Under this head reference was had in the last Annual Report (pages 45–53) to such of the projected lines of connecting roads and extensions as would greatly benefit the Louisville and Nashville Railroad, either by opening to it new channels of commerce, or by preventing the diversion of its present business.

Three of the most important enterprises then in contemplation have since been started, and are progressing toward completion.

THE BRIDGE OVER THE OHIO RIVER.

This work was commenced in the past month, and will be completed in the fall of 1869. Its completion will establish Louisville as the most favorable point for crossing the Ohio River for the vast trade and travel between the North and South, and Northeast and Southwest.

LOUISVILLE AND CINCINNATI RAILROAD.

This road is under contract for its entire length, and is expected to be finished in eighteen months. Its completion will secure to us a large amount of trade which now passes to the South over more northern routes, or by the river.

EXTENSION OF LEBANON BRANCH RAILROAD.

The wise policy which has heretofore guided the stockholders of the Louisville and Nashville Railroad and the City Council of Louisville, in extending their system of railroads to the Southeast, has placed Louisville in advance of competing cities, and made it comparatively easy to accomplish the great work of uniting, by the shortest possible lines of communication, the Northwest with the Southeast, a work projected more than thirty years ago, and ever since looked upon as a great desideratum.

At their last annual meeting the stockholders authorized the extension of the Lebanon Branch from Crab Orchard to the Tennessee State Line, and the City of Louisville subscribed one million of dollars to be applied to that work. The road is now under contract as far as London, forty-seven miles from Crab Orchard, and eight miles are already graded, ready for track laying, which will be commenced next month. The question can hardly be now raised whether the advantages already gained should be sacrificed and a rival interest permitted to overtake us; but a good deal of misapprehension seems to exist as regards the value of the extension to the Louisville and Nashville Railroad Company and to the City of Louisville.

It is contended by some that there was not sufficient business to justify the construction of this road. This argument is generally based on the supposition that the terminus of the road was to be in East Tennessee, and that no outlet would be gained there to the South and East. Were this really the case, it would indeed be better to sacrifice the large expenditures already made, and stop the construction of the road at once. But this supposition is entirely erroneous. As soon as the extension is completed, we shall have secured, by means of our connection with Norfolk, a route to the Atlantic coast, two hundred miles shorter than the distance to New York. Besides this, we shall form a connection, by way of Morristown and the French Broad River Railroad, with the whole railroad system of the Carolinas. The French Broad River Railroad is now completed for fifteen miles south of Morristown; the remaining part of the road, as far as Morgantown, is all under contract and partly graded. At Morgantown we meet the completed roads leading to Wilmington and Charleston. The liberal aid lately extended by the State of North Carolina to her railroads secures the completion of this important road in advance of the Blue Ridge Railroad, to which we have heretofore looked more particularly for a southern connection.

The advantage of these connections will be appreciated by all who are familiar with the immense amount of business now transacted over circuitous routes between the Northwest and Southeast (the sections of country which will be reached by the extension as soon as completed) by way of New York and Baltimore to Norfolk, Wilmington, Charleston and Savannah. There can be no doubt that, with the connections to Norfolk and Morgantown completed, the road to East Tennessee will command a large amount of freight and travel now necessarily passing around us for want of more direct communication.

The company has already expended a capital of $4,000,000 for one hundred and fifteen miles of road in the direction of East Tennessee, and in making a great through route of the Lebanon Branch, now a mere local line without sufficient business, this investment will be made to yield a larger revenue without additional expense, while the City of Louisville would become the distributing point for the business between the Northwest and Southeast, a business in which she has now no share.

Those who apprehend that the extension would not earn enough to keep up the road, should bear in mind that similar fears were entertained with regard to the Main Stem at the time of its construction, and that experience has shown them entirely without foundation. What a powerful instrument a railroad is in creating business may best be seen from a comparison of the freight earnings of the Main Stem, shortly after its completion, with the freight earnings for the last six months, as given in the following figures:

	1860.	1866.
January.....	$14,588 65	$107,839 51
February.....	15,644 20	108,087 51
March.....	25,838 70	*62,596 92
April.....	19,584 50	*72,791 72
May	23,329 25	86,962 45
June	19,813 75	66,251 11
	$118,999 05	$504,529 22

* Southern connection broken during these months.

From whatever point this question may be considered, there can be no doubt that the true interests, both of the company and the City of Louisville, demand the completion of the Lebanon Branch Extension with a view of forming a connection with the whole system of railroads in the Southeastern States.

MEMPHIS AND LOUISVILLE RAILROAD.

It has already been stated that since the 13th of August this line of road, consisting of one hundred and sixty-four miles of the Louisville and Nashville Railroad, eighty-two and a half miles of the Memphis, Clarksville and Louisville Railroad, and one hundred and thirty and a half miles of the Memphis and Ohio Railroad, has been to opened business from Louisville to Memphis.

The advantages which have been derived from this through connection have been estimated in another part of this Report. The results there given were, however, not obtained without some sacrifice on the part of the Louisville and Nashville Railroad.

The companies forming the two southern connecting links—one of which, the Memphis, Clarksville and Louisville Railroad, is in the hands of the State—did not possess sufficient means either to put their roads in thorough repair, or to operate the same in the most effective way, and in order to keep up the communication with Memphis, the Louisville and Nashville Railroad was compelled to advance money, and to furnish the greater portion of the rolling stock required for the operation of the line.

It will be remembered that, shortly after the close of the war, the Louisville and Nashville Company made a proposition to the Memphis, Clarksville and Louisville Railroad Company to

operate their road, to advance the money required to put it in good order, to furnish the necessary rolling stock, to pay the interest on the State bonds, and apply the net earnings of the road toward refunding the debt that might thus be created. The proposition farther provided for the return of the road to the stockholders should they at any time return the money advanced by the Louisville and Nashville Railroad.

It had been estimated that the value of the through connection with Memphis would justify this company in making so liberal an offer.

The managers of the Memphis, Clarksville and Louisville Railroad, guided somewhat by popular prejudices and the desire to operate their road as an independent line, rejected this proposition, and accepted instead the bonds of the State, permitting the road to pass into the hands of a receiver. The result has been as follows:

The indebtedness and stock liabilities of the road at the close of the war, including the interest due State accrued during the war, was, in round figures.	$2,900,000
It is now	4,000,000
Additional debt created since the war	$1,100,000

Before the proposition of the Louisville and Nashville Railroad was tendered, a careful estimate had been made by two competent engineers of the cost of putting the road in running order, and of supplying the necessary rolling stock, and the sum of $400,000 was deemed ample by them for that purpose. Had the proposition of the Louisville and Nashville Railroad been accepted, the indebtedness of that road would not have been increased above that amount, with perhaps the addition of the interest on State bonds since accrued, as the road does not pay more than operating expenses.

The additional debt created since the war is as follows:

Due to operatives and parties who have furnished supplies	$123,211 27
Due the U. S. Government for rolling stock and material	368,691 12
New loan from the State of Tennessee	500,000 00
Interest due the State since January 1, 1866	166,734 00
Total	$1,158,636 39
Add to this former indebtedness and stock liabilities	2,904,017 13
	$4,062,653 52

It will require not less than $500,000 to finish the road, making the total cost of the road—eighty-two and a half miles long—$4,562,653 52. The original cost of the road was $2,300,000.

The Memphis and Ohio Railroad, desirous to profit by the sad experience of the Memphis, Clarksville and Louisville Railroad under the management of the State, and under a separate organization, when it became apparent that they could not meet the July interest, made a proposition to the Louisville and Nashville Railroad, in which proposition the directors of the Memphis, Clarksville and Louisville Railroad joined, for a consolidation of the two roads with the Louisville and Nashville Railroad, as originally designed by the projectors of the three enterprises. That this consolidation, for which the charters of the three companies make ample provisions, must be beneficial to all parties interested, but particularly so at this time to the Memphis, Clarksville and Louisville and Memphis and Ohio Railroads, it is not necessary here to argue.

The proposition was referred to a committee of the directors of the Louisville and Nashville Railroad, who, although in favor of consolidation, could not, after ascertaining the liabilities of the two roads, recommend the assumption of their entire debt, which now greatly exceeds their value. The committee agreed, however, to a consolidation, provided that the liabilities could be reduced so as to represent the actual value of the roads. Should this prove impracticable, a lease for a period of years could then be resorted to.—

During the coming year one or the other plan will have to be carried out, otherwise these roads will have to be operated as mere local lines, as the Louisville and Nashville Railroad Company could not afford, in case the Memphis and Ohio Railroad should also pass into the hands of a receiver, to continue to advance money and furnish rolling stock without any prospects of ever being repaid; the State of Tennessee having failed to provide for the payment of debts created by the operation of a road under a receiver.

It is somewhat surprising that, notwithstanding the liberal policy which this company has pursued toward the two connecting roads in the State of Tennessee, enabling them to open and operate their roads, a thing which would have been utterly impossible without the friendly aid of the Louisville and Nashville Railroad, the opposition to measures calculated to benefit the interest of Tennessee comes solely from her citizens.

The various railroads of Tennessee are now indebted to the State, for interest due on the bonds, to the amount of $766,680. If any of these roads should be so fortunately situated as to make it to the interest of a connecting road to aid them, to put them in first-class order, and assume the payment of the State interest, should opposition to such measures come from sensible citizens of Tennessee? Can there be any real ground for such opposition? It seems to be altogether based upon the fear that the Louisville and Nashville Railroad might discriminate against the people of Tennessee in arranging the freight tariff. Certainly those who entertain such fears must be altogether ignorant of the principles upon which railroads conduct their business; and they do not, in this particular case, appear to appreciate the fact that the Louisville and Nashville Railroad Company, controlling, as it does, the northern outlet of their Tennessee connections, is already in position to discriminate against them, were it disposed so to do. But it is rather to the interest of the Louisville and Nashville Railroad Company to discriminate in favor of their Tennessee termini, because they are not only reached by competing lines of railroads, but also by the river; and if the Louisville and Nashville Railroad Company desires to do any business at all over their road, it must adjust its tariff with a view of meeting this competition. Besides all this, the laws of the State of Tennessee forbid all unjust discrimination, and consequently the consolidation of the Tennessee and Kentucky railroads, bringing the whole line within the scope of these laws, is the best safeguard against discrimination.

This matter has here been mentioned in order to call the attention of our Tennessee stockholders to the erroneous views entertained by any of their fellow-citizens, and to enable them to counteract, as much as possible, the injurious effects resulting from those views, both to the State and her railroads.

DECATUR AND MONTGOMERY RAILROAD.

Owing to the unsettled political condition of the Southern States, not much progress has been made toward the construction of this important connection, although favorable legislation has been secured in the State of Alabama.

The benefits of a more direct rail connection from Louisville to Montgomery, and from there to Pensacola and Mobile, are so great that whatever aid can be extended to the accomplishment of this enterprise should be freely granted.

CONCLUSION.

In bringing to the notice of the stockholders of the Louisville and Nashville Railroad, for the purpose of aiding and constructing such connections and extensions as an intimate acquaintance with the practical operation of the road, and a knowledge of the requirements of trade, have pointed out as either necessary to protect the capital already invested or to make it yield larger returns, it is not intended to suggest that all the different enterprises mentioned should be carried on at once. But, looking to the future, the fact should be borne in mind that the system of railroads centering in Louisville cannot be considered completed before our connections with Memphis are perfected, and the roads put in such condition as to meet the demands of a steadily increasing business, and before our connections with Montgomery, Pensacola, and Mobile, are made more direct by the construction of the Decatur and Montgomery Railroad, nor before our Lebanon Branch has been extended to meet the East Tennessee railroads, bringing us in direct connection with Norfolk, Wilmington, Charleston and Savannah. The Louisville and Nashville Railroad Company is now in a position to accomplish all this at no distant day. The net earnings of the road may confidently be expected to reach hereafter one million of dollars per annum; and should the company continue to pursue the liberal and enlightened policy of applying the surplus means to the improvement and perfection of her railroad system, instead of scattering them by a division, a considerable sum will be left from the yearly earnings, by means of which much could be effected toward the end in view. It is safe to predict that such a course, tending as it does to the development of the resources of the country traversed by our railroads, must ultimately prove the most advantageous one to the stockholders.

Portland and Ogdensburg Railroad.

The Vermont Legislature has granted a charter for a railroad through the Lamoille valley, and has also passed an act enabling towns along the line of the proposed road to subscribe for its construction. This legislation secures the construction of the Vermont link in the Portland and Ogdensburg line. At the Portland end of the route the surveys are in progress. Parties are reconnoitering the two routes from the foot of Sebago lake to Conway—one through Sebago and Denmark, the other through Hiram and Brownfield. The whole line is now chartered, and by another season it is expected that the work of construction will have been fairly commenced.

New York and Boston Air Line Railroad.

The New Haven *Journal* says that the fortunes of the Air Line Railroad are so prosperous that its speedy construction from New Haven to Willimantic is considered certain. Large capitalists in New York and Boston have taken hold of it, and with the subscriptions that will be obtained along the line, the money to build the road will be secured. Of course everything depends on the bridge over the Connecticut, but there is no doubt the Legislature will authorize that at an early day.

☞ A meeting was held at Northampton, Mass., on the 23d ult., to hear the report of the committee concerning measures to be taken to build the proposed railroad from Williamsburg to North Adams. The committee reported in favor of applying to the Legislature for an act giving the town a right to issue bonds to the amount of 5 per cent. of its taxable property in aid of the road, by which $300,000 would be raised. It is understood that the other towns along the line of the road intend to apply to the Legislature for leave to issue bonds.

☞ The Princeton, Ky., *Progress* says that the promised railroad from Elizabethtown to Paducah, which will pass through that town, is assuming a more cheering prospect. A party of engineers, employed by the company, arrived there on Saturday last, and on Monday commenced surveying the road. They express themselves as confident that work will be commenced immediately on the road.

Union Pacific.—Eastern Division.

The earnings of the Union Pacific Railroad, Kansas Branch, for October were $267,000, of which $81,000 were for Government business, and $186,000 for freight and passenger traffic. The working expenses of the company for the same time were $120,000 and the net proceeds $147,000. The road has been open for business since October 14th, to Fort Hays, 290 miles west of the Missouri River. The track is now laid to the three hundred and fifteenth mile post. The commissioner has just accepted another section of twenty miles, extending to the three hundred and fifth mile post.

Memphis and Little Rock Railroad.

The Land Agent of the Memphis and Little Rock Railroad has filed with the Commissioner of the General Land Office a map showing the line of the road, commencing at the town of Hopefield, on the Mississippi River, and running through the Counties of Crittenden, St. Frances, Monroe, Prairie and Pulaski to the side of Little Rock, with the six and fifteen miles limits laid down under the original act of February 9, 1863; and also the additional five miles limits, as provided for by the second section of the revising act, approved July 28, 1866.

☞ In the case of John du Bois *vs.* The Philadelphia, Wilmington and Baltimore Railroad Company—action to recover damages for infringement of his patent for placing heavy stones, plained in iron caissons, in deep waters, in the erection by defendant of thirteen piers used for sustaining the bridge over the Susquehanna River—the jury of the United States Circuit Court agreed on a verdict in favor of plaintiff for $10,000 damages. The case has occupied the attention of the Court, jury and counsel fifteen days, and consequently the costs will be heavy.

☞ The new Iron Bridge of the Lehigh and Susquhanna Railroad Company across the Delaware at Easton is completed. Its length is 1,038 feet, from the Pennsylvania to the Jersey shore. The distance from low water mark to the bottom cord is 40 feet; from low water mark to the rail, 64 feet. The weight of the bridge is about one and a quarter tons to the foot. Thirteen hundred tons of iron were used in its construction.

☞ The stock books of the Western Railroad Company were finally closed on the 30th ult. All transfers of stock, after that date, either of the Western or Boston and Worcester Railroad Corporations, will be made on the books of the Boston and Albany Railroad Company, at No. 16 Union Building, State street, Boston.

☞ The survey of the route of the New Orleans and Ohio Air-line Railroad has been commenced. The engineer party started from Mayfield last week.

☞ Arrangements are said to have been made for the construction of the Lake Superior and Mississippi River Railroad, and that in two years the work will probably be finished.

☞ The St. Paul *Pioneer* say that the iron has been purchased for the railroad between Hastings and Farmington, and that it will arrive and be laid early in the spring.

Denver and Pacific Railroad.

The Denver and Pacific Railroad Company was organized at Denver on the 20th ult., $225,000 of the capital stock having been subscribed. There was great enthusiasm on the subject, and an early connection with the Union Pacific Railroad has been determined on.

The following gentlemen were elected officers on the 25th ult.: Belam Hughes, President; Luther Kourtze, Vice President; D. H. Moffat, Treasurer; F. M. Case, Chief Engineer.

☞ The Northern Central Railroad Company is rebuilding four bridges between Shamokin and Sunbury, preparatory to the running of a through passenger line from New York.

☞ Trains on the Macon and Augusta Railroad commenced running to Milledgeville on the 26th ult.

☞ The cars are now running from Nashville to Trenton, eight miles from Hopkinsville, and the rails are being rapidly laid onward.

THE

National Trust Co.

OF THE CITY OF NEW YORK,

No. 330 BROADWAY.

CAPITAL,

ONE MILLION DOLLARS.

DARIUS R. MANGAM, President.

The National Trust Company receives the accounts of Banks, Bankers, Corporations and Individuals, and allows

FOUR PER CENT. INTEREST

On daily balances, subject to Check at sight.

Certificates payable on demand are issued at the same rate.

Special Deposits for one year or more may be made at five per cent.

FOR SALE,

IMMEDIATE DELIVERY,

Two first class 60 Passenger Saloon Cars, raised roofs, 4-8½ gauge broad tread Wheels.

GRICE & LONG,
1340 Beach Street,
Philadelphia.

Montgomery and Eufaula Railroad First Mortgage Eight per Cent. Gold Bonds.

Proposals will be received by the undersigned, at the Chatham National Bank, corner of Broadway and John street, for the purchase of $100,000 of the bonds of this company. These bonds are a first mortgage on the road of $12,000 per mile,

Principal and Interest Payable in Gold in this City.

and indorsed and guaranteed by the State of Alabama.

This road runs through the finest cotton region of the State, and the portion now finished is paying expenses and the interest on the bonds. On the completion it will connect with important roads forming the shortest and best line north and east from Montgomery. The debt of Alabama is comparatively small, and her interest promptly paid, which makes the security beyond a doubt.

Bids for all or any part of above will be received, the undersigned reserving the right to reject any or all of the bids. L. OWEN,
President M. & E. R. R. Co.

JERSEY CITY

LOCOMOTIVE WORKS FOR SALE.

THE WELL KNOWN LOCOMOTIVE WORKS AT Jersey City, known as the Jersey City Locomotive Works, comprising 24 full lots of lands, with substantial and well arranged buildings thereon, together with the machinery and tools, which are in excellent order, and of the best description, and capable of turning out 6 to 8 first class locomotives per month.

The character of the work turned out of the shops of this company is well known, and has a high reputation on most of the leading railroads in the United States. Adjoining and connected with these works are also offered for sale, 26 lots of grounds with the buildings thereon, and which, added to the property of the Jersey City Locomotive Works, make the whole one of the most desirable establishments for the manufacture of locomotive engines and other machinery in the country. The price and terms will be made highly favorable, as the parties interested are solicitous to close up the concern. Apply to

CHARLES KNEELAND, 49 William street.
W. G. HAMILTON, 21 Broadway.

500 MILES

OF THE

Union Pacific Railroad

Running West from Omaha

Across the Continent,

ARE NOW COMPLETED.

The Union Pacific Railroad Company have built a longer line of railroad in the last eighteen months than was ever built by any other company in the same time, and they will continue the work with the same energy until completed. The Western Division is being pushed rapidly eastward from Sacramento by the Central Pacific Company of California, and it is expected that

THE ENTIRE GRAND LINE

to the Pacific will be open for business in 1870. MORE THAN ONE-THIRD OF THE WORK HAS ALREADY BEEN DONE, MORE THAN ONE-THIRD OF THE WHOLE LINE IS NOW IN RUNNING ORDER, AND MORE LABORERS ARE NOW EMPLOYED UPON IT THAN EVER BEFORE. More than

Forty Million Dollars in Money

have already been expended by the two powerful companies that have undertaken the enterprise, and there is no lack of funds for its most vigorous prosecution.

The Union Pacific Company therefore offer their First Mortgage Bonds to the public with the assurance that they represent the largest and most valuable corporate property in the world. The first question asked by an investor is, "Are the bonds safe?"—the second, "Are they profitable?" To answer, in brief:

1. The early completion of the whole line is as certain as any future business event can be.

2. The Union Pacific Railroad bonds are issued upon what promises to be one of the most profitable lines of railroad in the country. For many years it must be the only line connecting the Atlantic and Pacific; and being without competition, it can maintain remunerative rates.

3. The net earnings of the sections already finished are *several times greater* than the gold interest upon the First Mortgage Bonds upon such sections, and if not another mile of the road were built, the part already completed

would not only pay interest and expenses, but be profitable to the Company.

4. The Union Pacific Railroad Bonds can be issued only as the road progresses, and therefore can never be in the market unless they represent a *bona fide* property.

5. Their amount is strictly limited by law to a sum equal to what is granted by the U. S. Government, and for which it takes a *second* lien as its security. This amount put upon the first 517 miles west from Omaha is only $16,000 per mile.

6. The fact that the U. S. Government considers a second lien upon the road a good investment, and that some of the shrewdest railroad builders of the country have already paid in five million dollars upon the stock (which is to them a third lien), may well inspire confidence in a first lien.

7. Although it is not claimed that there can be any better securities than Governments, there are parties who consider a first mortgage upon such a property as this the very best security in the world, and who sell their Governments to re-invest in these bonds—thus securing a greater interest.

8. As the Union Pacific Railroad bonds are offered for the present at 90 cents on the dollar and accrued interest, they are the cheapest security in the market, being more than 15 per cent. less than U. S. stocks.

9. At the current rate of premium on gold, they pay

OVER NINE PER CENT. INTEREST.

FIRST MORTGAGE BONDS whose principal is so amply provided for, and whose interest is so thoroughly secured, must be classed among the *safest* investments. They pay

SIX PER CENT. IN GOLD,

and are offered for the present at NINETY CENTS ON THE DOLLAR, and accrued interest at Six Per Cent. in Currency from July 1.

Subscriptions will be received in New York at the Company's Office, No. 20 Nassau street, and by

CONTINENTAL NATIONAL BANK, 7 Nassau st.,
CLARK DODGE & CO., Bankers, 51 Wall st.,
JOHN J. CISCO & SON, Bankers, 33 Wall st.,

and by the Company's advertised Agents throughout the United States. Remittances should be made in drafts or other funds par in New York, and the bonds will be sent free of charge by return express. A NEW PAMPHLET AND MAP, showing the Progress of the Work, Resources for Construction, and Value of Bonds, may be obtained at the Company's Offices or of its advertised Agents, or will be sent free on application.

JOHN J. CISCO, Treasurer, New York.

TO RAILROAD CAR BUILDERS AND OTHERS.

The undersigned, being the duly authorized Agent in the United States for the sale of **PEACOCK & BUCHAN'S CELEBRATED AND APPROVED PAINT COMPOSITIONS**, Nos. 1, 2, 3, and 4, solely manufactured in Southampton, England, invites the attention of Railroad car builders, owners and others to the PAINT COMPOSITION No. 3, IN ALL COLORS AND TINTS. It is hermetically soldered up in convenient sized tins of 7 lbs., 14 lbs., and 28 lbs. each, and warranted to keep good in any climate for many years. Being MIXED READY FOR IMMEDIATE USE, it will be found of great advantage, as it can be packed away like preserved meats, and will not deteriorate. It has been opened after TEN YEARS and found to be quite good and READY FOR USE. Being ground first on roller mills of polished granite, and then of burnished steel, by steam power, it is as fine as artist's color, and is applicable to the first-class Railroad Car, Counting House, or Drawing-Room, or the cabin of the yacht, steamer, or sailing ship—each tin forming a ready Paint Pot. It dries in a few hours, with a beautiful brilliant surface, without any stickiness or unpleasant smell, and stands longer than ordinary paint—never blistering, cracking, or flaking. IT IS GENERALLY ADOPTED BY THE CHIEF RAILWAY COMPANIES OF EUROPE, AND IS **CHEAPER AND BETTER THAN ANY OTHER** PAINT IN THE MARKET.

NEW YORK.

W. C. POTTER, Vice Pres't.
J. M. ALLEN, Sec. and Treas. LICENSES GRANTED

PLASTIC SLATE
FOR
Roofing & Other Purposes

The process of reconstructing Slate Stone from a disintegrated state was
PATENTED FEBRUARY 21ST, 1865.
It is a combination of
Pulverized Slate and Viscous Matter
(the latter possessing qualities of geological and chemical affinity for the former,) and is a development of one of the simple but unalterable tendencies of nature.

As a Roofing Material it Stands Unrivalled

A mastic—it adapts itself to every shape and slope. Non-combustible, impervious, non-expansive, and undecaying.

Frost does not Crack nor Heat Dissolve it.

The only roofing material ever discovered that will resist the action of the elements as long as the structure it protects. Being susceptible of little, if any wear, from exposure, and
Perfectly Fire-Proof,
It is unequalled as a coating for Railroad and Farm Buildings, Fences, Bridges, bottoms of Vessels, Vaults, etc.

ENGINEERING WORKS.

ENGINEER'S FIELD BOOK,
By C. S. CROSS, Civil Engineer.

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent **free by mail,** upon receipt of the price. For sale at this office, Price **$1.50.**

LYONS' TABLES.
To Civil Engineers and Contractors.

FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

SHEET No.				SHEET No			
1.	General Table for all Bases and all Slopes.			13.	for Base 18 ft. Slop.		1½ to 1
2.	For Side Hill Cuts and Fills.			14.	" " 20 "	"	1½ to 1
3.	Base 12 ft. Slopes	1½	to 1	15.	" " 24 "	"	1½ to 1
4.	" 14 " "	1½	to 1	16.	" " 24 "	"	1½ to 1
5.	" 15 " "	¼	to 1	17.	" " 25 "	"	1½ to 1

American Railroad Journal.

New York, Saturday, December 14, 1867.

Union Pacific Railroad.

We can hardly keep up with the progress of this road. Three weeks ago we read of 400 and some miles completed, then of 500, and now we are told that the base of the Rocky Mountains, *Five Hundred and Twenty-five miles from Omaha*, has been reached. But this is not all, even for this year. To the summit of the Black Hills (the easterly ridge of the Rocky Mountain range) is but 30 miles further, and this point, the highest on the whole line, is expected to be the halting-place for a railway train in a few weeks more. The vigor with which this great national undertaking is being pushed forward is one of the wonders even of this wonderful age. Over the plains—across the rivers—up the mountain slopes, and through the defiles beyond, the same restless energy urges on the work, leaving us no reason to doubt that the Pacific Ocean will be united with the Atlantic by rail in 1870.

All these great achievements cost money, and a great deal of it. Over forty million dollars have already been expended on the two ends of the line, and yet funds have never been lacking. With directors of great energy and financial experience, supported by a wealthy and powerful corporation, it is no wonder that "the work goes bravely on." But still, if Uncle Sam had not put his shoulder to the wheel, opened up his purse, and offered his broad acres, the locomotive would not have whistled at Brigham Young for a long time to come. But Uncle Sam's great farm of half a continent needed a road through it—his Indians needed a touch of railroad civilization to keep them peaceable, and it was very necessary that he should open those great and rich mountain pockets so full of gold, which nothing but a steam engine could unbutton. It seems wise, therefore, that he should lend fifty million dollars, and give even twenty million acres of land, which would otherwise be worthless, to improve his own property, and take a second mortgage on the greatest railroad in the world for security, especially when his own freight bills for work done, at a quarter of the old prices, more than pay the interest. But profitable as the investment is to the country, it gives remarkable safety and value to the company's own First Mortgage bonds. The Government *stands behind them*, and gives them such a guarantee as it never gave to the securities of any private enterprise. We never desire to recommend anything beyond its actual merit, but we think that any one who has a thousand dollars to invest, would do well to call upon the Union Pacific Railroad Company's agent, or write to their office, No. 20 Nassau street, New York, for a very interesting pamphlet, containing a map of the line, and a full statement in relation to the progress of this great national enterprise.

Virginia Central Railroad.

The Council of Richmond have decided to open a poll, under Gen'l Scofield's order, on the 31st of December, to take the sense of the qualified voters of the city on the appropriation of two millions of dollars to the completion of the Chesapeake and Ohio Railroad, on condition that the Virginia Central Railroad Company should bind itself to construct the short line road to Charlottesville, and that the bonds of the city issued for the appropriation shall not be sold at a discount of more than ten per cent. The distance from Richmond to Charlottesville by the Virginia Central is ninety-seven miles. By the proposed short line it will be sixty-seven miles.

Chesapeake and Ohio Railroad.

At the recent meeting of the stockholders of the Virginia Central Railroad Co., a resolution was adopted instructing the company to contract for the completion of the Chesapeake and Ohio Railroad as soon as three and a half millions of dollars in county bonds are subscribed. The bonds are to be sold at a discount of not more than ten per cent. The subscription will in all probability be taken, and the work pushed rapidly forward.

Mississippi Central Railroad.

The earnings of this road for the fiscal years ending August 31, 1866 and 1867, have been as follows:

	1866.	1867.
From passengers	$187,480 23	$539,667 09
" freight	307,788 94	438,306 93
" U. S. mail	19,071 53	23,700 00
" News agency	450 00	1,100 00
	$604,790 70	$1,002,774 02
Expenses, viz:		
Conducting transp	$74,874 23	$115,707 16
Maintenance of way	97,901 77	150,139 80
Motive power	61,743 07	131,541 87
Maintenance of cars	10,867 11	43,174 41
Loss and damage	18 037 29	26,883 46
Expense account	4,695 81	5,396 01

Extraordinary exp	607,354 48	412,240 24
	$915,142 61	$975,309 79
Excess of earnings	.....	$27,464 23
Excess of expenses	$310,351 91	.....

The gross receipts for the year ending August 31, 1867, compared with those of the preceding year, show an increase of $397,983 32; with an increase in expenditures of $60,167 18—a gain of $237,816 14.

The ordinary expenses for conducting the operations of the company, in 1865-'66, as given above, were $307,788 13; and in 1866-'67, $563,069 55—an increase of $255,281 42. The earnings less ordinary expenses, in the former year were $297,002 57; and in the latter year, $439,704 47—a gain of $142,701 90. The ordinary expenses during the past year were about 56 per

cent. of the gross earnings. The extraordinary expenses were as follows:

Roadway	$88,210 84
Bridges	56,253 17
Cross-ties	60,801 98
Depots and section houses	20,093 96
Iron rails	2,264 07
Machine shop	9,881 78
New buildings	23.677 04
Rolling stock	98,152 45
Turn tables	722 25
Rebuilding engines and materials	52,682 70
Total, as above	$412,240 24

At the commencement of the fiscal year 1865–'66, owing to the destruction of the bridge over the Yallabusha river, the road was being operated in two divisions between Abbeville and Canton. Trains were run only as far north as Abbeville, with a transfer of both freight and passengers at Grenada. On the 20th of September following, the bridges were completed to Holly Springs, and trains commenced running in connection with a line of hacks to the Memphis and Charleston Railroad at La Fayette. On the 15th of November the road was opened to Grand Junction, and a close connection made with the Memphis and Charleston Railroad. On the 8th of January, 1866, the large bridge over the Yallabusha was completed, and the road operated as one line to Bolivar. On the 18th of May the Jackson depot was reached, and a connection made with the Mobile and Ohio Railroad at their depot on the 17th of June—showing but 76 days of the fiscal year 1865–'66 during which a through business was done. At the commencement of the year the company had only 8 locomotives, 16 passenger and baggage and 70 freight cars; at its close there were in good running order 19 locomotives, 22 passenger and baggage and 194 freight cars. The report of the Superintendent shows that during that year there were rebuilt nearly two-thirds of the entire amount of the bridges of the road; one-third of all the cross ties were renewed; one and a half mile of side track relaid; and twenty section buildings, two office buildings, five depots, one store house, three cotton platforms, three turntables, seven water stations, and a machine shop erected. In addition to the dilapidated condition of the road, and the scarcity of equipment, the company were indebted in the sum of $1,589,-069 88, past due, with an additional amount soon to mature, and a large sum to be raised on account of reconstruction. Of the indebtedness, $1,115,400 were retired with the second mortgage bonds of the company, and arrangements were made to settle the major part of the remainder in the same way. During the year $353,450 of income bonds were surrendered, leaving $87,550 unredeemed. $24,000 of the M. C. & T. R. R. bonds were also retired, leaving a balance of $71,000. Subsequently, $22,000 additional were funded, also $4,161 83 of the company's 1st mortgage bonds, and $7,202 15 of circulation. Interest on bonds, etc., to the amount of $675,060 76 was also arranged. A balance sheet is annexed showing the financial condition of the company at the close of the past and preceding years. In his report to the stockholders under date October 15, 1867, the President says:

The Report of E. D. Frost, your General Superintendent, is herewith submitted with accompanying documents. He states the gratifying fact that the expenditures for the current year on account of reconstruction will be light in comparison with the above, as we now have a track and road-bed approaching, very nearly in condition, that which we had 1861. He has reduced the operatives to the lowest number consistent with prudence, thereby saving much to the company. He has laid two miles of new rails. All of his bridges are reported safe, and can be kept in good condition with a small force.

He reports the following rolling stock in good order: 19 passenger coaches; 9 mail, express, and baggage cars; 212 freight cars.

He has rebuilt 39 flat cars and 5 coaches, using so much of the materials remaining of the cars and coaches destroyed during the war as was applicable to this purpose, leaving on hand yet a large amount of similar materials, and thinks the facilities which will be afforded by the new car shop will enable us to keep up and increase our stock as the wants of our business may demand. He reports 26 engines as having been repaired and 10 yet to be repaired, which, with the additional machinery purchased, can be put in order as business may require.

On account of interest the Secretary reports having arranged during the fiscal year $325,565 31, of which $90,000 was paid on our February and May coupons of current year, $60,000 of the State of Tennessee, and the remainder on other claims.

He reports the indebtedness of the company as follows:

First mortgage bonds	$1,246,000 00
Second "	1,517,600 00
Bonds M. C. & T. R. R. Co	28,000 00
State of Tennessee	1,078,980 00
Bills payable	527,643 66
Open accounts and pay rolls	251,485 40
Making a funded and float'g debt of	$4,649,709 06

It will be observed that the indebtedness to the State of Tennessee has been increased one hundred and fifty thousand dollars since your last report, by an additional loan of its bonds, at the last session of Legislature. This further act of liberality on the part of that State has greatly aided our operations, by enabling us to negotiate an important loan, through the hypothecation of these unquestionable securities. He reports the following assets on hand:

Tennessee State bonds	$476,000 00
Cash, bills receivable, and other available assets	151,573 50
In addition to which we have our first mortgage bonds	104,000 00
In addition to which we have our second mortgage bonds	482,400 00
Total	$1,113,973 50

It will be seen by his report that of the income bonds, and bonds issued by the M. C. & T. R. R. Co., before consolidation, there are only $28,000 outstanding. At the date of our last annual report, it was estimated that about $150,000 would cover the amount necessary to be expended in reconstruction to this date. But it soon became apparent that more extensive repairs were absolutely necessary, and that our motive power and rolling stock must be increased to meet the demands of business. Consequently it has been found necessary to expend a much larger sum, and instead of $150,000, we have been forced to expend $412,240, being $260,000 in excess of our estimates. If this necessity had not existed, we should have been able to meet promptly the interest obligations we had assumed. Prompted by a desire to resume the payment of interest on our funded debt at as early a day as practicable, we have taken a step in advance of many other corporations in the South by appointing the month of February last for that purpose.

In doing this we failed to estimate properly the magnitude of the task before us, and failure is the result. In estimating the amount necessary to be expended, in order to put our road in good condition in 1865, we thought $500,000 would be sufficient. Instead of this we have expended $1,020,-000, and do not think any part of it could have been avoided and the safety of your property and the lives of passengers secured. To some it was apparent we were undertaking too much, and suggestions were made that we put off the payment of interest at least another year, but the counsels of the more hopeful ruled, and the result is before us. The political condition of our country; the impoverished state of our people; the total disruption and disorganization of our labor system, have together constituted a heavy drawback upon our business and credit, and should be considered in connection with the extraordinary repairs required as set forth above.

In addition to these causes for the diminished receipts of the past six months, we have had to contend with the effects of epidemics, those terrible scourges which appal the stontest heart. The one now raging in New Orleans has for months paralyzed our through business, and the one recently developed in Memphis has greatly diminished travel in that direction, and as a consequence also the transportation of freights.

The annual return travel South has not yet set in, nor will it resumed until the entire cessation of the yellow fever. It is safe to estimate the monthly reduction from this cause alone at $30,-000. To those who appreciate these facts, and remember that we are not responsible for their existence, it will not appear strange that we should again be forced to ask at the hands of our creditors a repetition of that leniency which has recently distinguished their course towards us.

* * * * * *

We therefore recommend the propriety of an immediate proposition to the bondholders, as follows:

The first mortgage bondholders to hold up the coupons of November and May next until the 1st February, 1871, and the company to pay interest on said coupons semi-annually.

The second mortgage bondholders to hold up all coupons, commencing with those of August last, and including those to mature in August, 1870, until 1st February, 1871, the company paying semi-annually on said coupons a like interest as paid on first mortgage coupons.

In consequence of the limited crop of cotton taken to market during the last fiscal year over this road, our freight receipts since March last, have been very light. The crop of the present season, which must reach a market through our instrumentality, is estimated at double that of last. But as all estimates for future expenditures should be based upon reliable data, we will take the receipts of the past year as our guide for the present.

We estimate the gross earnings at per annum; and the cost of operating and other indispensable repairs at	$1,000,000	600,000
Leaving annually applicable to other purposes		$400,000
This annual surplus would make by the date at which we propose interest payments, say 1st February, 1871, the sum of		$1,400,000
During which time the following items of interest would become due:		
On first mortgage bonds	$300,000	
On second " "	420,000	
On Tennessee "	210,000	
On floating debt "	140,000	
		1,070,000
Leaving a balance of		$330,000

to meet the first batch of our first mortgage bonds which will become due on 1st November, 1869.

In addition to the above amount of $330,000 we have as previously stated

Tennessee bonds	$376,000
First mortgage bonds	104,000
Second mortgage bonds	482,000
	$962,000

to enable us to discharge our floating debt, and the interest on our coupon interest extended as proposed. We have shown that even upon these estimated low receipts during the ensuing three and a half years, we shall discharge all obligations maturing within that period. We have every reason to believe that our receipts are under estimated and will exceed our figures.

The mail pay, in consequence of double daily service during the ensuing year, will be fifty per cent. larger than the past.

We respectfully recommend a second application to the legislature of this State for an amendment to our charter, conforming the same to the stipulations of an agreement entered into with the holders of our bonds, securing to them a voice in the election of your directory and the general administration of the affairs of the company.

We think this due those who invested their means in our bonds, as it will insure them power adequate to the protection of a common interest, to be exercised in conjunction with yourselves for the mutual benefit of both parties. We also recommend to the convention the appointment of a committee of investigation from their own body, and the adoption of resolutions inviting the bondholders to appoint a like committee, to whom shall be offered every facility for a thorough examination of the road and its property, together with all books and papers of the company.

The proposition to extend your road North from its present Northern terminus at Jackson, Tenn., by a connection with the N. O. & O. R. R. Co., to Paducah, Ky., is one the importance of which cannot be over estimated. Surveys are now being made, or will soon be commenced, and when finished no time should be lost in the completion of this most desirable and important work, as we shall then present an air line route from the Gulf of Mexico in an almost due northwardly direction five hundred and forty-eight miles in length to the Ohio River, where the same can be bridged. At that point we are at once placed in communication by rail to Louisville on the right hand, Vincennes on the north, and St. Louis on the left by existing roads and lines already commenced or in contemplation. A main trunk line like this need fear no competition, passing as it will over the most direct route to its termini, and must transport the varied products of the semi-tropics and the frozen North.

Its present connections are important, and each additional tributary must increase the stream destined to pass over it in either direction. An examination of the map will convince all that it must become an unrivalled route. Beginning at New Orleans, the great emporium and *entrepot* of the South (at which point it will receive or discharge the travel and trade of Texas, which is destined to become a great country,) it passes north to Jackson, Miss., there it is crossed by the Vicksburg and Meridian Railroad, which becomes a feeder through the Mississippi River on the one hand, and the rich country stretching east on the other through Meridian to the State of Alabama. At Grenada the M. & T. R. R. delivers its tribute direct from Memphis to this Grand Trunk.

At Grand Junction the Memphis and Charleston Railroad crosses our pathway, affording passengers an outlet to the Mississippi at Memphis on the left, and to the East Tennessee and Virginia Line of railroads on the right. Thence continuing its route it reaches Jackson, Tennessee, where it connects with the Mobile and Ohio Railroad to Columbus, Ky., or the Memphis and Ohio Railroad for Nashville and Louisville. When, however, the line to Paducah shall be completed the traveller will be taken from New Orleans to Paducah without change of cars; and the distance from New Orleans to Louisville and Nashville diminished. Such a line must attract the attention of capitalists, and result in the desired settlement of a country now but sparsely peopled, abounding in all the elements necessary to secure the success of the husbandman, with a fertile soil, not surpassed by any in the South; it invites, and must eventually secure settlers. Already manufactories are springing up on the line at Wesson, Jackson, Miss., Bankston, Carrolton, Water Valley, Bolivar and Jackson, Tenn., and others in contemplation, but restrained for the present by the political aspect of the country.

When the clouds now lowering over us shall have disappeared, we have a right to look for the opening of a bright future for our road. Let us then discard all sectional differences and together resolve that we will not mar the prospect before us. With one will and one purpose let us work harmoniously, and we shall succeed in accomplishing what an opposite course will assuredly defeat.

The company have 36 locomotives, 10 of which need rebuilding; 19 passenger, 9 express, mail and baggage, 1 wrecking, 2 stock, 127 box, 83 platform, 29 hand and 8 hurdle cars. Miles run by locomotives during the year, 429,653. Do. by passenger cars, 815,486. Do. by all cars, 1,271,091. Number of passengers carried north, 57,395; do., south, 54,292—total, 111,687. No. of bales of cotton forwarded, 53,577.

BALANCE SHEET, AUGUST 31.

President.—A. M. WEST.

Directors.—A. M. West, J. B. Fant, T. J. Malone, A. H. Pegues, Jas. Brown, C. M. Vaiden, Jno. A. Binford, B. T. Owen, L. Q. C. Lamar, R. P. Neely, John J. Polk, Wm. H. Stephens, Hugh Torrance. By the Governor, Thomas Boyle, C. H. Anderson, Wm. J. Smith.

Gen'l Superintendent.—E. D. FROST.

Secretary.—A. J. MCCONNICO.

Treasurer.—T. N. WENDEL.

Finances of Indiana.

The Treasurer of the State of Indiana in his report for the fiscal year ending October 31, 1867, states that the balance in the Treasury from the previous year was $390,380 14; receipts during the fiscal year, $4,210,366 44; total, $4,600,716 78. Disbursements during the fiscal year, $4,446,691 09; Treasurer's balance, $151,025 49. Orders outstanding and unpaid, $867,270; Auditor's balance, $145,352 79.

The funded interest bearing debt of the State is as follows:

Stock bearing five per cent. interest, $4,525,719 33; war loan bonds bearing six per cent. interest, $395,000; Vincennes University bonds, bearing six per cent. interest, $66,585.

A considerable portion of this debt is held by the State, making a reduction in the amount, for which the State is liable, as follows, viz:

Five per cent. bonds held by the State Debt Sinking Fund Board, $771,483; two and a half per cent. bonds, held by the State Sinking Fund Board, $96,900; total outstanding debt, $4,118,921 83. Of the latter, the State holds in trust for the Common School Fund as follows, viz: Five per cent. stock, $734,000. Total debt, exclusive of the amount held by the State, $3,961,187 33.

The Public Debt.

The following is a comparative statement of the Public Debt of the United States November 1, and December 1, 1867:

	Nov. 1, 1867.	Dec. 1, 1867
DEBT BEARING COIN INTEREST.		
Five per cent. bonds	$198,845,350.00	$205,552,850.00
Six per cent. bonds of 1867 and 1868	14,690,941.80	14,690,941.80
Six per cent. bonds of 1881	283,676,600.00	282,731,550.00
Six per. cent. Five-twenty bonds	1,267,898,100.00	1,324,412,550.00
Navy pension fund	13,000,000.00	13,000,000.00
Total	$1,778,110,991.80	$1,840,367,891.80
DEBT BEARING CURRENCY INTEREST.		
Six per cent. bonds	$18,042,000.00	$18,601,000.00
Three-year compound interest notes	62,558,940.00	62,249,360.00
Three-year seven-thirty notes	334,607,700.00	285,587,100.00
Three per cent. certificates	11,560,000.00	12,855,000.00
Total	$426,768,640.00	$379,292,460.00
MATURED DEBT NOT PRESENTED FOR PAYMENT.		
Three years Seven-thirty notes, due Aug. 15, 1867	$3,371,100.00	$2,855,400.00
Compound interest notes matured June 10th, July 15, Aug. 15, and Oct. 15, '67	9,316,100.00	7,965,750.00
Bonds of Texas indemnity	262,000.00	260,000.00
Treasury notes, acts July 17, 1861, and prior thereto	163,661.64	163,011.64
Bonds, April 15, 1842	54,061.64	54,061.64
Treasury notes, March 3, 1863	868,240.00	868,240.00
Temporary loan	4,168,375.55	2,880,900.55
Certificates of indebtedness	34,000.00	31,000.00
Total	$18,237,538.83	$14,178,363.83
DEBT BEARING NO INTEREST.		
United States notes	$357,164,844.00	$356,212,473.00
Fractional currency	30,706,433.39	30,929,984.05
Gold certificates of deposit	14,514,200.00	18,401,400.00
Total	$402,385,677.39	$405,543,857.05
Total debt	$2 625,502,848.02	$2,639,382,572.68
AMOUNT IN THE TREASURY.		
Coin	$111,540,317.35	$100,690,645.69
Currency	22,458,080.67	37,486,175.24
Total	$133,998,398.02	$138,176,820.93
Amount of debt less cash in the Treasury	$2,491,504,450.00	$2,501,205,751.75

By comparing this with the statement of November 1, it is shown that the debt bearing coin interest has increased $62,256,900; the debt bearing currency interest has decreased $47,476,180; the matured debt not presented for payment has decreased $4,059,175; and the debt bearing no interest has increased $3,158,179 66—making the increase in the total debt since November 1, 1867, $13,879,724 66. The amount of coin in the Treasury during the same period has decreased $10,849,671 66, and the amount of currency has increased $15,028,094 57—leaving the amount of debt less cash in the Treasury on December 1, $9,701,301 75 more than on November 1.

American Railroad Journal.

Saturday, December 14, 1867.

Stock Exchange and Money Market.

Money has been in better supply on call, particularly within a day or two, and rates have shown some relaxation with the promise of a further increase of ease. The demand has not kept pace with the available offerings. The closing figures were 6@7 per cent., in a temporary form. On Wednesday afternoon, lenders seemed quite eager to place their balances at the ruling quotations. One prominent Government house had round sums advanced at as low a price as 5 per cent.; but this was altogether an exception figure. The contraction bug-bear is at an end for the present. Less than a million in legal tender notes was withdrawn from circulation in November; and the bulk of this consisted of mutilated and worn out bills. On Saturday, a resolution was adopted by the National House of Representatives, authorizing the stoppage of contraction for the present. This resolution harmonized with the expressive determination of Secretary McCulloch, who had theretofore concluded to make no further withdrawals of greenbacks, for some time to come. It is now believed that the new 3 per cent. legal tender certificates, (of which $12,855,000 had been issued up to Dec. 1,) available, the same as common greenbacks, to the banking movement of the country, will be substituted for the whole of the Compound Interest notes falling due between December, 1867, and on to September, 1868. The aggregate greenback circulation on the 1st inst., was $356,272,473. The outstanding Compound Notes amounted to $62,-249,360. The discount market shows less stringency, and prime to good paper is in more request at from 7@9 per cent. per annum. No further failures of moment have been noted in the mercantile line. The cash balances in the National Treasury on the 1st inst., reached $138,-176,820, including $100,690,646 in coin, and $37,-486,175 in currency. On the 1st of November, the coin in the Treasury amounted to $111,540,-317, and the currency to $22,458,081—making an aggregate cash reserve of $133,998,398. The U. S. Sub-Treasury in this city reduced its balances last week, some two and a half millions. Half a million of greenbacks were added to the reserve of the city banks, during the week. A loss of three-fourths of a million of specie and deposits, respectively, was reported by the banks, for the week.

The specie reserve of the city banks is now $15,805,254, against $14,582,050 same time last year. The city bank deposits are now $174,926,-355, against $203,676,822 week ending Dec. 7, 1866. The legal tender reserve amounts to $52,595,450, against $60,946,857 same time last year. The circulation now stands at $34,092,202, against $31,794,653 same time last year. The loans are now $247,450,084, against $260,020,027 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $78,826,153 a day, against a daily average of $86,-548,452 the preceding week, and $96,667,084 the week ending with Nov. 23. The current week's exchanges average about $71,903,000 a day. The city banks, last week, gained $497,318 of legal tender, while they lost $767,636 of specie, and $759,878 of deposits. They reduced their loans, $365,425; and their circulation, $11,410.

The Philadelphia Bank movement the past week shows a decrease in loans, of $242,213; a decrease of $12,030 in specie; a decrease in legal tenders of $140,616; an increase of $169,691 in deposits; and a decrease of $515 in circulation. The Bank Clearings show an increase of $9,195,277, and the balances, an increase of $1,-350,758.

National Bank notes to the amount of $321,-700 were issued last week, making the total issue to 1,678 banks thus far, $305,037,691, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $5,314,535, leaving, with the existing 1,639 banks, (having an aggregate capital of $424,894,861,) an actual circulation at this date, of $299,723,146. The United States bonds held by Treasurer Spinner in trust for National Banks as

security for circulating notes amount to $340,982,750; and for the public deposits, $38,018,950—making a total of $379,001,700. The Treasury Department last week redeemed and destroyed $459,000 of worn and mutilated fractional currency, and issued $505,500 of new.

The U. S. Sub-Treasury receipts, week ending with Dec. 7, were $38,446,544, including $1,513,528 from customs duties; payments, $36,029,049, including $831,000 of coin interest; balance at the close of the week, $107,055,983, against $104,628,488, at the close of the preceding week, showing a decrease of $2,427,495. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $2,944,908 including $229,309 from customs; and payments, $2,714,824; on Tuesday, receipts, $1,093,074 including $180,001 from customs, and payments, $2,019,168. The balance at the close of business on Tuesday stood at $103,932,475, against $105,493,092 a week previous; and $107,995,960 on Dec. 1.

The aggregate issue of coin certificates by the U. S. Sub-Treasury, in this city, up to the close of November, was $232,690,800; aggregate redemptions, $201,927,000; leaving outstanding certificates to the amount of $30,763,800.

Government revenues have been more liberal, since our last, in the excise form, but have been quite light in the customs line. The excises, last week, yielded $6,672,856, against $3,045,000, the preceding week; customs at the port of New York $1,513,528, and at the outports, about $500,000 (in coin) more, making the grand total income for the week equal about $9,442,000 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with July 30, 1867, were $265,920,474, against $310,906,984 the preceding fiscal year; and $211,129,529 fiscal year ending with June 30, 1865. The receipts thus far in the new fiscal year, which began on the 1st of July, have been $91,763,617.

Government received $6,767,381 from customs, through the port of San Francisco, from Jan. 1, to Nov. 4, 1867.

A decided break has occurred in Gold, since our last, under a strong pressure to realize, largely on short account, in view of the harmony between Congress and Secretary McCulloch, and of the unusually heavy impending coin disbursements from the National Treasury, which, by the opening of the new year, will reach nearly thirty-one million dollars, as follows:

Principal of the loan of 1847–'67	$6,670,000
Three per cent. interest thereon	190,100
Three per cent. on $8,200,942, 6s of '68	246,030
Three per cent. on $282,731,550, 6s of 1881	8,481,946
Three per cent. on $489,761,000 Consolidated 5-20s 1865–'67	14,692,830
Two and a half per cent. on $27,022,000 5s of 1871–'74	675,550

There has been very great reluctance to purchase, on speculative account. Indeed most of the *bulls* of the street have become *bears*, and under their manipulations, a further material decline is looked for. The sales of the week have been made all the way down from 137⅞ to 134⅝, a fall of over three per cent. The Government is not now a seller of gold. The speculation is sinking, from its own intrinsic heaviness. The customs demand has been quite li ht. The export inquiry has been rather more active, superinduced by the recent rise in foreign exchange. On Wednesday, the specie exports amounted to $608,030. The latest quotation was 134⅝. The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1867, have been $3,032,610, against $9,421,903 same time last year. The customs demand for Gold last week, averaged $252,254 a day; thus far, this week, it has been equal to $204,655 a day, or equal to a weekly aggregate of $1,227,930. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $4,387, and from California, $671,447. The total customs revenue of the Government, in coin, at this port, thus far in the current calendar year commencing with Jan. 1, 1867, has been $113,105,400, against $125,963,017 same time in the preceding fiscal year. The total receipts of California gold at this port since Jan. 1, 1867, have been $26,485,800, against $39,431,392 same time last year, showing a decrease this year, of $12,945,592. The exports of specie from this port, last week, were $327,575. The total outflow of specie from the port, since Jan. 1, 1867, has been $45,388,574, against $59,149,044 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $831,000, making the total coin interest disbursements through the Government office, since Jan. 1, 1867, $61,263,595, against $47,513,371 for the preceding calendar year. The specie exports from San Francisco, from Jan. 1, to Nov. 7, reached $35,090,814, against $39,370,856 same time last year, showing a decrease, in 1867, of $4,280,042.

Foreign Exchange was advanced in price early in the week, but transactions were on a restricted scale, and the market closed tamely, with a tendency rather favorable to purchasers. Bankers' 60 day bills on London closed at 109⅜@109¾, and on Paris to 5.16¼@5.15; sight bills on London to 109⅞@110¼ and on Paris to 5.13¾@5.12½. The offerings of produce bills have been rather more liberal this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $4,628,013, making the total value of exports since Jan. 1, 1867, $180,194,751, against $179,678,834 same time in the preceding year.

Government securities have been rather variable in price, during the week, but the closing figures show no very marked changes. Trade has been comparatively light. Some foreign houses have been sellers of bonds to arrive, but these offerings have been promptly taken at the going rates. Toward the close, the investment demand improved, and rather more strength was noted in the market, particularly for the six per cent. coin bearing bonds. The last public debt statement shows the following changes for the month of November: Increase in ten-forties, $6,707,500; increase in five-twenties, $56,514,250; decrease of seven-thirties, $49,020,600; decrease of compound notes over-due, $2,250,250; decrease of temporary loan, over-due, $1,287,475; decrease of United States notes, $952,371; increase in gold certificates, $3,887,200; decrease of coin on hand, $10,849,672; increase in currency on hand, $15,028,695; total debt, $9,701,801. U.S. sixes of 1881 closed here on Wednesday at 112⅛@112¾; U. S. Five-twenties of 1862, 107¾@107⅞; U. S. Five-twenties of 1864 at 104¾@104⅞; U. S. Five-twenties of 1865 at 105¼@105½; U. S. Five-twenties of 1865, consolidated, 107⅝@107¾; U. S. Five-twenties of 1867, 107¾@107⅞; U.S. Ten-forties at 101⅛@101¼, and U. S. Seven-thirties at 104⅞@105. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

December, 1864..119¼	September, 1865..115¾
May, 1865 .....117⅛	October, 1865....115½
August, 1865....116¼	

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Nov. 20.	Dec. 4.	Dec. 10.
Consols	94½	*93	92 13/16
U. S. 5-20's of 1862	70½	71 3/16	71 9/16
Erie	46¾	47¾	47¾
Ill. Central	85¼	89¾	89

* Ex-dividend.

Railway and miscellaneons stocks have been in more active speculative demand and have been bouyant in price, particularly since Monday. The suspension of contraction seems to give increased confidence to the operators for a rise.

On Wednesday, a broker received and executed an order to sell *short*, 3,000 shares of Pacific Mail Stock. The order purported to have been from a responsible source, but it proved to have been a forgery. A committee of the Regular Board was appointed to investigate the matter. A reward for the detection of the forger was in contemplation.

General business has been decidedly dull, since our last. Breadstuffs closed in favor of buyers. Provisions left off firmly. Cotton fell to 15¾ for middling upland grades, and closed very heavily. The stock of cotton now here is estimated at about 48,500 bales. The receipts at the port this week, have averaged about 5,200 bales a day. The receipts during the cotton year, ending Sept. 1, 1867, were 657,431 bales, against exports of 470,596 bales. The receipts at all the shipping ports from Sept. 1, 1866, to Aug. 31, 1867, were 1,951,998 bales, against 2,154,476 bales the preceding cotton year; exports, 1,554,664 bales, against 1,557,054 bales the preceding year; estimated stock at close of the year, 80,296 bales against 253,000 bales same time last year. The receipts at all the ports, since Sept. 1, 1867, have been 514,200 bales, against 485,000 bales same time last year; exports, same time, 230,000 bales, against 181,000 bales same time last year; stock on hand at latest dates, 217,200 bales, against 384,100 bales same date last year. Foreign merchandise has been in slack demand, generally, and depressed in price. The severe fall in Gold has exercised an adverse influence on values, in the line of imported goods. The total imports of foreign dry goods, last week, were $471,886, and the total amount marketed $651,315. The value of foreign merchandise imported last week, was $1,715,286—making the grand total specie value of last week's imports of dry goods and merchandise, $2,187,172, and since Jan. 1, 1867, $226,265,919, against $269,053,587 same time in the preceding fiscal year. The ocean freight market has been dull, heavy, and lower, since our last, with 423 vessels of all classes in port. For Liverpool we quote flour at 2s. 6d.@2s. 9d. per bbl.; grain at 5½d.@6¼d. per bushel; cotton at ¼d.@½d. per lb.; and heavy goods at 22s. 6d.@37s. 6d. per ton, all by sailing vessel.

The New York exports, exclusive of specie, for the week ending Dec. 10, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week.....	$3,101,416	$4,628,013
Prev. reported.....	175,383,922	175,050,821
Since January 1.....	$178,485,338	$179,678,834

The balance in the Sub-Treasury on Wednesday was $103,890,363 71.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Buffalo, New York and Erie 1st mort., 90¼; Chicago and Northwestern Equipment 7s, 75; Long Dock bonds, 96; Toledo and Wabash Equipment bonds, 66; Indianapolis and Cincinnati, 64; Cleveland, Painesville and Ashtabula, 102¼; New Jersey R. Central Pacific Railroad.

If the two powerful Companies—the CENTRAL PACIFIC and UNION PACIFIC—who are building the great Pacific Railroad make the same energetic progress for two years more, that they have during the past two, we shall witness the completion of the through line across the continent some time in 1870. The unfinished gap between them at the close of this year will be about 1,080 miles, and as the latter company have now reached their mountain section, the great advance of 250 miles next year will be on the part of the Central Pacific Company, who are just emerging from their heavy excavations and tunnellings in the Sierra Nevada Range.

It appears by the published returns that the earnings on the Central Pacific end of the road are already, in the infancy of the enterprise, so large and so profitable as to excite astonishment. The prospect is that a double track will be necessary soon after the line is completed, and the day is not far distant when the road must become the foremost in importance on the continent.

By the fostering aid of the Government and further subsidies from the State of California, the Central Pacific Railroad Company have been enabled, by their abundant resources, to push forward the great work with surprising energy; and at the same time, the revenues from the natural business of the road have been far more than sufficient to meet the expenses and the annual interest engagements. They are offering their First Mortgage six per cent. gold Bonds for sale through our leading bankers, as will be seen by their advertisement elsewhere in this paper. Persons desiring safe, permanent investment, will do well to look into their merits.

Missouri Bonds.

The Secretary of the Interior has surrendered to the agent of the State of Missouri $63,000 of Missouri State bonds and interest coupons, amounting to $15,000. This was due about the beginning of the war, and the State failing to pay, the Government settled it, having guaranteed it. The Interior Department claimed interest upon this interest, but the Treasury Department decided that Missouri could not justly be called upon to pay interest to the Government, after the State began to advance money for war expenses. This decision saved the State five years' interest, amounting to $60,000.

☞ The Canadian *News* says that the railways in the maritime provinces have, by order in Council, been assigned to the charge of the Department of Public Works. The traffic on the New Brunswick line has increased so much that the present rolling stock is quite insufficient and a number of new freight cars have been ordered. A general survey of the whole work has been made for the Government.

Railroad Earnings.--Weekly.

The earnings of the Chicago and Rock Island Railroad for the first week in December, 1867, were $93,900 00
Corresponding week of previous year.. 62,096 00

Increase $31,804 00

The earnings of the Chicago and Northwestern Railroad for 1st week in Dec., 1867 ... $248,867 16
Corresponding week previous year .. 173,132 50

Increase $75,734 66

The earnings of the Detroit and Milwaukee Railroad for the week ending December 5, 1867, were $30,074 00
Corresponding week of 1866 ..... 29,818 00

Increase $256 00

The earnings of the Michigan Southern and Northern Indiana Road for the 1st week in Dec., 1867, were $84,231 00
Corresponding week of 1866 ..... 79,958 00

Increase $4,273 00

The earnings of the Atlantic and Great Western Railway for the fourth week in Nov., 1867, were $102,123 00
Corresponding week previous year... 108,585 00

Decrease $6,462 00

The earnings of the Marietta and Cincinnati Railroad the 4th week in Nov., 1867.. $39,453 00
Corresponding week previous year.... 37,968 00

Increase $1,485 00

The earnings of the Western Union Railroad for the fourth week in Nov., 1867 .... $19,027 71
Corresponding week previous year.... 18,843 89

Increase $183 82

The earnings of the Toledo, Wabash and Western Railroad for the 1st week of Dec., 1867, were $80,519 80
Same week in 1866.. ..... 88,297 70

Decrease..... $7,777 90

The earnings of the Chicago and Alton Railroad for the first week in December, 1867, were $79,573 10
Corresponding period previous year.. 63,818 01

Increase..... $15,755 09

Bridge over the Ohio at Louisville.

The bridge, which it is claimed will compare favorably with the superb structure across the same river at Cincinnati, is to be constructed with but one swinging span, or draw, which is over the Louisville and Portland canal. The total length of the superstructure will be 5,220 feet, and of graded approaches 2,509 feet, making total length of the bridge from the points where the ascent is commenced, 7,720 feet. The total length of the connection between the Jefferson Railroad and Louisville and Nashville Railroad, including the bridge, will be three and a half miles. Estimated cost, $1,500,000.

☞ By the recent completion of the Lehigh and Susquehanna Railroad, from the Wyoming Valley to Northumberland, there is complete connection of Baltimore, by rail, with the coal fields of Wyoming Valley.

☞ The Richmond and Petersburg Railroad Company have inaugurated measures looking to the union of all the four lines of railway between Aquia Creek and Weldon into one grand line, to be under the control of one company, one President, Directors, &c.

Illinois Central Railroad.

The statement of this Company for the month ending November 30, 1867, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	16,862.85 for	$161,844 38
Acres Int. Fund Lands sold	920.00 for	11,721 80
Acres Free Lands sold	8,221.00 for	103,126 62
Total sales during month of November, 1867	25,503.85 for	$276,692 75
To which add Town Lot Sales		1,320 00
Total of all	25,503.85 for	$278,012 75
Cash collected in November		$339,021 12

TRAFFIC DEPARTMENT.

Receipts from Freight		$435,657 00
do. Passengers		143,144 71
do. Mails		6,358 33
do. Rent of Road		4,000 00
do. Other Sources		90,000 00
Total Receipts in November, 1867		$679,160 04
Total Receipts in November, 1866		$570,484 61

Commerce of New York.

The foreign imports at New York for the month of November, are officially stated as follows:

	1866.	1867.
Entered for consumpt'n.	$10,688,544	$8,193,013
Do. for warehousing	8,345,859	6,414,609
Free goods	873,514	1,082,066
Specie and bullion	802,937	181,319
Total entered at port	$20,710,854	$15,871,007
Withdrawn fr. wareh'use	8,186,725	6,378,248

The foreign imports at New York for eleven months from January 1st, were:

	1866.	1867.
Entered for consumpt'n.	$155,353,565	$121,124,673
Do. for warehousing	110,127,920	104,825,824
Free goods	12,053,589	10,279,075
Specie and bullion	9,225,936	3,043,323
Total entered at port	$286,761,010	$239,272,895
Withdrawn fr. wareh'se	95,676,446	101,573,817

The duties received at New York from Jan. 1st, have been as follows:

	1866.	1867.
1st quarter	$35,618,902 52	$32,916,085 09
2d quarter	31,929,287 26	26,438,603 81
3d quarter	36,105,092 08	33,840,898 17
In October	11,002,048 08	8,682,889 05
In November	7,716,883 67	6,931,212 90
11 months	$122,372,231 61	108,809,689 02

The exports from New York to foreign ports in the month of November, were:

	1866.	1867.
Domestic produce	$13,651,464	$20,056,540
Foreign free goods	268,600	8,515
Do. dutiable	64,001	610,460
Specie and bullion	3,766,690	1,733,261
Total exports	$17,750,755	$22,408,776
Do. exclusive of specie.	13,984,065	20,675,515

The exports from New York to foreign ports for eleven months from January 1, were:

	1866.	1867.
Domestic produce	$169,838,354	$164,768,232
Foreign free goods	662,218	853,961
Do. dutiable	4,415,445	7,609,846
Specie and bullion	59,256,430	44,947,400
Total exports	$234,172,447	$217,679,439
Do. exclusive of specie	174,916,017	172,732,039

☞ At a meeting of the stockholders of the Virginia Central Railroad Co., in Richmond on the 29th ult., Col. E. Fontaine was re-elected President by acclamation.

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of November, were:

ENTERED FOR CONSUMPTION.

	1866.	1867.
Manufactures of wool	$1,268,329	$577,103
" cotton	955,955	429,769
" silk	637,585	1,000,144
" flax	794,909	434,503
Miscellaneous dry goods	527,761	461,562
Total entered for consump.	$3,788,559	$2,903,081

WITHDRAWN FROM WAREHOUSE.

	1866.	1867.
Manufactures of wool	$793,884	$579,542
" cotton	214,851	158,152
" silk	452,607	256,409
" flax	891,352	388,178
Miscellaneous dry goods	93,672	133,203
Total withdrawn from warehouse	$1,945,666	$1,515,484
Add entered for consump.	3,788,539	2,903,081
Tot. thrown on the market	$5,734,205	$4,418,565

ENTERED FOR WAREHOUSING.

	1866.	1867.
Manufactures of wool	$1,205,661	$549,962
" cotton	447,210	159,891

☞ The Lehigh and Susquehanna Railroad was finished between Bethlehem and Mauch Chunk on the 25th ult., and a large train of coal and lumber cars passed safely over the road and was delivered to the North Pennsylvania Railroad on the same day. The road is expected to be opened through to Easton during the present month.

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley, left at tide water from the commencement of navigation to 30th Nov., inclusive, during the years 1866 and 1867, was as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu.
1866..	399,900	5,821,700	24,436,100	6,004,800
1867..	394,800	8,853,400	15,369,500	3,560,700
Dec..	5,100	*3,031,700	9,126,600	2,444,100

* Increase.

By reducing the wheat to flour, the quantity of the latter left at tide-water this year, compared with the corresponding period last year, shows an increase of 601,240 bbls. flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 30th of Nov., in the years indicated:

Canal opened—	1865. May 1.	1866. May 1.	1867. May 6.
Flour, bbls.	863,800	399,900	394,800
Wheat, bushels..	9,404,500	5,821,700	8,853,400
Corn, bushels...	17,313,100	24,496,100	15,369,500
Barley, bushels.	4,000,900	6,004,800	3,560,700
Oats, bushels...	9,787,300	9,581,600	8,331,800
Rye, bushels....	1,081,400	1,307,800	862,900
Malt, bushels...	491,500	389,000	272,100
Beef, bbls.....	9,864	1,800	1,480
Pork, bbls.....	15,109	43	899
Bacon, lbs.....	1,273,100	.....	34,400
Butter, lbs.....	1,099,600	1,180,200	662,800
Lard, lbs.....	1,996,000	108,400	1,235,300
Cheese, lbs.....	15,100,200	9,807,000	6,790,800
Wool, lbs.....	617,000	495,400	352,600

Journal of Railroad Law.

LIABILITY FOR NEGLIGENCE TO A PASSENGER WHO, WITHOUT FRAUD, DID NOT PAY FARE.

In the case of Austin *vs.* Great Western Railway Co., which has just been decided in the English Court of the Queen's Bench, it appeared that the plaintiff was a child three years and two months old. The plaintiff's mother, Elizabeth Austin, carrying the plaintiff in her arms, took a ticket for herself, but not for the plaintiff, on a journey from Crumlin to Merthyr by what is called a "parliamentary train," on the defendants' railway. In the course of the journey an accident happened to the train, and the plaintiff's leg was broken. At the time the plaintiff's mother took her ticket no question was asked her by the defendants' servants as to the age of the child, nor was she told by the defendants' servants that she ought to take a ticket for the plaintiff at half the price charged an adult person. The defendants admitted that the accident was caused through the negligence of their servants, but contended that they were not liable for the consequences of the negligence, because the plaintiff's mother who had charge of him, had taken no ticket for him.

It was argued by the company that the defendants were entitled to receive payment for the plaintiff as a passenger, under the statute. It is true the plaintiff is a child of tender years, but there is a complete identity between him and his mother, and the concealment practiced by her affects the claim of the plaintiff. 8 Ex. 30 21 L. J. Ex. 286.

This case is analogous to the cases of concealment of a passenger as to the character of his luggage. If a carrier accept luggage to be carried with a passenger, and it turn out to be merchandise and is lost, the carrier is notl iable for the loss 30 L. J. (C. P.) 289; 10 C. B. (N. S.) 154.

Cockburn, C. J.—I think there should be no rule in this case. The contract is to carry safely both the mother and the plaintiff. If that contract has been entered into under some misrepresentation on the part of the mother, she may be liable for the fare which she ought to have paid for the plaintiff, or for any penalty to which she may be subject byany enactment or bye law made under statutory powers. Her default does not alter the position of the company. The contract being to carry mother and child, through the negligence of the company the plaintiff was injured. I think the verdict right, and that therefore there should be no rule.

Blackburn, J.—I am also of opinion there should be no rule. I think that what was said in the case of Marshall *vs.* Newcastle and Berwick Railway Co. 21 L. J. (C. P.) 130; 11 C. B. 655, was quite correct. It was there laid down that the right which a passenger by railwav has to be carried safely, does not depend on his having made a contract, but that the fact of his being a passenger casts a duty on the company to carry him safely.

If there has been a fraud on the part of the plaintiff, or if the plaintiff had been taken into the train without the defendants' authority, no such duty would arise. Whether the mother's fraud could be treated as the fraud of the child so as to bring the present case within the principle of the cases which have been referred to, we need not now inquire. The averment of fraud which may be thought to make the plea valid is disproved. We must take it that the child, without fault and through an honest mistake on the mother's part, was taken into the train by the railway company and received as a passenger by their servants with with their authority. Under those circumstances, does or does not the law require those who were carrying the child to take a reasonable care that he should come to no damage? It certainly seems to me that a duty to carry safely arises under those circumstances. If there had been fraud on the part of the mother, it may be that she could not recover for an injury to herself; but in this case, the plaintiff being under three years of age, and therefore being incapable of fraud, and there being only a mistake on the part of the mother, I cannot but think that a duty was cast on the railway company to take reasonable care; and consquently I am of opinion that the verdict ought not to be disturbed.

Shee, J.—It seems to me that there was one entire contract to carry both the mother and child. It would not have made the least difference in my mind if the mother had taken two tickets, there would have been only one contract to carry mother and child. The plaintiff could not comply with the regulations of the company; he could not show his ticket, or do any thing which a passenger is required to do.

The contract, therefore was necessarily a contract with the woman for herself and her child, and was an entire contract; the company to a certain extent has had the benefit of it by receiving a part of the fare to which they were entitled, and they would be entitled to bring an action against the mother if a fraud had been committed by her. I think they were under a responsibility to perform their contract, and they having undertaken to carry the mother and the child, the verdict was right and ought not to be disturbed.

Lush, J.—I am of the same opinion. I prefer to rest my judgment on the ground of contract. I think there was a contract to carry the mother and the child, and that contract operated in favor of each party. The only question is, whether the facts averred in the plea and found by the jury, negative the existence of any such contract as I have mentioned. I think they show that there was an undertaking to carry the plaintiff. If the company entered into it under a mistake as to the age of the child that does not make it the less a contract; we must hold that they did enter into a contract as carriers to carry the plaintiff safely which they have failed to perform.

Finances of Kentucky.

We learn from the Message of the Governor, that the public debt of the Commonwealth on the 10th of October, 1867, was $4,611,199 46.

This sum includes the School Fund, which amounts to $1,633,297 46.

Deducting this sum from the State debt proper, and the total indebtedness of the Commonwealth subject to payment, as of the 10th of October, 1867, is $3,978,902.

There was in the Treasury of the State, to the credit of the Sinking Fund, on the 10th of October, 1867, $1,519,783 34.

In addition to the sum last enumerated, there is due to the Sinking Fund, by the Treasury Department of the Commonwealth, for money borrowed, $381,239 56; which, added to the amount in the Treasury, makes the total to the credit of the Sinking Fund on the 10th of October, 1867, $1,901,022 90.

Were this amount of cash on hand applied to the extinguishment of the State debt, the total indebtedness of the Commonwealth, exclusive of School Fund, would on the 10th of October, 1867, amount to $1,677,877 10.

This indebtedness of the Commonwealth is represented by State bonds of different maturities, bearing interest at the rate of 5 per cent. and 6 per cent. per annum.

This amount includes $544,000 of the military bonds of the State, issued during the war, and maturing respectively in fifteen and twenty years, and designated as the remnant of the war debt.

The remaining portion of these bonds were executed many years ago, to enable the State to carry on an extensive system of internal improvement.

If all the stocks of the State were worth par, the resources of the sinking fund, independent of the $1,901,022 90 in cash shown to its credit on 10th October, 1867, would amount to $6,103,294 99. Add cash $1,901,022 90, and the total resources of the sinking fund on the 10th of October, 1867, amounts to $8,004,317 89.

Were the entire indebtedness of the Commonwealth liquidated, there would still remain to the credit of the sinking fund, $7,926,438 28.

There was due from the United States to the Commonwealth of Kentucky, on the 1st of January, 1867	$1,831,706 88	
Amount received of the United States since 1st of January, 1867.	399,224 17	
Leaving		$1,432,482 71
Add amount paid off by State since 1st of January, 1867, and for which United States is indebted..		86,455 11
Balance due State 10th of October, 1867		$1,468,937 82

Raritan and Delaware Bay Railroad.

The controversy between the Camden and Amboy Railroad Company and the Raritan and Delaware Bay Railroad Company has been finally decided by the Court of Errors and Appeals. Chancellor Green had decreed that the defendants must be enjoined from carrying on a through business between New York and Philadelphia until the 1st day of January, 1869. The Court of Errors and Appeals, on a revision of the whole case, have decided that the defendants had no right whatever to divert the route of their railroad so as to reach Philadelphia instead of Cape May, the destination prescribed by their charter, and that the Camden and Atlantic Railroad Company had no right to aid them in so doing, by prostituting its franchises, which were granted to it for an entirely different purpose. The Court further held, that as this invasion of the franchise of the Camden and Amboy Railroad Company was entirely unauthorized and unlawful, the compiainants were, perhaps, entitled to have the unlawful structure taken up; but if the defendants should desist from further attempts to interfere with the business of the complainants, it might not be necessary to enforce so severe a remedy, if justice could be done without it. A milder course should be pursued, in view of the improvements which have sprung up on the line of these roads. The Court, however, held that the Camden and Amboy Railroad Company are entitled to a perpetual injunction against the defendants interfering with their business, irrespective of the monopoly contract; and if the defendants hereafter, either before 1869 or afterward, should attempt to continue such interference, the Court of Chancery ought to cause the road to be abated and to be taken up from the point where the Raritan and Delaware Bay Road first deviates toward Philadelphia to Jackson, the point where it connects with the Camden and Atlantic Railroad, or so much of it as would effectually sever the connection between the two roads.

☞ The *Valley Virginian*, speaking of the prospects of the Chesapeake and Ohio Railroad, says it has the assurance that a company of contractors in Ohio, representing a large amount of wealth, are willing to take the county bonds at par and build the road. This, it says, "settles the question of finance at once, and gives an assurance that our exertions will be crowned with success."

☞ Alleghany County, Va., has voted, 259 to 143 in favor of a subscription of $50,000 to the Chesapeake and Ohio Railroad.

☞ The Commissioners of West Virginia have signed the agreement relative to the construction of the Chesapeake and Ohio Railroad.

Principal and Interest Payable in Gold Coin.

SECURE PROFITABLE INVESTMENT.

THE
Central Pacific Railroad
First Mortgage Thirty-Year Six Per Cent. Coupon Bonds,

Principal and Interest Payable in Gold Coin,

Represent the preferred claim upon one of the MOST IMPORTANT LINES OF COMMUNICATION IN THE WORLD, as it is the sole link between the Pacific Coast and the Great Interior Basin, over which the immense overland travel must pass, and the

Main Trunk Line across the Continent.

The road is now nearly completed from Sacramento to the Richest Mining Regions in the Salt Lake Basin, and is being rapidly carried forward by the largest force of laborers ever employed by any Railroad Company on this Continent.

The natural, legitimate, commercial business of the road surpasses all previous expectation, and is profitable beyond parallel, even among the oldest roads in existence. The Earnings and Expenses for the Quarter ending Oct. 31, were as follows, IN GOLD:

Gross Earnings.	Operating Expenses.	Net Earnings.
$593,847.92	$102,088.61	$491,759.31

This result, however, would have been far greater but for the inability of wagon teams to forward the freight and passengers from the temporary terminus in the mountains.

The United States Government and the State and Cities of California have so aided and fostered the Great Enterprise, that the Company will assume very light annual Interest obligations, and will have the following ample Resources at command for the Construction:

DONATIONS in Lands, Bonds, Concessions, etc., (without lien)	$12,800,000
CAPITAL STOCK, Net Earnings, etc, (no lien)	11,000,000
LOANS (subordinate lien)	3,000,000
U. S. SUBSIDY BONDS, 726 miles, (subordinate lien)	25,517,000
FIRST MORTGAGE BONDS	25,517,000
Resources, first 726 miles	$77,834,000

The FIRST MORTGAGE BONDS are in sums of $1,000 each, with semi-annual gold coupons attached, and are offered for sale, for the present, at 95 per cent. and accrued interest from July 1st, in currency, at which rate they yield nearly NINE PER CENT. UPON THE INVESTMENT.

These Bonds, authorized by the Pacific Railroad Acts of Congress, are issued only as the work progresses, and to the same extent only as the Bonds granted by the Government, and are the prior lien upon the whole valuable property furnished by the above Resources. They possess special assurances and advantages over other Corporate Securities, and are destined to rank among THE BEST INVESTMENTS IN THE WORLD, from their unusual attractions of safety, soundness and profit.

Conversions of Government Securities
INTO
Central Pacific First Mortgage Bonds,

now realize for the holders from 12 to 18 per cent. Advantage, WITH THE SAME RATE OF INTEREST.

Bonds can be obtained through the subscribers directly, or through responsible Banking agencies.

Bonds, Descriptive Pamphlets, Maps and information can be had at the

Office of the C. P. R. R. Co., No. 54 William St., N. Y., and of

FISK & HATCH,

Bankers & Dealers in Government Securities, and Financial Agents of the C. P. R.R. Co.

No. 5 Nassau St., N. Y.

THE
National Trust Co.
OF THE CITY OF NEW YORK,
No. 336 BROADWAY.

CAPITAL,
ONE MILLION DOLLARS.

DARIUS B. MANGAM, President.

The National Trust Company receives the accounts of Banks, Bankers, Corporations and Individuals, and allows

FOUR PER CENT. INTEREST

On daily balances, subject to Check at sight.

Certificates payable on demand are issued at the same rate.

Special Deposits for one year or more may be made at five per cent.

JERSEY CITY
LOCOMOTIVE WORKS
FOR SALE.

THE WELL KNOWN LOCOMOTIVE WORKS AT Jersey City, known as the Jersey City Locomotive Works, comprising 24 full lots of lands, with substantial and well arranged buildings thereon, together with the machinery and tools, which are in excellent order, and of the best description, and capable of turning out 6 to 8 first class locomotives per month.

The character of the work turned out of the shops of this company is well known, and has a high reputation on most of the leading railroads in the United States. Adjoining and connected with these works are also offered for sale, 26 lots of grounds with the buildings thereon, and which, added to the property of the Jersey City Locomotive Works, make the whole one of the most desirable establishments for the manufacture of locomotive engines and other machinery in the country. The price and terms will be made highly favorable, as the parties interested are solicitous to close up the concern. Apply to

CHARLES KNEELAND, 49 William street.
W. G. HAMILTON, 21 Broadway.
4t49 McANDREW & WANN, 12 Pine street.

525 MILES
OF THE
Union Pacific Railroad
Running West from Omaha
Across the Continent,
ARE NOW COMPLETED.

This brings the line to the eastern base of the Rocky Mountains, and it is expected that the track will be laid thirty miles further, to Evans Pass, the highest point on the road, by January. The maximum grade from the foot of the mountains to the summit is but eighty feet to the mile, while that of many eastern roads is over one hundred. Work in the rock-cuttings on the western slope will continue through the winter, and there is now no reason to doubt that the entire grand line to the Pacific will be open for business in 1870.

The means provided for the construction of this Great National Work are ample. The United States grants its Six Per Cent. Bonds at the rate of from $16,000 to $48,000 per mile, for which it takes a *second lien* as security, and receives payment to a large if not to the full extent of its claim in services. These bonds are issued as each twenty-mile section is finished, and after it has been examined by United States Commissioners and pronounced to be in all respects a first-class road, thoroughly supplied with depots, repair shops, stations, and all the necessary rolling stock and other equipments.

The United States also makes a donation of 12,800 acres of land to the mile, which will be a source of large revenue to the Company. Much of this land in the Platte Valley is among the most fertile in the world, and other large portions are covered with heavy pine forests and abound in coal of the best quality.

The company is also authorized to issue its own First Mortgage Bonds to an amount equal to the issue of the Government and no more. Hon. E. D. Morgan and Hon. Oakes Ames are Trustees for the Bondholders, and deliver the Bonds to the Company only as the work progresses, so that they always represent an actual and productive value.

The authorized capital of the Company is One Hundred Million Dollars, of which over five millions have been paid in upon the work already done.

EARNINGS OF THE COMPANY.

At present, the profits of the company are derived only from its local traffic, but this is already much more than sufficient to pay the interest on all the Bonds the Company can issue, if not another mile were built. It is not doubted that when the road is completed the through traffic of the only line connecting the Atlantic and Pacific States will be large beyond precedent, and, as there will be no competition, it can always be done at profitable rates.

It will be noticed that the Union Pacific Railroad is, in fact, a *Government Work*, built under the supervision of Government officers, and to a large extent with Government money, and that its bonds are issued under Government direction. It is believed that no similar security is so carefully guarded, and certainly no other is based upon a larger or more valuable property. As the Company's

First Mortgage Bonds

are offered for the present at NINETY CENTS ON THE DOLLAR, they are the cheapest security in the market, being more than 15 per cent., lower than U. S. Stocks. They pay

SIX PER CENT. IN GOLD,

or over NINE PER CENT. upon the investment. Subscriptions will be received in New York at the Company's Office, No. 20 Nassau street, and by

CONTINENTAL NATIONAL BANK, 7 Nassau st.,
CLARK DODGE & CO., Bankers, 51 Wall st.,
JOHN J. CISCO & SON, Bankers, 33 Wall st.,

and by the Company's advertised Agents throughout the United States. Remittances should be made in drafts or other funds par in New York, and the bonds will be sent free of charge by return express. A NEW PAMPHLET AND MAP, showing the Progress of the Work, Resources for Construction, and Value of Bonds, may be obtained at the Company's Offices or of its advertised Agents, or will be sent free on application.

JOHN J. CISCO, Treasurer, New York.
November 23d, 1867.

COLLINS & CO.'S NEW PATENT SCREW WRENCH.

THE STRONGEST AND MOST DURABLE WRENCH IN MARKET.

All Consumers have noticed that their wrenches first fail by reason of the forcing back of the handle, and by the springing of the bar. Our improvement remedies both these defects, the bars being finished wider than any other wrench in market, and the handle cannot be displaced, as all strain on it is prevented by the screw thimble, D, (see cut.) Already adopted as *the best* by the principal railroads and machine shops, and for sale by Hardware dealers generally. Address

TO RAILROAD CAR BUILDERS AND OTHERS.

The undersigned, being the duly authorized Agent in the United States for the sale of **PEACOCK & BUCHAN'S CELEBRATED AND APPROVED PAINT COMPOSITIONS**, Nos. 1, 2, 3, and 4, solely manufactured in Southampton, England, invites the attention of Railroad car builders, owners and others to the PAINT COMPOSITION No. 3, IN ALL COLORS AND TINTS. It is hermetically soldered up in convenient sized tins of 7 lbs., 14 lbs., and 28 lbs. each, and warranted to keep good in any climate for many years. Being MIXED READY FOR IMMEDIATE USE, it will be found of great advantage, as it can be packed away like preserved meats, and will not deteriorate. It has been opened after TEN YEARS and found to be quite good and READY FOR USE. Being ground first on roller mills of polished granite, and then of burnished steel, by steam power, it is as fine as artist's color, and is applicable to the first-class Railroad Car, Counting House, or Drawing-Room, or the cabin of the yacht, steamer, or sailing ship—each tin forming a ready Paint Pot. It dries in a few hours, with a beautiful brilliant surface, without any stickiness or unpleasant smell, and stands longer than ordinary paint—never blistering, cracking, or flaking. IT IS GENERALLY ADOPTED BY THE CHIEF RAILWAY COMPANIES OF EUROPE, AND IS **CHEAPER AND BETTER THAN ANY OTHER** PAINT IN THE MARKET.

—o—

PLASTIC SLATE
FOR
Roofing & Other Purposes.
The process of reconstructing Slate Stone from a disintegrated state was
PATENTED FEBRUARY 21st, 1865.
It is a combination of
Pulverized Slate and Viscous Matter,
(the latter possessing qualities of geological and chemical affinity for the former,) and is a development of one of the simple but unalterable tendencies of nature.
As a Roofing Material it Stands Unrivalled.
A mastic—it adapts itself to every shape and slope. Non-combustible, impervious, non-expansive, and undecaying.
Frost does not Crack nor Heat Dissolve it.
The only roofing material ever discovered that will resist the action of the elements as long as the structure it protects. Being susceptible of little, if any wear, from exposure, and
Perfectly Fire-Proof,
It is unequalled as a coating for Railroad and Farm Buildings, Fences, Bridges, bottoms of Vessels, Vaults, etc.

ESTABLISHED IN 1836.

ENGINEERING WORKS.

ENGINEER'S FIELD BOOK,
By C. S. CROSS, Civil Engineer.
THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—
1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.
It is a plain, clear and most valuable book for practical Railroad Engineers. Sent **free by mail,** upon receipt of the price. For sale at this office. Price **$1.50.**

LYONS' TABLES.
To Civil Engineers and Contractors.
FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

Sheet No.			Sheet No		
1.	General Table for all Bases and all Slopes.		13.	for Base 18 ft. Slop.	1½ to 1
2.	For Side Hill Cuts and Fills.		14.	" 20 "	1½ to 1
3.	Base 12 ft. Slopes	1½ to 1	15.	" 24 "	1½ to 1
4.	" 14 "	1½ to 1	16.	" 24 "	1½ to 1
5.	" 15 "	¾ to 1	17.	" 25 "	1½ to 1
6.	" 15 "	1 to 1	18.	" 26 "	1½ to 1
7.	" 15 "	1¼ to 1	19.	" 28 "	¾ to 1
8.	" 16 "	¾ to 1	20.	" 30 "	1 to 1
9	" 16 "	1 to 1	21.	" 30 "	1¼ to 1
10.	" 18 "	¾ to 1	22.	" 30 "	1½ to 1
11.	" 18 "	¾ to 1	23.	" 32 "	1 to 1
12.	" 18 "	1 to 1	24.	" 32 "	1½ to 1

The Tables are printed in clear, bold type on tinted paper, sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill, cross section.
Sent, free by mail, in separate sheets, at 35c. each.

American Railroad Journal.

New York, Saturday, December 21, 1867.

The Pottsville Rolling Mill.

No more striking illustration of the rapidly increasing growth and importance of the iron business of Pennsylvania, is afforded, than the enlarged size and capacity of the furnaces and mills here and elsewhere in the State. Experience and capital are now identified with our iron operations, and the result is seen in establishments which will compare favorably with the best in Europe, while the product especially in the case of the Mill under notice, is we have the most reliable authority for stating, superior to the best English article imported. This is certainly, a gratifying state of affairs in connection with this great industrial interest, proving conclusively, that with adequate protection against the much lower rates of labor in Europe, we can be perfectly independent of foreign countries for supplies of railway and other iron. The iron, coal, capital, skill and machinery of Great Britain, have made her the great manufacturing nation she is. The United States possess all the requisites for equal eminence, and with proper encouragement would speedily become the peer of the mother or any other country.

These thoughts were suggested directly, while paying a casual visit a day or two since to the Pottsville Rolling Mill, which through the energy and enterprise of the Messrs. Atkins, the proprietors, has been rebuilt and enlarged, and fitted up entirely with new machinery. Work upon it was completed and the Mill put in operation about seven weeks since. We inspected all the machinery and apparatus necessary to facilitate the workmen in their labor of rolling and handling rails, and found everything of the most complete, substantial and convenient description. A very ingenious apparatus, run by steam, and controlled by a single workman, (adapted to its present use, as we understood, by Mr. C. M. Atkins,) receives a rail as it leaves the last roll, and moves it to the saws which cut it the required length. The steadiness and effectiveness of this apparatus cannot be equaled by any worked by mere human power. We observed that the facilities the workmen have for handling the rails, are excellent. From the time a rail leaves the last roll until it reaches the truck to be shipped, it is handled in the various operations of punching, etc., by two workmen in each case, with speed and apparent ease. Yet the rails we saw handled, on the day of our visit, weighed each, five hundred pounds. Everything isso admirably arranged, and so many improvements have of late years, been introduced into the process of rolling and handling rails, that the severity of the labor is lessened while valuable time is saved.

We have not space to enumerate all the machinery and apparatus which attracted our attention and interested us. We will merely note the most prominent and costly, which by the way, were made in Pottsville and are exceedingly creditable to the skill of our machinists. There is one three-high 19 inch train of rolls for rails, which is driven by an upright engine of 250 horse power. This engine is a fine piece of work, and runs without jar or noise. The fly-wheel attached to it weighs 27 tons. There is one three-high train of 18 inch puddle rolls, driven by a 90-horse power engine. There is also, a 60-horse power engine for driving the large blowers, the punches and pumps. In addition there are three engines of 10-horse power each, for driving the saws, rail-straightening machine, and shops connected with the works. The machinery for finishing and handling the rails is all of the most improved kind, and arranged to make rails of any length from 24 to 30 feet. The present capacity of the Mill is about fifty tons of finished rails per day.

In connection with the Mill there is a machine shop and foundry, in which work and repairs for the Mill are executed. The Mill and contiguous buildings cover over an acre of ground and give employment to about four hundred workmen.

There is one feature in reference to the rails made at this Mill, which must commend them to those desirous of knowing, exactly the quality of the rails they order. It is this:—The Messrs. Atkins also own the two large and superior furnaces in this Borough known as "The Pioneer, No. 1 and No. 2." The quality of their pig metal is generally recognized and acknowledged to be very fine. Now, all of the iron used in their Mill is manufactured at the furnace named, and the Messrs. Atkins are thus enabled to insure not only a good but a uniform quality of all rails furnished by them, which is certainly, an important matter.

The rebuilding and enlarging of the Pottsville Rolling Mill, are among the gratifying improvements we have been called upon to note this year in connection with our Borough, and we do not doubt that the enterprise of the Messrs. Atkins, in consequence of the very fine quality of the rails they make, which as we have remarked, are said to be superior to the best English rails imported, will be abundantly rewarded. Already, wherever used, they have given great satisfaction and have in consequence, obtained an enviable reputation. —*Pottsville Miner's Journal.*

Baltimore and Potomac Railroad.

The contracts for grading on the whole line of this road were awarded on the 14th inst. The lowest bidders for different sections were as follows: S. H. Walters & Co., of Pennsylvania; A. Heistend & Co., of Pennsylvania; J. B. Criswell & Co., and E. G. W. Holt & Co., of Maryland; C. V. Hammond & Co., of Maryland, and Crowley & McCaffrey, of Washington. The latter firm, we understand, has the contract for the work on the branch line from Washington, where the lands for the right of way have yet to be condemned. Along the main line the land owners accord the right of way gratuitously. The grading is to be commenced at once, and by the terms of the contracts is to be paid for monthly as it progresses.

Cape Cod Railroad.

The Barnstable *Patriot* says that the friends of the Cape Cod Railroad to Provincetown are now at work in good earnest. Truro, Wellfleet and Eastham have petitioned the Legislature for authority to take stock; and these towns are to be visited shortly by an efficient committee to confer with the inhabitants on the subject. Parties stand ready to loan the needful funds, on the credit of the towns, and to push through the road immediately. The travel on the road thus far equalled nearly thirty-two thousand persons the past year; and the extension, it is thought, would make it fifty thousand directly. Hopes are expressed that the road extension may be completed by next December.

Lake Superior Iron Ore.

The Lake Superior region competes with Pennsylvania in the production of iron ore. The supply from the mines back of Marquette, as we learn from *The Marquette Journal*, amounted in the last year to 450,000 tons, exceeding by 50 per cent. the yield of any former year. Of this total little remains on hand for export, the demand having continued good up to the close of navigation. In regard to the extent of the ore deposits there is apparently no limit. The *Journal* says the introduction of machinery and the system of deep mining in the older mines will enable the various companies to maintain without exhaustion a large production from year to year, although the costs are somewhat increased, compared with mere surface operations of former years. Generally speaking, the deposits of ore in these mines enlarge as they are worked downward, giving promise of an unfailing supply.

New York Central Railroad.

The following is an abstract of the report of this company for the fiscal year ending September 30, 1867:

EARNINGS AND RECEIPTS.

From through passengers	$1,180,765 35
" way "	2,851,258 04
" through freight	5,298,620 63
" way "	3,605,129 79
" mail transportation	95,970 00
" express	248,000 00
" rents, storage, etc	699,950 19
Total	$13,979,514 00

PAYMENTS OTHER THAN FOR CONSTRUCTION.

For transportation expenses, viz:

For passenger business		$3,783,490 68
For freight business		6,870,201 71
		$10,653,692 39
For interest, including interest on Debt Certificates held for the Sinking Fund	$943,880 66	
For Sinking Funds	111,182 38	
For rent of Niagara Bridge and Canandaigua Railroad	60,000 00	
For rent of Saratoga & Hudson River R. R.	55,666 66	
For U. S. tax on passenger earnings	100,353 88	
		1,271,083 58
For dividends, viz:		
No. 27, Feb., 1867, 3 per cent	$796,110 00	
No. 28, Aug., 1867, 3 per cent	856,110 00	
U. S. tax on same	82,611 00	
		1,734,831 00

The transportation expenses were 76.20 per cent. of the gross earnings.

The net earnings for the year were $2,054,738 03, equal to 7.07 per cent. (and U. S. tax thereon) on the amount of capital stock of the company.

The following is a statement in detail of the cost of operating the road, and maintenance of roadway and machinery:

MAINTAINING ROADWAY AND REAL ESTATE.

Repairs of road bed and railway, excepting cost of iron	$1,514,148 59
Cost of iron (including the cost of chairs and spikes) used in repairs	1,113,881 52
Repairs of buildings	466,697 09
Repairs of fences and gates	27,772 08
Taxes on real estate	432,131 91
Repairs of Mohawk turnpike	3,511 85
	$3,558,143 04

REPAIRS OF MACHINERY.

Repairs of engines and tenders	$1,078,579 56
Repairs of passenger and baggage cars	508,252 19
Repairs of freight cars	923,824 02
Repairs of tools and machinery	127,387 10
Incidental expenses	90,925 71
	$2,728,968 58

OPERATING THE ROAD.

Office expenses, stationery, etc	$40,472 89
Agents and clerks	346,147 55
Loading and unloading freight	431,471 61
Porters, watchmen, etc	317,124 78
Wood and water station attendance	90,192 44
Conductors, brakemen, etc	305,272 86
Enginemen and firemen	491,333 21
Fuel, cost of preparing for use	1,609,171 25
Oil and waste	226,980 68
Loss and damage of goods, etc	69,733 16
Damages for injuries of persons	152,665 02
Damages to property, including damages by fire and cattle killed on the road	8,800 21
General superintendence	81,973 76
Contingencies	195,241 85
	$4,366,580 77

COST OF ROAD AND EQUIPMENT.

	By last report.	To present time.
Graduation and masonry	$6,777,107	$6,777,107
Bridges	808,068	808,068
Superstructure, including iron	10,641,003	10,641,003
Passenger and freight stations, buildings, etc	1,411,521	1,486,521
Engine and car houses, machine shops, machinery and fixtures	1,310,280	1,324,280
Land, land damages and fences	4,852,105	4,910,099
Locomotives and fixtures, and snow plows	2,864,966	3,020,966
Passenger & baggage cars	923,128	923,128
Freight and other cars	2,738,283	2,890,783
Engineering and agencies	603,529	603,529
Construction account of the Rochester and Lake Ontario Railroad Co	150,000	150,000
Construction account of the Buffalo and Niagara Falls Railroad Co	658,921	658,921
Construction account of the Lewiston Railroad Co	400,000	400,000
Construction account of the Saratoga & Hudson River R. R. Co		2,000,000
Totals	$34,133,911	$36,594,405

The following is a comparative statement of funded debt and capital stock on the 30th September, 1866 and 1867:

	1866.	1867.
Debt certificates, less am't of sinking fund	$6,450,439	$6,189,955
Debts of the former companies outstanding	100,000	
Bonds for funding the debts of the former companies	1,398,000	1,514,000
Bonds for railroad stocks	606,000	594,000
Bonds for real estate	165,000	165,000
Bonds to Buffalo and Niagara Falls R. R. Co	77,000	77,000
Bonds and mortgages	185,365	176,865
Convertible bonds, payable in 1876	2,189,000	453,000
Bonds payable in 1887 (to renew bonds due in 1864)	2,925,000	2,900,000
Total am't of funded debt	$14,095,804	$12,069,820
Capital stock	24,801,000	28,537,000
Total	$38,896,804	$40,606,820

INCOME ACCOUNT.—*For the year ending September 30th, 1867.*

To expense of maintaining and operating road		$10,653,692 39
Coupons and interest		943,880 66
Divid'd No. 27, Feb., 1867, 3 per cent	$796,110	
Divid'd No. 28, Aug., 1867, 3 per cent	856,110	
U. S. tax on same	82,611	
		1,734,831 00
Future income: am't of one year's contribution to debt certificate sinking fund, transferred to current income account		111,182 38
Rent of the Niagara Bridge and Canandaigua Railroad		60,000 00
Rent of Saratoga and Hudson River Railroad		55,666 66
U. S. tax on earnings		100,353 88
Balance, September 30, 1867		4,727,885 73
		$18,387,442 70
By balance, September 30, 1866		$4,407,928 70

1865.	4,521,454	8,776,027	678,043	13,975,524
1866.	4,360,249	9,671,920	564,617	14,596,786
1867.	4,032,023	9,151,751	795,740	13,979,514
	$44,889,916	80,603,450	5,522,867	131,016,233

ADDITIONAL STATEMENTS.

The items charged to Construction account during the year (beside the cost of the "Saratoga and Hudson River Railroad," as mentioned below), have been:

Land, principally at Rochester	$57,994 17
13 locomotive engines and 315 cars added to equipment	313,500 00
Additions to buildings	89,000 00
Total	$460,494 17

Under the authority of an act of the Legislature of this State (chapter 254, of the Laws of 1867), this company took, within the year, a surrender or transfer of the capital stock (amounting to $2,000,000) of the Saratoga and Hudson River Railroad Company (whose road, from its junction with this company's road, about 3¼ miles east of Schenectady, to Athens, on the Hudson river, a distance of about 37¾ miles, was held under lease, and operated by this company, as stated in its last annual report) and issued in exchange therefor the like additional amount of its own capital stock, at par—which is represented by an addition of the same amount to cost of road and equipment.

The amount charged to transportation expenses includes this company's contribution towards laying a third rail on the Great Western Railway of Canada, so as to make a narrow gauge; the cost

of substituting several iron bridges for wooden (the principal one being that over the Owasco outlet, at Auburn, a structure of 140 feet in length); the completion of stone culverts and embankments, in place of wooden bridges, over Allen's and Irondequoit creeks, on the direct line between Syracuse and Rochester, and the expense of the general repairs attending the traffic of the year. The amounts charged to the accounts of injuries to persons, and loss and damage to goods and baggage, include $129,473 74 for claims growing out of the business of previous years, and not before adjusted.

The connecting of some long sidings has brought into operation, since the close of the fiscal year, and before the issuing of this report, 4.21 miles of additional second track between Churchville and Chili—from which last named place to Rochester (a distance of 10.30 miles) is all the single track now on the main line between Albany and Buffalo.

The length of the Iron Bridging now upon the line, reduced to single track, is 6,614⅔ feet.

The renewals of iron rails, during the year, amounted to 20,952 tons, equal to 220.57 miles of single track. The number of ties renewed during the same period was 402,687.

The capital stock has been increased during the year $3,726,000, by the conversion of $1,786,000 of 7 per cent. bonds due in 1876, and the issue of $2,000,000 in exchange for the capital stock of the Saratoga and Hudson River R. R. Co. The funded debt has decreased during the same time $2,025,984 16—making the increase in capital stock and funded debt, $1,710,015 84.

Compared with the previous year the gross earnings show a decrease of $617,271 68; with a decrease in expenses, exclusive of interest and sinking funds, of $525,960 31—making the decrease in net earnings, $91,311 37. The decrease of fuel and supplies on hand is $433,172 20.

The company have 289 locomotives, 205 first class passenger cars, 91 second class and emigrant cars, 90 baggage, mail and express cars, 5,180 freight cars, and 350 cars for gravel and other service.

Miles run by passenger trains, 2,170,731; by freight trains, 3,800,925; by other trains, 429,764—total, 6,401,420, a decrease, as compared with the previous year, of 205,841. Aggregate miles run by passenger cars in passenger trains, 8,888,817; do., by baggage, mail and express cars, 2,080,678—total, 10,969,495, a decrease of 1,485,757.

Number of passengers carried eastward, 1,869,148, of which 91,941 were through, and 1,777,207 way. Do., carried westward, 1,749,494, of which 99,920 were through, and 1,649,574 way. Aggregate both ways, 3,618,642, of which 191,861 were through, and 3,426,781 way. Total miles traveled by passengers, 198,985,143. This shows a decrease in passengers of 96,092, and in the mileage of do., 13,965,636.

Tons of freight carried eastward, 1,138,269, of which 578,282 were through, and 559,987 way. Do., carried westward, 529,657, of which 255,119 were through, and 274,538 way. Aggregate both ways, 1,667,926, of which 833,401 were through, and 834,525 way. Total number of tons carried one mile, 362,180,606. This shows an increase in tonnage of 65,729, and in the mileage of do., 31,105,059.

Length of main line from Albany to Buffalo, 297.75 miles; length of side or parallel and branch lines 296—total length of main, side and branch lines owned by the company, 593.75; length of second track, on main line and branches, 285.24; length of sidings, turnouts and switches 167.33—total length of equivalent single track, 1,046.32 miles.

Length of Niagara Bridge and Canandaigua railroad (leased) 98.46 miles; sidings, turnouts and switches 3.65—total length of equivalent single track 102.11.

Total length of equivalent single track on lines owned and lines leased, 1,148.43.

BALANCE SHEET.

From General Ledger, September 30th, 1867.

Railroad and equipment		$36,594,405 52
Cash in banks	$290,179 05	
Passenger and freight ag'ts, balances, since remitted	382,328 26	
		672,507 31
Buffalo and Erie R. R. Co. stock	$542,300 00	
Troy Union R. R. Co. stock	82,550 00	
Hudson River Bridge Co. stock and bonds	553,300 00	
Lake propeller stock	229,477 68	
Bonds of Erie & Pittsburg R. R. Co.	73,350 00	
		1,480,977 68
Future income: Proportion of debt certificates, &c., chargeable to the income of the company, pursuant to the consolidation agreement, from September 30, 1867, to May 1, 1883		6,266,954 58
Fuel and supplies; surplus beyond $1,000,000		759,776 10
Bills receivable	$192,466 75	
General P. O. depart	23,947 50	
Real estate (Buffalo and N. F. R. R. Co.)	32,500 00	
		248,914 25
		$46,023,535 44
Capital stock		$28,537,000 00
Debt certificates	$6,189,954 58	
Bonds for R. R. stock	594,000 00	
Bonds for real estate	165,000 00	
Bonds for funding debts of old companies	1,514,000 00	
Bonds to Buffalo and Niagara Falls R. R.	77,000 00	
Bonds convertible due 1876	453,000 00	
Bonds and mortgages	176,865 60	
Bonds due 1887	2,900,000 00	
		12,069,820 18
Unclaimed dividends	$4,530 20	
Expenses of operating the road, paid in Oct.	278,788 73	
Coupons and interest; accrued to Sept. 30	346,142 50	
United States tax acc't.	59,418 10	
		688,879 53
Income account; balance September 30, 1867		4,727,835 73
		$46,023,535 44

☞ The Windham County *Transcript* says that Messrs. Ward and Broad have contracted to build the bridge of the Boston, Hartford and Erie Railroad, crossing the Quinabaug near Putnam. The piers are to be about sixty feet in height. The road beyond is let out in several short sections to several parties, and teams are expected daily to commence operations. Parties are already at work near Hampton.

☞ The track of the Manassas Gap Railroad has been relaid, and the trains are now running to Front Royal.

Finances of North Carolina.

The Treasurer of this State has just issued an exhibit of its finances, of which the following is a summary:

Bonds issued before and since the war	$12,570,000
Bonds issued during the war for internal improvements	1,128,000
	$13,698,000

To this must be added a small amount due on coupons, not yet ascertained.

The assets of the Public Treasury are as follows:

Stock in railroad companies, &c	$7,584,500
Bonds due by corporations	2,446,500
	$10,031,000

There are other resources of the State not included in the above statement, but which are not estimated, and the real value of the assets cannot be exactly determined in the present unsettled condition of affairs.

Southern Railroads and the Government.

Among the papers before the Congressional Committee on Southern Railroads, is a letter from General Grant, as *ad interim* Secretary of War, in reply to an inquiry from Mr. McClurg, the chairman of the committee. He incloses a statement of the indebtedness of the several railroads on the 1st of November, 1867, from which it appears that the total appraised value of the property sold was $7,456,396. The total payments to November 1, 1867 were $3,459,334 29, viz:

By cash	$2,169,546 48
By transportation of Gov't troops and supplies	708,559 42
By mail service	581,228 39

The payments were made at various dates between November 30, 1865, and November 1, 1867. The total balance due the U. S., November 1, including interest, was $1,884,500 62.

☞ The Owego *Gazette* says that a movement is on foot for a railroad between Owego and Skinner's Eddy, on the Susquehanna, to run up the River to Apalachin, thence up the Apalachin to Bear Swamp, on the Montrose turnpike, and thence down the North Branch of the Wyalusing Creek to the Susquehanna, which, as an extension of the Southern Central Southward, is not only a feasible route, but a shorter cut to the Wyoming and Sullivan County coal fields by some 25 or 30 miles than the winding course of the river, between Owego and Skinner's Eddy.

☞ Proposals are invited by the Woodstock R. R. Co., at Woodstock, Vt., for the construction of the road bed of the Woodstock Railroad, from Woodstock, Vermont, to White River Junction. The work will be let by sections, or in gross, on classification bids, as the directors shall deem most for the interest of the company. It is desired that the work should be commenced this winter. Peter T. Washburn is President, and Hosea Doten Chief Engineer of the company.

☞ Col. A. De Graff, of Winona, Min., has taken the contract for a railroad leading from Buffalo to some coal mines in Pennsylvania. He has been there for several weeks, superintending the commencement of operations.

☞ Engineers are now engaged in surveying the various routes suggested for the Elkton and Delaware Junction Railroad.

American Railroad Journal.

Saturday, December 21, 1867.

Stock Exchange and Money Market.

Money has been quite freely offered during the week, especially toward the close, and as there has been no corresponding increase of demand from any source, the tendency of the price of accommodation has been decidedly favorable for borrowers, call loans having been quoted quite as generally at 6, as at 7 per cent., with more frequent exceptions of round sums having been advanced to the more prominent dealers in the public funds at as low a figure as 5 per cent. Discounts have likewise been of freer currency, as much less distrust of mercantile solvency has been evinced by lenders. Prime to good business paper has met with a more ready sale at 7@8½ per cent. per annum. The movement of currency is again in favor of this market, serving to lessen the pressure in the market against the interests of responsible borrowers. The outflow of currency from the Treasury is again on the increase, especially in the form of interest disbursements on account of the June issue of the Seven-Thirties, and in liquidation of the matured compound interest notes. All of the latter of the issues of 1864 have now matured and have been, for the most part, paid off. There were $62,249,360 of compound notes outstanding on the 1st inst., of which $43,500,000 will not mature before the coming year, leaving less than nineteen millions to be provided for this year. The December 1864 issue of compound interest notes was payable on the 15th inst. The Treasury will liquidate the principal of all matured compound notes of $5,000 or upward in three per cent. certificates or in currency, at the option of the holders; the interest and the principal on notes below $5,000 are payable in currency only. After those of December, which are new being paid off, the next which mature are dated May 15, 1865 and amount to $19,500,000. The August 1865 notes are $12,500,000; those of September 1865, $8,500,000, and those of Oct. 1865, $3,000,000. The city banks, last week, made a marked gain of over two millions in each of the legal tender, and deposit averages, while losing less than a million of specie. They reduced their loans over a million, and added a little to their circulation. The specie reserve of the city banks is now $14,886,828, against $13,991,200 same time last year. The city bank deposits are now $177,044,250, against $206,458,271 week ending Dec. 14, 1866. The legal tender reserve amounts to $54,954,308, against $63,994,309 same time last year. The circulation now stands at $34,118,911, against $31,797,655 same time last year. The loans are now $246,327,545, against $258,452,330 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $74,607,319 a day, against a daily average of $78,826,153 the preceding week, and $86,548,452 the week ending with Nov. 30. The current week's exchanges average about $78,000,000 a day. The city banks, last week, gained $2,858,858 of legal tender, and $2,117,895 of deposits while they lost $918,406 of specie. They reduced their loans, $1,122,539; and increased their circulation, $26,709.

The Philadelphia Bank movement the past week shows a decrease in loans, of $294,536; a decrease of $1,605 in specie; a decrease in legal tenders of $429,100; a decrease of $377,855 in deposits; and a decrease of $3,685 in circulation. The Bank Clearings show a decrease of $6,974,549, and the balances, a decrease of $989,691.

The U. S. Sub-Treasury receipts, week ending with Dec. 14, were $8,642,315, including $1,077,723 from customs duties; payments, $7,618,195, including $258,000 of coin interest; balance at the close of the week, $105,652,607, against $104,628,488, at the close of the preceding week, showing an increase of $1,024,119. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $3,286,746 including $204,000 from customs; and payments, $3,334,357; on Tuesday, receipts, $3,090,169 including $258,000 from customs, and payments, $3,434,357. The balance at the close of business on Tuesday stood at $103,176,365, against $103,932,475 a week previous; and $107,995,960 on Dec. 1.

National Bank notes to the amount of $246,870 were issued last week, making the total issue to 1,673 banks thus far, $305,284,756, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $5,528,737, leaving, with the existing 1,639 banks, (having an aggregate capital of $424,894,861,) an actual circulation at this date of $299,753,824. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $341,107,750; and for the public deposits, $37,917,950—making a total of $379,025,700. The Treasury Department last week redeemed and destroyed $373,400 of worn and mutilated fractional currency, and issued $356,675 of new.

The aggregate issue of coin certificates by the U. S. Sub-Treasury, in this city, up to Dec. 14, was $237,164,140; aggregate redemptions, $205,071,000; leaving outstanding certificates to the amount of $32,093,140.

Government revenues were on a very limited scale, this week, in the line of both customs and excises. The excises, last week, yielded $2,254,000, against $6,672,856, the preceding week; customs at the port of New York $1,077,723, and at the outports, about $350,000 (in coin) more, making the grand total income for the week equal about $4,181,800 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with July 30, 1867, were $265,920,474, against $310,906,984 the preceding fiscal year; and $211,129,529 fiscal year ending with June 30, 1865. The receipts thus far in the new fiscal year, which began on the 1st of July, have been about $95,000,000.

Government received $7,250,000 from customs, through the port of San Francisco, from Jan. 1, to Nov. 13, 1867.

Gold has been more variable, since our last. The fluctuations have been full two per cent., the lowest figure, which was 133, having been made on Thursday of last week, and the highest, which was 135, having been reached on Tuesday of the current week. The rise was occasioned mainly by the reduced London quotations for U. S. securities, and by the buoyancy in foreign exchange, which led to the revival of the export demand for specie. These influences favored the *bull* interest, stimulating business in the Gold Board. The London advices, relative to U. S. stocks on Wednesday, were more encouraging, and foreign exchange was more abundant and less firm in price. As a consequence gold receded materially, or from 134⅞ at the close of Tuesday to 133⅞ during the afternoon of Wednesday. The exports of specie on Wednesday were lighter than those of Saturday, having been only $612,833. The Customs demand has been unusually limited for a week or two past, but is on a rather more liberal scale this week. The latest dealings in gold on Wednesday were at 133⅞. The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1867, have been $3,058,048, against $9,552,705 same time last year. The customs demand for Gold last week, averaged $179,620 a day; thus far, this week, it has been equal to $231,000 a day, or equal to a weekly aggregate of $1,386,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $25,438, and from California, none. The total customs revenue of the Government, in coin, at this port, thus far in the current calendar year commencing with Jan. 1, 1867, has been $114,216,411, against $127,495,017 same time in the preceding fiscal year. The total receipts of California gold at this port since Jan. 1, 1867, have been $26,485,800, against $40,694,505 same time last year, showing a decrease this year, of $14,208,705. The exports of specie from this port, last week, were $1,705,420. The total outflow of specie from the port, since Jan. 1, 1867, has been $48,093,994, against $60,497,607 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $238,000, making the total coin interest disbursements through the Government office, since Jan. 1, 1867, $61,501,595, against $47,906,371 for the preceding calendar year. The specie exports from San Francisco, from Jan. 1, to Nov. 7, reached $35,090,814, against $39,370,856 same time last year, showing a decrease, in 1867, of $4,280,042.

Foreign exchange was in light supply and fair request early in the week at firmer and buoyant prices, but has been for a few days more abundant and less sought after, closing decidedly in favor of purchasers. Bankers' 60 day bills on London closed at 109⅞@110⅛, and on Paris to 5.15@5.11¼; sight bills on London to 110¼@110⅝ and on Paris to 5.11@5.10. The offerings of produce bills have been rather more liberal this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,249,109, making the total value of exports since Jan. 1, 1867, $183,443,860, against $182,581,010 same time in the preceding year.

Government securities have been in much better request, since our last, partly on speculative account, but chiefly for investment purposes. The speculative inquiry has been mainly for the Five-twenties of 1862 and 1865, May and November coupons, which have been heavily oversold within the past two weeks, in anticipation of large profits on importations of the bonds from London to meet these *short* sales. The bonds were found to be very scarce, however, in the local market, and when deliveries became obligatory, advanced prices had to be paid to bring out an adequate supply. And now comes the news of a fresh rally in prices abroad, which is having the effect of stimulating the demand in the home markets, and strengthening the confidence of holders. The investment call has been mostly for the later issues of the Five-twenties, which have been very firm and buoyant in price. Seven-thirties have been also in request at well supported figures. U. S. sixes of 1881 closed here on Wednesday at 111¾@111⅞; U. S. Five-twenties of 1862, 108⅜@108⅝; U. S. Five twenties of 1864 at 105@105⅛; U. S. Five-twenties of 1865 at 105⅜@105½; U. S. Five-twenties of 1865, consolidated, 107⅞@108⅛; U. S. Five-twenties of 1867, 108@108⅛; U. S. Ten-forties at 100¾@100⅞, and U. S. Seven-thirties at 104¼@104⅞. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

May, 1865	117⅛	September, 1865	115¾
August, 1865	116¼	October, 1865	115⅛

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Dec. 4.	Dec. 10.	Dec. 18.
Consols	*93	92 13/16	92⅝
U. S. 5-20's of 1862	71⅜	71 9/16	72
Erie	47¾	47¾	50
Ill. Central	89¾	89	89⅞

* Ex-dividend.

Railway and miscellaneous stocks have been more actively sought after by speculative buyers, particularly within the past few days, and prices have been on the advance. The growing ease in Monday tends to augment the speculative temper.

General business has been comparatively dull, since our last. Breadstuffs and provisions have been inactive, closing quite heavily. Cotton has been in fair demand, but variable in price, closing languidly on the basis of 15¾ for middling uplands, per lb. The stock of cotton now here is estimated at about 53,000 bales. The receipts at the port this week, have averaged about 2,000 bales a day. The receipts during the cotton year, ending Sept. 1, 1867, were 657,431 bales, against exports of 470,596 bales. The receipts at all the shipping ports from Sept. 1, 1866, to Aug. 31, 1867, were 1,951,998 bales, against 2,154,476 bales the preceding cotton year; exports, 1,554,664 bales, against 1,557,054 bales the preceding year; estimated stock at close of the year, 80,296 bales against 253,000 bales same time last year. The receipts at all the ports, since Sept. 1, 1867, have been 582,000 bales, against 547,729 bales same time last year; exports, same time, 274,017 bales, against 205,000 bales same time last year; stock on hand at latest dates, 255,000 bales, against 410,000 bales same date last year. Beeves have been fairly active during the week at unsettled prices, inferior to prime selling at from 11@19c., and extra (holiday) at 20@21c.; veal calves at from 8@12½c.; sheep and lambs at 4@7, and 5½@7½c., respectively; and swine at 7½@8⅛c. per lb., all live weight. Week's receipts—3,204 beeves, 481 calves, 27,735 sheep and lambs, and 22,557 swine. Foreign merchandise has been dull and heavy as a rule, since our last. The severe fall in Gold has exercised an adverse influence on values, in the line of imported goods. The total imports of foreign dry goods, last week, were $918,280, and the total amount marketed $558,450. The value of foreign merchandise imported last week, was $3,680,071—making the grand total specie value of last week's imports of dry goods and merchandise, $4,598,351, and since Jan. 1, 1867, $230,864,270, against $273,597,050 same time in the preceding fiscal year. The ocean freight market has been inactive and lower, since our last, with 413 vessels of all classes in port. For Liverpool we quote flour at 2s. 6d.@2s. 9d. per bbl.; grain at 5½d.@6¼d. per bushel; cotton at ¼d.@½d. per lb.; and heavy goods at 22s. 6d.@37s. 6d. per ton, all by sailing vessel.

The New York exports, exclusive of specie, for the week ending Dec. 17, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week	$4,095,672	$3,249,109
Prev. reported	178,485,338	179,678,834
Since January 1	$182,581,010	$182,927,943

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$1,123,269	$918,280
Gen. merchandise	1,879,628	3,680,071
Total for the week	$3,002,897	$4,958,351
Previously reported	240,594,153	226,265,919
Since January 1	$273,597,050	$230,864,270

The balance in the Sub-Treasury on Wednesday was $104,150,790 10.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Railroad Iron.

We learn that the new Furnace of Messrs. Atkins Brothers, of Pottsville, Penn., has been completed. This is the second furnace built by this firm within a very brief period. The capacity of the furnace previously erected is 140 tons of pig iron weekly; the new one will turn out 160 tons—making a total of 300 tons per week. The machinery in these furnaces is of the latest and most approved style. The engines are upright, of 250 horse power each, with boilers and hot blast at the tunnel head. The Thomas hot blast, with all the latest improvements, is used.

The Rolling Mill of this firm has also been recently put in complete order, at an estimated cost of $150,000. This Mill is now turning out about 60 tons of the best quality of Rails per day, and sufficient orders have been received to keep the Mill busily at work until the 1st of January.

Having now two large blast furnaces with a capacity of 15,000 tons yearly, and a rolling mill in excellent order, and owning their own ore banks, machine shops, etc., the Messrs. Atkins are prepared to fill orders for any amount of iron rails. Their long experience, extending over fifteen years, and their well-established reputation, are a sufficient guarantee that the rails turned out by them will be of the very first quality, made of the best material, and in a workmanlike manner. Messrs. Chas. J. Pusey & Co., No. 74 Broadway, N. Y., are sole Agents for the sale of this iron.

☞ At a meeting of the directors of the New York and Oswego Midland Railroad Company, and the representatives of the Montclair Company of New Jersey, recently held in this city, a committee was appointed by the Midland Railroad Company to treat with the Montclair Company for a permanent consolidation of the two roads. By this combination it is intended to carry the Montclair road from Jersey City to Pompton, N. J., to the New York State Line, where it will join the Midland road.

☞ The Dorchester and Delaware Railroad, intended to connect Cambridge, Dorchester county, Maryland, with Seaford, Sussex county, Delaware, has been surveyed and put under contract, and a large force is now at work grading it, and it is confidently expected that the iron will be laid and the work completed next summer. More than a mile is now ready for the rails.

☞ The Middletown, Unionville and Water Gap Railroad was formally opened to Unionville, a distance of 13 miles, on the 11th inst. It is proposed to extend the road to the Water Gap in order to provide greater facilities for the transportation of coal to the towns on the line of the road, now depending on the New York and Erie.

☞ The Montgomery and Erie Railroad, a new branch of the Erie Railway, 10 miles in length, was formally opened on the 12th inst. It connects with the main line at Goshen.

Railroad Earnings.--Weekly.

The earnings of the Chicago and Rock Island Railroad for the second week in December, 1867, were..... $91,500 00
Corresponding week of previous year.. 48,613 00

Increase $42,887 00

The earnings of the Chicago and Northwestern Railroad for 2d week in Dec., 1867 ... $222,376 25
Corresponding week previous year .. 159,564 55

Increase $62,811 70

The earnings of the Detroit and Milwaukee Railroad for the week ending December 12, 1867, were $29,265 00
Corresponding week of 1866..... 23,725 00

Increase $5,540 00

The earnings of the Michigan Southern and Northern Indiana Road for the 2d week in Dec., 1867, were..... $87,327 00
Corresponding week of 1866..... 71,011 00

Increase $16,316 00

The earnings of the Des Moines Valley Railroad for the first week in December, 1867, were $17,769 74; same time in 1866, $12,927 95; increase, $4,831 79.

The earnings of the Michigan Central Railroad for the 1st week in Dec., 1867, were.. $73,976 17
Corresponding week of previous year.. 72,368 59

Increase $1,607 58

The earnings of the Western Union Railroad for the first week in Dec., 1867..... $14,134 10
Corresponding week previous year.... 9,467 48

Increase $4,666 62

The earnings of the Marietta and Cincinnati Railroad the 1st week in Dec., 1867.. $30,597 00
Corresponding week previous year.... 27,040 00

Increase $3,557 00

The earnings of the Toledo, Wabash and Western Railroad for the 2d week of Dec., 1867, were..... $63,139 06
Same week in 1866..... 54,967 53

Increase..... $8,171 53

The earnings of the Atlantic and Great Western Railway for the first week in Dec., 1867, were..... $79,084 00
Corresponding week previous year.... 93,776 00

Increase..... $14,742 00

The earnings of the Chicago and Alton Railroad for the second week in December, 1867, were $46,366 68
Corresponding period previous year.. 38,576 92

Increase..... $7,789 76

☞ We understand that in accordance with the provision of the new Constitution of the State of Maryland, the Board of Public Works, created by that instrument, have lately disposed of all the State's interest in the Baltimore and Ohio Railroad, except in the Washington Branch of said road, the said company giving in exchange the Bonds of the State. The Board of Public Works is constituted of the Governor, Comptroller, and Treasurer of the State.

☞ The Fitchburg *Reveille* says that the project of constructing a new trunk railroad from Troy to Boston, through North Adams, Northampton, Barre and Sterling Junction, is being pushed ahead energetically. The citizens of Ware had a meeting on the subject recently, and sent a committee to Northampton to confer with the friends of the new route in that town.

Iron Bridge over the Allegheny River.

The Railway Bridge across the Allegheny River at Pittsburg, recently rebuilt in a most permanent manner by the Pittsburg, Fort Wayne and Chicago Railway Co., was originally built by the Ohio and Pennsylvania Railroad Company, to complete their connection with the Pennsylvania Railroad at Pittsburgh.

The foundations were begun in the month of August, 1854, and the bridge finished in September, 1857, by the P., F. W. & C. R. R. Co., of which the Ohio and Pennsylvania Railroad was one of the consolidated companies.

The original superstructure for double track was of wood, on the Howe truss plan, with arches for additional strength. The increased traffic on the railway, and with it the larger wear and tear occasioned, in addition to the bridge not being properly protected in the first years after its erection, made it a necessity at a very early day (considering the importance as a main line of trade and travel between the East and West, which the Fort Wayne Railway had acquired,) to provide for its reconstruction.

In the fall of the year 1863, the then Chief Engineer of the Railway Company, John B. Jervis, Esq., after careful examination, submitted and recommended for approval of the President, George W. Cass, Esq., the present plan, an entirely wrought iron structure, designed and calculated in regard to strength in all its details by Felician Slataper, Engineer and Architect of the company, under whose immediate superintendence the work has been executed.

The plan having, during the following winter been adopted, a contract was made with CHARLES J. SCHULTZ, of Pittsburgh, for the construction of its iron work, which was commenced in the spring of the year 1864.

The original structure consisted of seven spans of various length, being in all 1,172 feet long. On account of the peculiar form and location of the company's freight yard at Pittsburgh, between the bridge and Penn street, it was found necessary to place the switches that connect the large number of tracks in their yard as far as possible out on the bridge, in order to use the ground in the most economical and advantageous manner, and to facilitate the lengthening of these tracks for the contemplated new and large freight houses required for the accommodation of the constantly increasing business of the railway company.

To accomplish this an additional pier 101 feet long was built on the wharf, under the first span on the Pittsburgh side, and the abutment extended parallel with the river along Duquesne Way to 148 feet in length. By this arrangement the bridge as now constructed opens gradually like a fan towards the Pittsburgh freight yard, being at the narrowest part, next to the main span, 55 feet in width and extending out 176 feet in length, to the point where it connects with the yard, where the width is 138 feet. The surface thus gained, being equivalent to nearly two-fifths of an acre of additional ground, is covered over between the rails with three inch oak plank fastened on the solid oak floor beams of the bridge, which are placed eighteen inches apart.

For symmetry and economy in the construction, another pier was also built on the wharf at the Allegheny city end span of the bridge. At both of these end spans the tracks are now supported from below by strong iron plate girders, made entirely of plate and angle iron, all well riveted and substantially braced together.

The two western spans have each 3 girders 89 feet in length and 6 feet 6 inches deep, to support the double line of railway, the middle one being made proportionately stronger.

In the two eastern spans, which form the above mentioned addition to the yard, 18 iron plate girders, varying in length from 86 to 93 feet, all 6 feet 1 inch deep, are placed, distributed according to the track they are intended to support.

The five large spans over the main part of the Allegheny River are built for a double line of railway, with one projecting foot path on the outside, consisting of three main girders, one on each side, and one in the centre between the ways. The average length of the spans is 153⅙ feet in the clear, with a bearing of five feet on each pier. The depth of the girders is 19 feet. The clear width between the outside and the central girders is 14 feet, except the south part of the first main span, where it widens from 14 feet at one end to 32 feet at the other.

The top and bottom sections of the girders are in the form of the letter T, but they, as well as all other parts, are carefully arranged so as to insure as much as possible uniform strength for the bridge throughout, in proportion to the effects produced upon it by the load. The cross sectional area of the top chord consists of four thicknesses of iron laid one over the other, well riveted and forming together a plate 2¾ inches thick, and 24 inches wide in the centre part of the girder, and diminishing gradually to about two-thirds its cross section at the ends, where it rests on the piers. In addition to which, there are two large angle irons, 9 inches by 3½ inches by ⅞ to ½ inch thick, and two vertical bars 12 inches by ⅜ inch on the inside between the angle iron, running along the centre of the horizontal plates which form the top and bottom portion of the girders, to which they are attached by two of the angle irons, the other two serving to join the flanges to the bars which form the vertical web.

The cross sectional area of the bottom chord consists of two thicknesses of iron well riveted, forming together a plate, in the centre part 2¼ inches thick and 27 inches wide, the balance of the construction being similar to the top chord.

The vertical web is composed of lattice work, which is formed with two sets of bars 6 inches wide, crossing each other, and inclined to the top and bottom at an angle of 48 degrees, and forming a net work, the distances of the crossing apart being 2 feet 1 inch between the centres of the rivets, measured along the bars the thicknesses of the bars increasing from ¼ inch at the centre part to ⅝ inch at the end of the girders. They are secured at their crossings by two rivets. The lattice work is stiffened by vertical angle irons fixed double on both sides, at distances of about 8 feet apart. The central girder has about three-fourths more iron in the cross section than the outside girders.

All the iron work is well braced and tied together above and below by a system of transverse and diagonal rods.

The ways inside, to insure proper elasticity, are supported by white oak floor beams, at intervals of two feet apart between centres, on which the steel rails for the railway are fastened.

The following amount of iron was used in the 24 plate girders of the end spans, including bracing, tie rods, &c.:

	Pounds.
Plate iron.....	540,900
Bar do.....	69,800
T and angle iron.....	142,600
Rivets	45,400
Cast iron bed plates	49,300
Total	848,000

The five main spans of lattice girders contain:

Plate iron	1,190,600
Bar do	592,100
T and angle iron	718,600
Rivets	133,000
Cast iron bed plates	73,700
Total	2,708,000

Over 350,000 rivets (each of which was required to be made red hot before they were driven home in their respective places) were used to connect together the above described 1,778 tons of iron.

The cost of the iron bridge superstructure proper was $435,000. The total cost, including additional masonry, temporary support of tracks, and other incidental expenses, $530,000.

The iron, of a superior quality, has been furnished for the whole structure by Messrs. Jones & Laughlins, of the American Iron Works, Pittsburg.

The principle of the construction is known as the lattice girder plan with vertical stiffening, and the structure is believed to be the only one of the kind in the United States, although the principle is used very extensively, in modified forms, on the German, Russian and Italian Railways.

U. S. Mint.

The deposits of bullion at the U. S. Mint and branches during the last fiscal year were; Gold, $40,069,200 06; silver, $1,823,900 70. Total deposits, $41,893,100 76. Deducting from this total the redeposits of bullion, or bars, made at one branch of the Mint, and deposited at another for coinage, the amount will be $34,537,048 39. This amount exceeds the deposits of the preceding year by $2,625,329 15. The coinage for the same period was as follows: Gold coin, pieces, 1,469,-482; value, $28,217,187 50. Unparted and fine gold bars, $11,621,691 32. Silver coin pieces, 2,074,902; value, $986,871; bars, $575,823 18; nickel-copper and bronze coinage, pieces, 50,566,-000; value, $1,879,540. Total number of pieces struck, 54,110,384. Total value of coinage, $43,-281,113.

☞ The Worcester *Gazette* says that the Providence and Worcester Railroad Company intend to petition the general court for power to increase the capital stock of the corporation to two millions of dollars, and for power to locate a branch of the road through Attleborough. Business in the Blackstone Valley has grown beyond the original capital of the company, and public necessity requires more accommodations on the road between Providence and Worcester, which the corporation is ready to furnish, if it is permitted by the Commonwealth.

☞ The surveyors of the proposed route for a railroad from Springfield, Mass., to the Hudson River, report that it will cost only $20,000 a mile to construct the railroad to the New York State line by the Winsted route, while it will cost $55,-000 a mile to build it by way of Danbury, and $32,000 by the way of Litchfield.

☞ The Raritan and Delaware Bay Railroad Company has given notice that application will be made to the next Legislature for a supplement to their charter to extend their road to the Delaware River, and legalize their railroad as at present constructed.

☞ A through freight train from Philadelphia *via* the Lehigh and Susquehanna Railroad arrived in Scranton on the 11th inst., being the first train of the kind which had passed over the road.

The Pacific Railroad.

In response to a resolution of the Senate, the Secretary of the Interior has submitted an official statement showing the number of miles completed on the Pacific Railroad and each of its several stems or branches. He certifies that the Union Pacific Railroad, main stem, has been completed and accepted for 510 miles west from the initial point at Omaha; that the Union Pacific Railroad, Eastern Division, has been completed and accepted 305 miles west from the initial point on the boundary line between Missouri and Kansas; that the Union Pacific Railroad, Central Branch, has been completed and accepted 80 miles, beginning at Atchison, Kansas; that the Central Pacific Railroad has been completed and accepted 118 miles, beginning at Sacramento and running east; that the Central Pacific Railroad has been completed and accepted 20 miles, beginning at San Jose, Cal., and running South.

Pittsburg, Ft. Wayne & Chicago Railway.

The earnings and expenses of this road for the months of November, 1866 and 1867, have been as follows:

	1866.	1867.
Earnings	$679,934 51	$691,005 08
Expenses	356,963 47	434,468 65
Net earnings	$322,971 04	$256,536 43

This shows an increase in earnings of $11,070 57; with an increase in expenses of $77,505 18—making the decrease in net earnings, $62,434 61.

The earnings and expenses from January 1, to November 30, 1866 and 1867, were:

	1866.	1867.
Earnings	$6,911,995 33	$6,661,559 60
Expenses	4,675,884 32	4,430,953 04
Net earnings	$2,236,111 01	$2,230,606 56

This shows a decrease in earnings, during the eleven months, of $250,435 73; with a decrease in expenses of $244,931 28—making the decrease in net earnings, $5,504 45.

☞ The Dutchess and Columbia Railroad is now all under contract. A large force is at work on a rock cut at Glenham. One of the largest gangs is at work at Slab City, within a short distance of Pine Plains. Three miles of embankment are already thrown up at Fishkill Village. At Washington Four Corners a force of men are engaged on a side hill which is being rapidly graded.

☞ The new bridge of the Ohio and Mississippi Railroad Company over the Great Miami River is composed of three spans, each 210 feet in length and 25 feet in height, known as the Fink (iron) Truss. It is considered the finest in the State of Ohio. Regular trains passed over the new bridge on the 15th inst.

☞ The line of the St. Louis and Cedar Rapids Railroad has been located from Sigourny *via* South English, to Williamsburg, in Iowa County, Iowa. Major Douglass is Chief Engineer of the road.

☞ The Rutland Railroad Company, just organized, takes control of the Rutland and Burlington road, and the old bonds are transferred into new stock.

☞ The second track between Poughkeepsie and Albany has been completed, giving a continuous double track from Albany to New York.

New York Central Railroad.

The following gentlemen were elected directors of this company on the 11th inst.: Cornelius Vanderbilt of New York; Chester W. Chapin of Springfield, Mass; Daniel Torrance of New York; William H. Vanderbilt of New York; Amasa Stone, jr., Cleveland, Ohio; Horace F. Clark of New York; James H. Banker of New York; James F. Joy of Detroit, Michigan; Augustus Schell of New York; Samuel F. Barger of New York; H. Henry Baxter, New York; Joseph Harker, New York; William A. Kissam, New York. Inspectors of Election: Sidney F. Fairchild, Albany; Lansing Pruyn, Albany; Nicholas B. La Bau, New York. Cornelius Vanderbilt, President; Daniel Torrance, Vice-Ppresident. Upward of $20,000,000 of stock was voted on. There was no opposition.

Baltimore and Ohio Railroad.

John W. Garrett, Esq., President of the Baltimore and Ohio Railroad Company for the last nine years, has been re-elected to that position, having been prevailed upon to reconsider his determination to retire with the close of the present year. This powerful corporation now owns and controls over six hundred miles of railway, reaching from Washington to Columbus, Ohio, it having secured within the past year a forty years lease of the Central Ohio road. They are now engaged in building a line from Washington to Point of Rocks, in order to shorten the distance to western points by forty miles.

☞ The Toledo, Wabash and Western Railroad Company intend building a branch road from Decatur, Ill., to St. Louis. At Decatur it will connect with the Illinois Central. This enprise will soon be formally commenced and prosecuted to completion. The route from Decatur to St. Louis is found to be, by the survey, 106 miles long, and such is the lay of the country that the road, for the most of the way, may be constructed at comparatively light expense.

☞ In the U. S. House of Representatives on the 11th inst., Mr. Ketchum of New York from the Committee on Military Affairs, reported back the bill introduced by Mr. Robinson, giving consent of the United States to the Hudson River Western Shore Railroad Company to construct and operate its railroad on the shore line across the property belonging to the government at West Point. The bill read was the third time and passed.

☞ An important decision has just been delivered at Supreme Court Chambers by Mr. Justice Ingraham, in the case of Pitt Cooke against the State National Bank of Boston, in which he held that the National Banks located in other States or counties may be sued in the Courts of this State, and that National Banks organized under the act of Congress are foreign corporations within the meaning of the statutes of New York, and may be proceeded against by attachment.

☞ The Honesdale *Republican* says that but one mile of the Jefferson Railroad between that place and Hawley, remains to be graded. The laying of the track will be commenced at each terminus, as soon as the iron is received. It is expected every day. The ties, spikes, and chairs are all ready.

☞ It is stated that the Governor of Alabama has perfected arrangements in New York for paying the interest on the foreign debt due January 1, 1868, and also secured an extension of time for the payment of the temporary loan heretofore negotiated in New York, until the same can be paid from the collection of taxes, which saves the sale of State bonds under the present depressed condition of Southern securities.

☞ The Chesapeake and Ohio Canal has been closed for the season. The shipments of coal have exceeded those of any previous year. The clearances of boats from Cumberland for the year were 4,224, carrying about 450,000 tons of coal. Last year 3,165 boats cleared, carrying about 343,000 tons of coal.

☞ The Directors of the consolidated line of railroad, comprising the Milwaukee and Prairie du Chien route, the North McGregor route, and the Minnesota Central route, have resolved to call the new consolidation the "Milwaukee, St. Paul and Minneapolis Railway."

☞ The Iowa Falls and Sioux City Railroad has been lately organized with John J. Blair, as President, Platt Smith, Vice President, Joseph Herod, Secretary, W. W. Walker, Treasurer, and John F. Duncombe, Attorney.

UNION PACIFIC R. R. CO.

NOTICE.

THE COUPONS OF
THE FIRST MORTGAGE BONDS
OF THE
UNION PACIFIC RAILROAD CO.;
DUE JAN. 1st, 1868.
WILL BE PAID ON AND AFTER THAT DATE.
IN GOLD COIN,
FREE OF GOVERNMENT TAX,
At the Company's Office, No. 20 Nassau St., New York.
JOHN J. CISCO, *Treasurer.*

CHARLES J. PUSEY & CO.,
74 Broadway, & 9 New St.,
NEW-YORK.
COMMISSION MERCHANTS FOR THE SALE OF
Pig, Merchant Bar & Railroad Iron & Supplies
OF EVERY DESCRIPTION.

Sole Agents for the Sale of Atkins Bros' make of Railroad Iron. Their Works being located in the coal & iron districts of Pennsylvania, & having their own Ore Mines, Blast Furnaces and Machine Shops, all under their ownership and control, in connection with their extensive Mills, which have recently been greatly enlarged and improved, enables them, with their long experience, to produce Rails, which for evenness and regularity of quality and finish, cannot be excelled anywhere.

Rails of any required weight or pattern furnished on short notice.

CHAS. J. PUSEY,
HANSON E. ATKINS,
CALEB H. MALIN.

MILLIKEN & BOLLER,
40 EXCHANGE PLACE, N. Y.,
Sole Agents of the
PHŒNIX IRON CO.
Rails, Girders, Rolled Beams up to 15 in.
Wrought iron Chairs, Spikes, Shafting, &c.
Iron Bridges and Roofs,
Of any design to suit Engineers & Architects. All kinds of Fire Proof Construction,
Patent Wrought Iron Columns and Weldless Links,
Smith's Suspension Joint Chair.
S. MILLIKEN, Jr. ALF. P. BOLLER, Civ. Eng.

Principal and Interest Payable in Gold Coin.

SECURE PROFITABLE INVESTMENT.

THE
Central Pacific Railroad
First Mortgage Thirty-Year Six Per Cent. Coupon Bonds,

Principal and Interest Payable in Gold Coin,

Represent the preferred claim upon one of the MOST IMPORTANT LINES OF COMMUNICATION IN THE WORLD, as it is the sole link between the Pacific Coast and the Great Interior Basin, over which the immense overland travel must pass, and the

Main Trunk Line across the Continent.

The road is now nearly completed from Sacramento to the Richest Mining Regions in the Salt Lake Basin, and is being rapidly carried forward by the largest force of laborers ever employed by any Railroad Company on this Continent.

The natural, legitimate, commercial business of the road surpasses all previous expectation, and is profitable beyond parallel, even among the oldest roads in existence. The Earnings and Expenses for the Quarter ending Oct. 31, were as follows, IN GOLD:

Gross Earnings.	Operating Expenses.	Net Earnings.
$593,847.92	$102,088.61	$491,759.31

This result, however, would have been far greater but for the inability of wagon teams to forward the freight and passengers from the temporary terminus in the mountains.

The United States Government and the State and Cities of California have so aided and fostered the Great Enterprise, that the Company will assume very light annual Interest obligations, and will have the following ample Resources at command for the Construction:

DONATIONS in Lands, Bonds, Concessions, etc., (without lien)	$12,800,000
CAPITAL STOCK, Net Earnings, etc, (no lien)	11,000,000
LOANS (subordinate lien)	3,000,000
U. S. SUBSIDY BONDS, 736 miles, (subordinate lien)	25,517,000
FIRST MORTGAGE BONDS	25,517,000
Resources, first 736 miles	$77,834,000

The FIRST MORTGAGE BONDS are in sums of $1,000 each, with semi-annual gold coupons attached, and are offered for sale, for the present, at 95 per cent. and accrued interest from July 1st, in currency, at which rate they yield nearly NINE PER CENT. UPON THE INVESTMENT.

These Bonds, authorized by the Pacific Railroad Acts of Congress, are issued only as the work progresses, and to the same extent only as the Bonds granted by the Government, and are the prior lien upon the whole valuable property furnished by the above Resources. They possess special assurances and advantages over other Corporate Securities, and are destined to rank among THE BEST INVESTMENTS IN THE WORLD, from their unusual attractions of safety, soundness and profit.

Conversions of Government Securities
INTO
Central Pacific First Mortgage Bonds,

now realize for the holders from 12 to 18 per cent. Advantage, WITH THE SAME RATE OF INTEREST.

Bonds can be obtained through the subscribers directly, or through responsible Banking agencies.

Bonds, Descriptive Pamphlets, Maps and information can be had at the

Office of the C. P. R. R. Co., No. 54 William St., N. Y., and of

FISK & HATCH,
Bankers & Dealers in Government Securities,
and Financial Agents of the C. P. R.R. Co.
No. 5 Nassau St., N. Y.

THE
National Trust Co.
OF THE CITY OF NEW YORK,
No. 336 BROADWAY.
CAPITAL,
ONE MILLION DOLLARS.
DARIUS R. MANGAM, President.

The National Trust Company receives the accounts of Banks, Bankers, Corporations and Individuals, and allows

FOUR PER CENT. INTEREST

On daily balances, subject to Check at sight.

Certificates payable on demand are issued at the same rate.

Special Deposits for one year or more may be made at five per cent.

JERSEY CITY
LOCOMOTIVE WORKS
FOR SALE.

THE WELL KNOWN LOCOMOTIVE WORKS AT Jersey City, known as the Jersey City Locomotive Works, comprising 24 full lots of lands, with substantial and well arranged buildings thereon, together with the machinery and tools, which are in excellent order, and of the best description, and capable of turning out 6 to 8 first class locomotives per month.

The character of the work turned out of the shops of this company is well known, and has a high reputation on most of the leading railroads in the United States. Adjoining and connected with these works are also offered for sale, 26 lots of grounds with the buildings thereon, and which, added to the property of the Jersey City Locomotive Works, make the whole one of the most desirable establishments for the manufacture of locomotive engines and other machinery in the country. The price and terms will be made highly favorable, as the parties interested are solicitous to close up the concern. Apply to

CHARLES KNEELAND, 49 William street.
W. G. HAMILTON, 21 Broadway.
4149 McANDREW & WANN, 12 Pine street.

525 MILES
OF THE
Union Pacific Railroad
Running West from Omaha
Across the Continent,
ARE NOW COMPLETED.

This brings the line to the eastern base of the Rocky Mountains, and it is expected that the track will be laid thirty miles further, to Evans Pass, the highest point on the road, by January. The maximum grade from the foot of the mountains to the summit is but eighty feet to the mile, while that of many eastern roads is over one hundred. Work in the rock-cuttings on the western slope will continue through the winter, and there is now no reason to doubt that the entire grand line to the Pacific will be open for business in 1870.

The means provided for the construction of this Great National Work are ample. The United States grants its Six Per Cent. Bonds at the rate of from $16,000 to $48,000 per mile, for which it takes a *second lien* as security, and receives payment to a large if not to the full extent of its claim in services. These bonds are issued as each twenty-mile section is finished, and after it has been examined by United States Commissioners and pronounced to be in all respects a first-class road, thoroughly supplied with depots, repair shops, stations, and all the necessary rolling stock and other equipments.

The United States also makes a donation of 12,800 acres of land to the mile, which will be a source of large revenue to the Company. Much of this land in the Platte Valley is among the most fertile in the world, and other large portions are covered with heavy pine forests and abound in coal of the best quality.

The company is also authorized to issue its own First Mortgage Bonds to an amount equal to the issue of the Government and no more. Hon. E. D. Morgan and Hon. Oakes Ames are Trustees for the Bondholders, and deliver the Bonds to the Company only as the work progresses, so that they always represent an actual and productive value.

The authorized capital of the Company is One Hundred Million Dollars, of which over five millions have been paid in upon the work already done.

EARNINGS OF THE COMPANY.

At present, the profits of the company are derived only from its local traffic, but this is already much more than sufficient to pay the interest on all the Bonds the Company can issue, if not another mile were built. It is not doubted that when the road is completed the through traffic of the only line connecting the Atlantic and Pacific States will be large beyond precedent, and, as there will be no competition, it can always be done at profitable rates.

It will be noticed that the Union Pacific Railroad is, in fact, a *Government Work*, built under the supervision of Government officers, and to a large extent with Government money, and that its bonds are issued under Government direction. It is believed that no similar security is so carefully guarded, and certainly no other is based upon a larger or more valuable property. As the Company's

First Mortgage Bonds

are offered for the present at NINETY CENTS ON THE DOLLAR, they are the cheapest security in the market, being more than 15 per cent., lower than U. S. Stocks. They pay

SIX PER CENT. IN GOLD,

or over NINE PER CENT. upon the investment. Subscriptions will be received in New York at the Company's Office, No. 20 Nassau street, and by

CONTINENTAL NATIONAL BANK, 7 Nassau st.,
CLARK DODGE & CO., Bankers, 51 Wall st.,
JOHN J. CISCO & SON, Bankers, 33 Wall st.,

and by the Company's advertised Agents throughout the United States. Remittances should be made in drafts or other funds par in New York, and the bonds will be sent free of charge by return express. A NEW PAMPHLET AND MAP, showing the Progress of the Work, Resources for Construction, and Value of Bonds, may be obtained at the Company's Offices or of its advertised Agents, or will be sent free on application.

JOHN J. CISCO, Treasurer, New York.

COLLINS & CO.'S NEW PATENT SCREW WRENCH.

THE STRONGEST AND MOST DURABLE WRENCH IN MARKET.

All Consumers have noticed that their wrenches first fail by reason of the forcing back of the handle, and by the springing of the bar. Our improvement remedies both these defects, the bars being finished wider than any other wrench in market, and the handle cannot be displaced, as all strain on it is prevented by the screw thimble, D, (see cut.) Already adopted as *the best* by the principal railroads and machine shops, and for sale by Hardware dealers generally. Address

COLLINS & CO., 212 Water Street, New York.

OFFICE OF THE ILLINOIS CENTRAL RAILROAD CO.,
NEW YORK Dec. 16, 1867.

THE BOARD OF DIRECTORS OF THIS COMPANY have declared a dividend of five per cent. in cash, free of Government tax, to be paid on the first day of February next to the holders of the full-paid shares registered upon the books of the Company on the 18th day of January next. The transfer-books to be closed from the 18th day of January until the 5th day of February next.

THOMAS E. WALKER, Treasurer.

IRON BRIDGES.

THE undersigned is prepared to Manufacture and Build in any part of the United States, at reasonable terms, Fink's Patent Iron Bridges, Plate and Lattice Bridges, Plate Girders for Fireproof Buildings, Iron Roofs, Ba'ls, etc For plans and particulars apply to

C. J. SCHULTZ,
Cor. of Wayne St. & Duquesne Way.
PITTSBURGH, PA.

Or Address
Letter-Box No. 1,392, P. O.

TO RAILROAD CAR BUILDERS AND OTHERS.

The undersigned, being the duly authorized Agent in the United States for the sale of **PEACOCK & BUCHAN'S CELEBRATED AND APPROVED PAINT COMPOSITIONS**, Nos. 1, 2, 3, and 4, solely manufactured in Southampton, England, invites the attention of Railroad car builders, owners and others to the PAINT COMPOSITION No. 3, IN ALL COLORS AND TINTS. It is hermetically soldered up in convenient sized tins of 7 lbs., 14 lbs., and 28 lbs. each, and warranted to keep good in any climate for many years. Being MIXED READY FOR IMMEDIATE USE, it will be found of great advantage, as it can be packed away like preserved meats, and will not deteriorate. It has been opened after TEN YEARS and found to be quite good and READY FOR USE. Being ground first on roller mills of polished granite, and then of burnished steel, by steam power, it is as fine as artist's color, and is applicable to the first-class Railroad Car, Counting House, or Drawing-Room, or the cabin of the yacht, steamer, or sailing ship—each tin forming a ready Paint Pot. It dries in a few hours, with a beautiful brilliant surface, without any stickiness or unpleasant smell, and stands longer than ordinary paint—never blistering, cracking, or flaking. IT IS GENERALLY ADOPTED BY THE CHIEF RAILWAY COMPANIES OF EUROPE, AND IS **CHEAPER AND BETTER THAN ANY OTHER** PAINT IN THE MARKET.

J. M. ALLEN, Sec. and Treas. **LICENSES GRANTED.**

PLASTIC SLATE
FOR
Roofing & Other Purposes.
The process of reconstructing Slate Stone from a disintegrated state was
PATENTED FEBRUARY 21st, 1865,
It is a combination of
Pulverized Slate and Viscous Matter,
(the latter possessing qualities of geological and chemical affinity for the former,) and is a development of one of the simple but unalterable tendencies of nature.
As a Roofing Material it Stands Unrivalled.
A mastic—it adapts itself to every shape and slope. Non-combustible, impervious, non-expansive, and undecaying.
Frost does not Crack nor Heat Dissolve it.
The only roofing material ever discovered that will resist the action of the elements as long as the structure it protects. Being susceptible of little, if any wear, from exposure, and
Perfectly Fire-Proof,
It is unequalled as a coating for Railroad and Farm Buildings, Fences, Bridges, bottoms of Vessels, Vaults, etc.

ESTABLISHED IN 1836.

ENGINEERING WORKS.

ENGINEER'S FIELD BOOK,
By C. S. CROSS, Civil Engineer.
THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—
1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.
It is a plain, clear and most valuable book for practical Railroad Engineers. **Sent free by mail,** upon receipt of the price. For sale at this office. Price **$1.50.**

LYONS' TABLES.
To Civil Engineers and Contractors.
FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

SHEET No.			SHEET No		
1.	General Table for all Bases and all Slopes.		13.	for Base 18 ft. Slop.	1½ to 1
2.	For Side Hill Cuts and Fills.		14.	" " 20 "	1½ to 1
3.	Base 12 ft. Slopes	1½ to 1	15.	" " 24 "	¾ to 1
4.	" 14 "	1½ to 1	16.	" " 24 "	1½ to 1
5.	" 15 "	¾ to 1	17.	" " 25 "	1½ to 1
6.	" 15 "	1 to 1	18.	" " 26 "	1½ to 1

American Railroad Journal.

New York, Saturday, December 28, 1867.

Mexican Railroad.

The *El Diario Oficial*, says that the grant to the English Company for the construction of the railroad between Vera Cruz and the City of Mexico, which the Government considered forfeited, on account of the acceptance by the said company of a charter from Maximilian, dated Jan. 25, 1865, has been re-affirmed. The provisions of the grant are as follows: The Government requires the completion of the Puebla branch on or before the 31st December, 1868, and the finishing of the main line, between Apizaco and Paso del Macho, on or before the 31st December, 1871; it reserves to itself the right of making the concession claimed by Don Ramon Zangronis for a road to Vera Cruz, *via* Jalapa; grants the company the right to take all lands belonging to the national domain, free of charge; requires it to pay for all property taken from the States, towns or individuals; for a period of ten years material of all kinds used upon the road, in any way, shape or manner, is to be imported free of duty: for the same period it is exempted from payment of taxes, contributions, loans or any other impost or duty upon the work; the company is granted the privilege of exporting free of duty, for a period of twenty-five years, the sum of $560,000, as payment of interest, dividends, &c.; employees are exempted from all military service, except in case of foreign war; the plans of the work cannot be altered without the consent of the Government; the company is to carry the mails free; it cannot mortgage its property without the consent of Government, but has the right of dividing up its stock and disposing of the same to any one or anywhere it sees fit; all suits relating to the work can only be decided in accordance with Mexican law and before Mexican tribunals, and it is expressly understood that it shall never enjoy the privileges conceded in the *derecho estrangeria*. The property is to remain forever that of the stockholders. The Government solemnly agrees to pay to the road, for a period of twenty-five years, without receiving any benefit or income therefrom, the sum of $560,000, and appropriates twenty per cent. of all receipts from customs for this purpose. It instructs the Minister of Fomento to issue orders upon the Custom-houses furnishing the same to the company, who are required to keep a supply of same on hand, and not to dispose of them at higher rates than those fixed upon, in the event of the work being delayed by revolutions or other obstacles beyond the control of the company. All munitions of war, troops and all Government property, as also immigrants introduced under Government auspices, are to be carried at fifty per cent. less than the regular tariff; it rescinds the article binding the company to build a penitentiary and hospital in the City of Mexico. A month's suspension of labor, without just cause, is liable to result in a forfeiture of the Government appropriation, and subjects the company to a fine of $25,000 per month; the company is obliged to liquidate the accounts of all contractors and sub-contractors, both those who have been and those who may be engaged in the enterprise. In the event of the interpretation of any clause or clauses of this decree not being understood, the point in contest is to be decided by the Federal tribunals. The following is the tariff for freight and passengers.

Freight.—First class, $14 for 16 arrobas, (400 pounds;) second class, $12; third class, $10.

Passengers—First class, per head, $30; second class, $21 15; third class, $12.

The work will now progress rapidly, and will do much toward relieving the present state of inactivity by giving employment to many thousands of men now idle and in need.

Sioux City and Pacific Railroad.

This road diverges from the Iowa Division of the Chicago and Northwestern Railway, at Missouri Valley Junction (formerly (St. Johns Station) 21 miles east of Council Bluffs, and follows a northerly course, up the Missouri Valley to Sioux city, 74 miles from the Junction, and by this route, 541 miles from Chicago. The whole of the grading has been done, and some 54 miles of the track laid from the Junction, leaving but 20 miles to be laid to carry it to Sioux City. It is thought that the road will be opened through by the month of February. Freight and passenger trains now run regularly to Onawa, a distance of 40 miles, to which point the road was opened on the 14th inst. The road bed, bridges, station houses, etc., are permanently and thoroughly constructed, and the road is said to be a model one in all respects. We learn that arrangements have been perfected for a line of boats next year, from Sioux City to Fort Benton, Montana, to run in connection with this road. Hon. John I. Blair, of New Jersey, is President of the company; W. W. Walker, Gen'l Superintendent; and L. Burnett, Assistant Superintendent, who also have charge of the work of construction.

Railroad from Newburgh to Walden.

A railroad meeting was held at Newburgh, N. Y. on the 10th inst., at which a resolution was passed appointing a committee of three, to consist of E. A. Brewster, James W. Taylor, and Thomas George, to prepare a bill to be passed at the next meeting of the Legislature, authorizing the city of Newburgh to issue its bonds not exceeding 10 per cent. on its taxable property, in aid of the construction of a railroad from Newburgh to Walden, in the town of Montgomery, or if, after consultation with the Wallkill Valley R.R. Co., it shall be found necessary, to the Shawangunk town line—a part of which may be used in aid of the construction of other roads connecting with it.

Nashville and Decatur Railroad.

The President and Directors submit the following as the first annual report, for the fiscal year, commencing with the consolidation on the 1st January, and closing on the 30th September, embracing a period of nine months.

The earnings and expenses for that period are as follows:

Earnings	$374,038 98
Expenses	263,807 10
Net earnings	$110,231 88

The following exhibit shows the amount of indebtedness and means, to wit:

State loan		$2,115,176 25
Tennessee and Alabama income b'ds		205,000 00
Franklin Turnpike bonds		46,625 00
Total bonded debt		$2,366,801 25
United States Government	$294,927 00	
Bills payable	248,851 81	
Individuals and connecting roads	91,982 71	
Indebtedness of T. & A. R. R. unadjusted	47,432 64	
Total floating debt		678,194 16
Total indebtedness		$3,044,995 41
Tennessee State bonds	$367,920 00	
Due from agents and conductors	5,483 51	
Due from U. S. Government	7,858 95	
Cash in hand of Treasurer	16,927 85	
Total available means		398,190 31
Showing an excess of		$2,646,805 10

As there is no means of ascertaining correctly the original cost of your road, because of the destruction of the books of two of the companies, the following is given as an approximate estimate of the value of your property and assets, to wit:

120 m. of road and real estate, at $33,000 per mile		$3,960,000 00
Mt. Pleasant Branch, 12½m., as it is, $15,000 per mile		187,500 00
Equipment, material and supplies		570,841 00
Franklin Turnpike, original cost		58,550 00
Total value of property		$4,776,891 00
From which deduct for bonded debt as per foregoing exhibit	$2,366,801 25	
Balance of floating debt	280,003 85	
		2,646,805 10
Showing an excess of		$2,120,085 90

of assets over and above the amount of liabilities.

Your first object should be to keep up and improve your road, pay off your floating debt, and leave only the interest upon your funded debt to be provided for, and then, and not until then, can you expect cash dividends. To meet this difficulty, and to enable the company to be relieved of the floating debt by funding the same, it was proposed, and authority obtained from the Legislature of the State of Tennessee, for the company to issue five hundred thousand dollars of income bonds. In the report made in April last, the action of the Board in regard to these bonds was fully set forth, to which allusion is hereby made as a part of this report. These bonds have been prepared in strict accordance with the law, and the instructions of the Board, and the President, by a resolution of the Board, is empowered and fully authorized to dispose of the same. They were issued for the purpose of absorbing, by substitution, the income bonds of the Tennessee and Alabama R. R. Co., amounting to $205,000, which fall due in April, 1870, and the floating debt of the company. They are made payable at the office of the company, in the city of Nashville, and it is not intended to send them abroad, but to keep them at home for sale.

Stock liabilities are not included in the above, for the reason that the stock books of the Tennessee and Alabama Railroad Company were badly mutilated, and those of the Tennessee and Alabama Central were partially destroyed during the war, and it was found impossible to make up fully the stock accounts of those companies from the books; and from the further fact that the stockholders have failed to present their certificates of stock for adjustment and renewal, although they have been urged and entreated in various ways to do so. Delay upon the part of stockholders, and holders of scrip or tax receipts, is productive of harm, not only to the company, but also to stockholders, who may, by this neglect, finally lose their stock altogether.

The following exhibit shows the condition of the stock, so far as ascertained:

T. & A. R. R. stock, cert. by N. & D. R. R. Co		$542,931 80
Do. not adjusted		77,684 31
C. S. R.R. stock, cert. by N. & D. Co.		183,472 78
Do. not adjusted		127,663 14
T. & C. stock, certified by N. & D. Co.		99,123 65
Do. not adjusted		139,742 74
Giles Co. and Columbia scrip, cert. by N. & D. Co		20,330 38
Do. outstanding		161,210 84
Limestone Co. scrip, cert. by N. & D. Co		9,708 83
Do. outstanding		164,591 17
Total capital stock and liabilities		$1,526,459 14

Efforts are now being made to extend the New Orleans, Jackson and Great Northern Railroad, and if accomplished, the Mt. Pleasant Branch would constitute a part of that line, and would prove a very strong competitor for the business between Louisville, Nashville and New Orleans, and would be an important link in the line, whenever the Tennessee and Pacific Railroad shall be built; and while this is true, yet it is held and believed by some that the best route for the extension of that road is to Memphis, *via* Savannah and Grand Junction, crossing the Mobile and Ohio Railroad some 30 miles north of Corinth; thus making important connections with the Mobile and Ohio Railroad, the Mississippi Central Railroad at Grand Junction, and with Memphis, and the net work of railways extending west of that city. The construction of the Tennessee and Pacific Railroad, *via* Knoxville to Nashville, would greatly increase its importance as a competing route for the traffic between Washington and the Southwest. This route would be some ten miles shorter from Nashville to Memphis than by way of the Nashville and Northwestern Railroad. * *

The estimate of the cost of the road from Decatur to Elyton, 90 miles, as made by John T. Milnor, Chief Engineer, in 1866, is $2,293,267 20.

There are two other projected roads from Decatur, either or both of which would, if constructed, prove advantageous to your interest. The first is the one from Decatur to Atlanta. By its construction, you will be put in direct communication with the system of railways in middle and Southern Georgia, giving you as short if not a shorter route from Nashville to Atlanta, by way of Decatur, than by way of Chattanooga, as the following table of distances will show:

	Miles.
Nashville to Chattanooga	151
Chattanooga to Atlanta	136
Total	287
Nashville to Decatur	122
Decatur to Atlanta	160
	282
Difference in favor of Decatur	5

This road is under the especial care of the Memphis and Charleston Railroad Company, who are deeply interested in its construction, as it will give almost an air line from Memphis to Charleston.

The other route is the one projected from Decatur to intersect the New Orleans, Jackson and Great Northern Railroad at Canton or Jackson—the latter would be the better point, for the reason that at that place immediate connection would be had not only with the New Orleans, Jackson and Great Northern Railroad, but also with the Vicksburg and Meridian road. If this road is built, it will be as direct and as short a line as any now projected to New Orleans, Vicksburg, and other important points in the Southwest. It would cross the Mobile and Ohio road in the vicinity of Columbus, Miss; and as it will penetrate the coal and iron region of North Alabama, through which it passes, the States of Mississippi, Louisiana and Texas, are looking to it with great interest. It will be of incalculable advantage to the New Orleans, Jackson and Great Northern Railroad as a northern extension of that road, and they would thus enter the coal and iron region of Alabama, which would increase the freighting business of that road, as also of the Vicksburg and Meridian road.

J. W. Sloss, President.

Nashville, Sept. 30, 1867.

Lebanon Springs Railroad.

The Manchester (Vt.) *Journal*, says that the work on this new extension of the Harlem Railroad is progressing rapidly. Twenty-nine of the fifty-six miles are ready for the track, nine more are nearly completed, and on every half mile of the remainder the work is being pushed vigorously. Over 1,200 men are employed on the unfinished portion. Iron is being distributed along the line, and the laying of the track will be commenced before the close of the present month. It is confidently expected that the "Green Cars" of the Harlem road will run through to Montreal before the 1st of next July.

Kent County Railroad.

The Chestertown (Md.) *News* says that the directors of this company have fixed the western terminus of the road at Deep Landing, on Swan Creek, where is to be found the boldest waters, and where a very short wharf will only be necessary, thus lessening the expense. A wharf on the bay shore was estimated to cost at least $35,000. The board took steps to procure an immediate survey of the remaining part of the route, and to advertise for proposals to build the road

☞ The Richmond *Dispatch* has authority for stating that the interest on the Virginia State Debt will certainly be paid on the 1st of January, and all demands against the State will be paid as they mature so long as General Schofield and the State officers are continued in their present positions. The Second Auditor has mailed to Baring Brothers & Co., London, sterling bills for the full amount of interest payable in London on the 1st of January.

☞ The Union and Logansport Railroad is 93 miles in length, extending from Union City on the boundary line of the States of Indiana and Ohio to Logansport, in Indiana. The road is all completed, except 5 miles, which is now in progress of construction.

☞ The construction of the Newark and Paterson Railroad is stated to be progressing satisfactorily, and the prospect is that the road will be finished by next summer.

☞ About 16 miles of the Pocomoke and Wicomico Railroad have been finished. The track layers are approaching the Pocomoke river, and most of the depot buildings are completed.

American Railroad Journal.

Saturday, December 28, 1867.

Stock Exchange and Money Market.

Money has been in very full supply on call, since our last, and has been quoted generally down to 6 per cent. with more frequent negotiations with the dealers in the public funds at the minimum figure of 5 per cent. At these rates, the speculative inquiry has been comparatively moderate, as usual about holiday times. Business at both Stock and Gold Boards has been on a restricted scale, calling for less pecuniary aid. Lenders have been more disposed to deal in mercantile paper, and prime to good names have been current at from 7@8½ per cent. per annum. The city banks have made further additions of considerable magnitude to their legal tender reserve, chiefly from the liberal disbursements of the Sub-Treasury in payment of the December interest on the June issue of the Seven-thirty Notes, and in redemption of the small denominations of the matured compound interest notes. The banks have also gained in their deposits, while losing in the specie line. They have reduced their loans, because of the falling off in the demand for accommodation, and they have cut down their circulation a little. The Sub-Treasury cash balances were diminished, last week, nearly three and a half millions, or a little over the accumulation of greenbacks in the bank vaults, within the week. The specie reserve of the city banks is now $13,468,109, against $13,219,971 same time last year. The city bank deposits are now $177,632,583, against $202,029,877 week ending Dec. 22, 1866. The legal tender reserve amounts to $58,311,432, against $64,816,962 same time last year. The circulation now stands at $34,019,101, against $32,433,429 same time last year. The loans are now $244,165,353, against $258,255,514 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $78,858,584 a day, against a daily average of $74,607,319 the preceding week, and $78,826,153 the week ending with Dec. 7. The current week's exchanges average about $91,537,000 a day. The city banks, last week, gained $3,357,124 of legal tender, and $588,333 of deposits while they lost $1,418,739 of specie. They reduced their loans, $2,162,192; and their circulation, $99,810.

The Philadelphia Bank movement the past week shows a increase in loans, of $352,595; an increase of $2,706 in specie; an increase in legal tenders of $246,078; a decrease of $130,493 in deposits; and a decrease of $5,834 in circulation. The Bank Clearings show a decrease of $453,132, and the balances, an increase of $190,145.

The U. S. Sub-Treasury receipts, week ending with Dec. 21, were $18,237,767. including $1,195,241 from customs duties, payments, $21,656,778, including $217,000 of coin interest; balance at the close of the week, $102,233,596, against $105,652,607, at the close of the preceding week, showing a decrease of $3,419,011. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $4,202,630 including $221,000 from customs; and payments, $3,371,834; on Tuesday, receipts, $2,006,542 including $176,000 from customs, and payments, $1,505,044. The balance at the close of business on Tuesday stood at $103,565,841, against $103,176,365 a week previous; and $103,932,475 on Dec. 8.

National Bank notes to the amount of $145,950 were issued last week, making the total issue to 1,673 banks thus far, $305,430,511, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $5,600,695, leaving, with the existing 1,639 banks, (having an aggregate capital of $424,394,861,) an actual circulation at this date, of $299,829,816. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $341,102,950; and for the public deposits, $37,817,950—making a total of $378,920,900. The Treasury Departm nt last week redeemed and destroyed $264,600 of worn and mutilated fractional currency, and issued $458,064 of new.

The aggregate issue of coin certificates by the U. S. Sub-Treasury, in this city, up to Dec. 28, was $238,184,880; aggregate redemptions, $206,

585,000; leaving outstanding certificates to the amount of $31,599,380.

An unusually light income from all sources was reported by the Government, last week. The excises, last week, yielded $1,996,000, against $2,254,000, the preceding week; customs at the port of New York $1,195,241, and at the outports, about $325,000 (in coin) more, making the grand total income for the week equal about $2,528,000 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with July 30, 1867, were $265,920,474, against $310,906,984 the preceding fiscal year; and $211,129,529 fiscal year ending with June 30, 1865. The receipts thus far in the new fiscal year, which began on the 1st of July, have been about $97,000,000.

Government received $7,049,724 from customs, through the port of San Francisco, from Jan. 1, to Nov. 28, 1867.

The Secretary of the Treasury, in compliance with a resolution in the House, recently transmitted to that body a communication showing the amount of tax collected on distilled spirits, from which it appears that in 1863 the revenue was, in round numbers, $3,200,000; in 1864 it was $28,500,000; in 1865 it was $16,000,000; in 1866 it was $29,200,000, and in 1867 it was $28,300,000. Of the last named sum New York paid in round numbers $5,500,000; Ohio, $5,652,000; Illinois, $3,789,000. By the act of July 1, 1862, the tax was 20 per cent.; by that of March 7, 1864, it was increased to 60 cents a gallon; from July, 1864, to Jan. 1, 1865, it was $1 50, and since that date $2 a gallon. The total forfeitures by decrees of Courts, from March 2, 1867, to June 30, 1867, were three thousand six hundred and nine gallons, which were sold for $42,874.

Gold has been variable in price, since our last, but the speculation has been unmistakably weak, and operators for a rise have evinced little spirit or confidence. The lowest sales of the week were made on Monday, namely at 132⅞@133. On Wednesday, there was a temporary rally to 133⅞, followed by a reaction to 133½@133⅝, the market closing heavily. The export demand has been less animated, and the customs inquiry has been insignificant. The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1867, have been $3,096,869, against $9,579,390 same time last year. The customs demand for Gold last week, averaged $199,207 a day; thus far, this week, it has been equal to $220,000 a day, or equal to a weekly aggregate of $1,320,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $38,821, and from California, $1,191,856. The total customs revenue of the Government, in coin, at this port, thus far in the current calendar year commencing with Jan. 1, 1867, has been $115,433,410, against $128,553,017 same time in the preceding fiscal year. The total receipts of California gold at this port since Jan. 1, 1867, have been $27,677,556, against $42,110,796 same time last year, showing a decrease this year, of $14,433,240. The exports of specie from this port, last week, were $1,584,206. The total outflow of specie from the port, since Jan. 1, 1867, has been $48,564,601, against $60,760,528 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $217,000, making the total coin interest disbursements through the Government office, since Jan. 1, 1867, $61,718,595, against $48,207,371 for the preceding calendar year. The specie exports from San Francisco, from Jan. 1, to Nov. 28, reached $35,394,317, against $39,387,253 same time last year, showing a decrease, in 1867, of $3,992,936.

Foreign Exchange has been more abundant, yet quite firmly held by the leading drawers of sterling bills. A large amount of bills on London on Messrs. Baring Brothers, drawn to the extent of £350,000, equal to $1,750,000 in Gold, have been offered and marketed by Messrs. Duncan, Sherman & Co. The object of the negotiation is not known. The bills are sold in sums of £50,000 @£75,500 each, and taken by the other Bankers. Bankers' 60 day bills on London closed at 110@110¼, and on Paris to 5.15@5.14¼; sight bills on London to 110½@110¾ and on Paris to 5.12½@5.11¾. The offering of produce bills have been moderate this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $2,607,233, making the total value of exports since Jan. 1, 1867, $186,051,093, against $185,099,711 same time in the preceding year.

Government securities have been in fair demand for investment purposes during the past week, and prices have been gradually strengthening. The inquiry has been mainly from home buyers, and for the later issues of the Five-Twenty coin-bearing bonds, as also for the six per cents of 1881. Rather more attention has been given to Ten Forties, which have been quoted buoyant. The offerings of all classes of national stocks have been comparatively moderate. U. S. sixes of 1881 closed here on Wednesday at 112¼@112½; U. S. Five-twenties of 1862, 108⅛@108¼; U. S. Five-twenties of 1864 at 105⅛@105¾; U. S. Five-twenties of 1865 at 105½@105¾; U. S. Five-twenties of 1865, consolidated, 108@108⅛; U. S. Five-twenties of 1867, 108⅛@108¼; U. S. Ten-forties at 101¼@101½, and U. S. Seven-thirties at 101⅛@101⅝. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

May, 1865	117⅛	September, 1865	115¾
August, 1865	116¼	October, 1865	115½

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Dec. 10.	Dec. 18.	Dec. 24.
Consols	92 1/16	92⅝	92⅛
U.S. 5-20's of 1862	71 9/16	72	72⅜
Erie	47¾	50	49½
Ill. Central	89	89⅞	87¾

A moderate business, chiefly speculative has been transacted in railway and miscellaneous share property, since our last, at unsettled prices, the earlier dealings having been at advancing figures, while the later movements indicated much less firmness, and considerable irregularity. Pacific Mail shares have been unusually depressed, and have fallen as low as 109@109½ under the manipulations of the *bears*. They closed at 110@110¾.

General business has been very dull, in nearly all branches. Breadstuffs have been comparatively steady, though corn closed in favor of buyers. Provisions have been unsetted. Cotton has been in less demand, and depressed in price, closing languidly on the basis of 15¼@15½ for middling uplands, per lb. The stock of cotton now here is estimated at about 52,500 bales. The receipts at the port this week, have averaged about 3,000 bales a day. The receipts during the cotton year, ending Sept. 1, 1867, were 657,431 bales, against exports of 470,596 bales. The receipts at all the shipping ports from Sept. 1, 1866, to Aug. 31, 1867, were 1,951,998 bales, against 2,154,476 bales the preceding cotton year; exports, 1,554,664 bales, against 1,557,054 bales the preceding year; estimated stock at close of the year, 80,296 bales against 253,000 bales same time last year. The receipts at all the ports, since Sept. 1, 1867, have been 667,000 bales, against 572,000 bales same time last year; exports, same time, 311,000 bales, against 221,000 bales same time last year; stock on hand at latest dates, 298,000 bales, against 417,000 bales same date last year. At the Live Stock Markets this week beeves have been more eagerly pressed for sale, and have been in less urgent request, at a shade lower prices, ranging from 9@17½c. per lb. Veal calves have been in light supply and fair demand at from 7@13c. per lb. Sheep and lambs have been generally less active at from 4½@8, and 5½@8½c., respectively; a few extra Christmas sheep bringing as much as 10@12c. per lb. Swine closed heavily on a diminished inquiry at from 6⅜@7⅛c. per lb., all live weight. The week's receipts have been; 5,681 beeves, 972 calves, 25,716 sheep and lambs, and 26,111 swine. Foreign merchandise has been sparingly purchased and prices have been more or less nominal, though quoted steady in most instances. The total imports of foreign dry goods, last week, were $918,857, and the total amount marketed $747,878. The value of foreign merchandise imported last week, was $1,198,220—making the grand total specie value of last week's imports of dry goods and merchandise, $2,117,077, and since Jan. 1, 1867, $232,881,347, against $279,821,758 same time in the preceding fiscal year. The ocean freight market has been comparatively dull since our last, with 461 vessels of all classes in port. For Liverpool we quote flour at 2s. 3d. @2s. 6d. per bbl.; grain at 5d.@5½d. per bushel; cotton at ¼d.@⅜d. per lb.; and heavy goods at 20s.@30s. per ton, all by sailing vessel.

The New York exports, exclusive of specie, for the week ending Dec. 24, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week	$3,284,610	$2,607,233
Prev. reported	182,581,010	182,927,943
Since January 1	$185,815,620	$185,535,176

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$2,275,015	$918,857
Gen. merchandise	3,949,693	1,198,220
Total for the week	$6,224,708	$2,117,077
Previously reported	273,597,050	230,864,270
Since January 1	$279,821,758	$232,981,347

The balance in the Sub-Treasury on Tuesday was $108,565,840 70.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Little Rock and Ft. Smith Railroad.

We learn that the Little Rock and Fort Smith Railroad Co. have contracted with reliable parties for the construction of the road, and that the work is expected to begin in the Spring. The contract is conditioned upon getting certain legislation by the State, which it is thought can be easily done.

☞ The Perkiomen Railroad Bridge across the Schuylkill, has been contracted for by A. B. Burton & Co., Philadelphia. The structure will consist of three spans of 170 feet and one span of 125 feet, total length 635 feet. The bridge is to be built on the plan known as the "Isometrical Truss," in which are combined simplicity and strength, economy and adaptation.

Toledo, Peoria and Warsaw Railroad.

The western extension of the Toledo, Peoria and Warsaw Railroad has been completed from Warsaw, on the Mississippi river, to Bushnell, on the Chicago, Burlington and Quincy Railroad. It will be opened for travel on the 1st of January. The intervening gap between Peoria and Bushnell is being rapidly graded, and will be finished before the expiration of another year. The Canton *Register* says that the work between that point and Pekin Junction is progressing favorably, and hand-bills are being printed in that office advertising for ties to be delivered on the line of the road between Canton and Bushnell.

Jackson, Lansing and Saginaw Railroad.

The formal opening of the extension of this road from Owasso to Wenona took place at Saginaw City on the 17th inst. The road commences at Jackson on the Michigan Central Railroad, 76 miles from Detroit and 108 miles from Chicago, and runs northeast 115 miles through Lansing and Owasso, on the Milwaukee and Detroit Railroad, and Saginaw City to Wenona, opposite Bay City on Saginaw Bay. The officers of the company are: H. A. Hayden, President; H. H. Smith, General Superintendent; J. F. Foxen, Assistant Superintendent; A. M. Barnes, Secretary.

☞ Messrs. W. & J. W. Phelps have contracted for the construction of the road from St. Joseph to the Iowa line by the 1st day of July next. They have under them ten sub-contractors, with over 2,000 laborers and 500 teams. The contract price for the work is $1,200,000. J. W. Phelps has general control of the work; S. W. Clapp, of St. Joseph, is Chief Engineer; Colonel Bostwick is Chief Clerk and Paymaster.

☞ A petition is to be presented to the Maine Legislature for an act of incorporation for the Penobscot Bay and River Railroad Company, which designs to connect Rockland and Bangor, and the intermediate towns of Camden, Lincolnville, Northport, Belfast, Searsport, Stockton, Prospect, Frankfort, Winterport and Hampden by railway.

☞ At a meeting of the stock and bondholders of the Atlantic and Pacific Railroad in this city on the 11th inst., a committee was appointed to arrange for the surrender by the State of Missouri of that portion of the road recently seized by the authorities of the State, and to conclude arrangements for the immediate renewal of the work of the construction of the Missouri division of the Atlantic and Pacific Railroad.

☞ The following gentlemen have been elected directors of the Maryland and Delaware Railroad Company: Thos. H. Slaughter, Thos. I. Marvel, Delaware; Dr. Alexander Hardcastle, Caroline County; Major Nicholas Murry, New York; David Knotts, Thomas Hughlett and J. A. W. Powell, Talbot county. Capt. E. L. F. Hardcastle was elected president, and Dr. G. W. Goldsborough treasurer.

☞ We learn that F. Wolcott Jackson, Esq., Gen'l Superintendent of the New Jersey Railroad and Transportation Co., is about to assume the charge of the consolidated lines between New York and Philadelphia, including the New Jersey, Camden and Amboy, and Philadelphia and Trenton Railroads.

Railroad Earnings.—Weekly.

The earnings of the Chicago and Northwestern Railroad for 3d week in Dec., 1867 ... $206,536 96
Corresponding week previous year .. 161,359 20

Increase $45,177 76

The earnings of the Detroit and Milwaukee Railroad for the week ending December 19, 1867, were $25,452 00
Corresponding week of 1866 ..... 23,494 00

Increase $1,958 00

The earnings of the Michigan Southern and Northern Indiana Road for the 3d week in Dec., 1867, were $85,881 00
Corresponding week of 1866 ..... 83,511 00

Increase $2,370 00

The earnings of the Michigan Central Railroad for the 2d week in Dec., 1867, were.. $55,252 00
Corresponding week of previous year.. 67,497 35

Decrease $12,245 35

The earnings of the Western Union Railroad for the 2d week in Dec., 1867 ..... $11,200 43
Corresponding week previous year.... 7,853 71

Increase $3,346 72

The earnings of the Marietta and Cincinnati Railroad the 2d week in Dec., 1867... $27,609 00
Corresponding week previous year.... 28,401 00

Decrease $792 00

The earnings of the Atlantic and Great Western Railway for the second week in Dec., 1867, were $78,299,00
Corresponding week previous year.... 92,368 00

Decrease $14,069 00

☞ The *Tribune* says that a company has been formed in this city, with Mr. N. P. Stanton as President, to build a railway from the Derby and New Haven roads to Peekskill, thence, by a suspension bridge, 200 feet above high water mark to Caldwell's, and to Turner's, on the Erie Railway, making a bee line from the Erie to New Haven.

☞ At the annual meeting of the Queen Anne's and Kent County R. R. Co., held at Centreville, Md., on the 4th inst., Lloyd Tilghman, Esq., was unanimously re-elected President, and Messrs. Benj. T. Biggs, Thomas H. Crane, John W. E. Sudler, Ezekiel T. Merrick, Charles McCollister, William H. Jacobs and John M. Robinson, directors.

☞ It has been decided, at a public meeting of parties interested to complete the Lake Erie and Louisville Railroad from Findlay to Lima. Immediate steps are to be taken to construct the extension.

☞ The Washington County railroad has been leased for a term of years to the Baltimore and Ohio Railroad Company, the latter agreeing to pay six per cent. upon the cost of the road besides keeping the same in repair.

☞ The Pennsylvania Railroad Co. have conveyed all the line of canals from Columbia to Hollidaysburg to the Pennsylvania Canal Co. The consideration money expressed on the deed is $2,650,000.

☞ Negotiations for a connection between the Orange and Alexandria and the Virginia and Tennessee Railroads, at the depot of the latter in Lynchburg have been closed, and the work will now be speedily consummated.

Canada and her Railways.

The progress of Canada—I speak of the whole Dominion as recently created by the confederation of Upper and Lower Canada, Nova Scotia and New Brunswick—has been marvellous, and in no respect, perhaps, has the growth of the country shown itself in a more marked manner than in the development of its railway system. It was in 1848, or almost immediately after the completion of the magnificent canal system of Canada proper, and by which vessels of 800 tons could pass from the Ocean to Lake Ontario, and *vice versa*, that the Canadians discovered that it was necessary, notwithstanding their unrivalled inland navigation, to combine with it an equally good railway communication—that was if they were to continue to be the carriers of the products of the Western States through the valley of the St. Lawrence. They found that their neighbors to the south had commenced their railways in all directions, but more particularly to connect the cities on the Atlantic coast with the Western Lakes, and accordingly in 1849 an Act was passed by the Canadian Government pledging a 6 per cent. guarantee on one-half the cost of all railways made under its provisions. Under this act, the Northern Railway, which runs from Toronto to Collingwood, the Great Western Railway, which runs from Windsor (on the Detroit River opposite Detroit) to the Niagara River, and the St. Lawrence and Atlantic, now forming part of the Grand Trunk line, running from Montreal to Portland, were commenced. In 1852, however, the Government, fearing the effect of an indiscriminate guarantee, repealed the law of 1849 and passed an act guaranteeing one-half the cost of one main trunk line of railway throughout the province, and it was under this act that the Grand Trunk Railway was projected. These terms were subsequently modified by granting a fixed sum of £3,000 per mile of railway forming part of the main trunk line. It is true that prior to these dates railways existed in Canada. There was, for example, the horse railway from Laprairie, nine miles above Montreal, to St. John's, on the Richelieu River, which was opened in July, 1836, and was first worked with locomotives in 1837. There was also the horse railway between Queenstown and Chippewa, which was opened in 1839, but with these exceptions and the length of the Lachine Railway, a line running from Montreal for seven miles to the westward, the railway system of Canada cannot be said to have commenced until after the passing of the Railway Act in 1849, and even then it was not for about a year that any substantial progress was made. But after that date the works of the several lines were pushed forward rapidly, and in 1853 the lines from Montreal to Sherbrooke, from Toronto to Bradford, and from Hamilton to Suspension Bridge were opened. In 1854 the line between Montreal and Quebec was opened, the first train having carried Lord Elgin, who was then *en route* to England. In the same year the Great Western Railway was finished to Windsor, and in the following years the whole line from Montreal to Toronto and thence to London was constructed, and in 1859 the entire Canadian Railway system was completed, including the keystone of its arch, the Victoria Bridge.

Whilst, as I have already explained, the Government of Canada owns no portion of the 2,148 miles of railroad now built, although the moneys granted in their aid amount to upwards of 6,000,000*l.*, Nova Scotia has built and owns all the railways constructed in that province. They consist of a trunk line from Halifax on the Atlantic, by way of Truro, to Pictou, on the Gulf of the St. Lawrence, with a branch line to Windsor, on the Bay of Fundy. The distance from Halifax to Truro is 60 miles, and from the main line to Windsor 33 miles. From Truro to Pictou the distance is also about 60 miles. The railways to both these points were completed in 1858; the total cost of construction, including the extension to Pictou, being a little over 8,000,000*l.* The line from Halifax to Pictou was originally intended to form part of the European and British North American Railway, running from Halifax to the Great Lakes through British territory, and this has now all been accomplished with the exception of the intermediate link through New Brunswick, from the St. Lawrence River to the Bay of Fundy. This incompleted section, the projected Intercolonial Railway will now fill in, so that within three years from the present time the Dominion of Canada will have direct railway communication between its extreme limits—that is to say, the iron road will be laid between the ocean and the Great Lakes.

New Brunswick, like her sister Maritime Province, also owns a railway, being the line from St. John to Shediac—a distance of 108 miles. It is called the European and North American, and it is intended to extend the line westwards from St. John to the boundary line of the State of Maine, the present railway system of that State being in like manner extended until a junction is effected between the two systems. With the completion of these extensions and the construction of the Intercolonial Railway, a passenger landing at Halifax will be able to take his train to any city in the States or in the Dominion. In addition to the European and North American Railway, New Brunswick boasts of two other lines—the New Brunswick and Canada, 88 miles long, running from St. Andrew's to Woodstock; and the St. Stephen's branch railway, a short line of 18 miles in length. It is not unlikely that some portion of the Woodstock line may be utilized as part of the Intercolonial Railway, but until the route of the latter is finally settled, it is impossible to say whether this will be so or not.

From the foregoing figures it will be seen that whilst in 1852 Canada could only boast of 30 miles of railway, she has now, including the railways of New Brunswick and Nova Scotia, 2,495 miles. The population of the Dominion is estimated at 4,000,000, so that with the exception of the United States, which possess a mile of railway for about every thousand inhabitants, the rate of Canada, which is nearly five-eighths of a mile for the same proportion of population, shows a greater mileage system per head of population than any other country.

The following is the length and cost of the several railways in the dominion:

Name.	Length in miles.	Cost.
Grand Trunk	1,877	£16,583,033
Great Western	345	4,901,892
Northern	97	1,121,462
Brockville and Ottawa	86½	534,657
Prescott and Ottawa	54	412,808
Port Hope, Lindsay and Beaverton	43	327,437
Port Hope and Peterboro..	18	82,191
Cobourg and Peterboro ...	14	184,931
London and Port Stanley...	24½	212,229
Welland.....	25½	333,460
Carillon and Grenville.....	13	19,536
St. Lawrence and Industrie.	12	11,116
Stanstead, Shefford and Chambly	44	249,862
Nova Scotia.....	133	1,300,000
New Brunswick	214	1,700,000
	2,495½	£27,974,614

The magnificent harbor of Halifax—the first harbor in the world—will, on the completion of the Intercolonial Railway be the Atlantic terminus of the Canadian system of railways—a system that will yet extend across the Rocky Mountains to British Columbia—and there, ere long, will be seen the lumber from New Brunswick, Maine and Canada, the beef, pork, wheat, flour and corn of Western Canada, and the Western States with other products—

From the forests and the prairies,
From the great lakes of the northland,
From the land of the Ojibways,
From the land of the Dacotahs,
From the mountains, moors and fenlands.

all bring transhipped for consumption in our Cis-Atlantic markets.—*Rambles on Railways.*

Tennessee Railroads.

A bill has passed the Tennessee Legislature which appropriates in State bonds to the various railroads of the State now in operation or projected, $4,550,000, as follows: Knoxville and Kentucky, $800,000; Nashville and Alabama, $300,000; Cincinnati, Cumberland Gap and Charleston, $200,000; Nashville and Decatur, $300,000; Southwestern, $300,000; Memphis and Charleston, $300,000; Mississippi Central, $200,000; Mississippi and Tennessee, $100,000; Tennessee and Pacific, $800,000; Knoxville and Charleston, $150,000; East Tennessee and North Carolina, $100,000; Nashville and Northwestern, $550,000; Edgefield and Kentucky, $300,000; East Tennessee and Virginia, $50,000.

Boston and Worcester Railroad.

A special meeting of the stockholders of this corporation was held in Boston on the 16th inst. The meeting was presided over by Hon. Ginery Twitchell, who after the reading of the call for the meeting and the records of the last meeting by the clerk, submitted the following report:

BOSTON AND WORCESTER RAILROAD,
President's Office, Boston, Dec. 16, 1867.

To the Stockholders of the Boston and Worcester Railroad Corporation:

The Directors were authorized at your meeting held on the 19th of June last, to apply to the Supreme Court for the appointment of Commissioners, as provided in the act for the consolidation of this and the Western Railroad Corporation, to sell the property of this corporation to the new company for not less than eight millions of dollars, or to ascertain upon what terms the two roads could be consolidated, and report the same to you. After several meetings of the two Boards of Directors or Committees, they have agreed subject to your approval, that the stockholders of the Boston and Worcester Railroad Corporation shall receive one share in the Boston and Albany Railroad Company, and ten dollars in cash for each share of the Boston and Worcester stock. While we do not think this so much as you ought to receive, we are satisfied that no better terms can be obtained without resort to the Commissioners. As that course is attended with delay, expense and uncertainty, we propose these terms as a compromise. The Committee of the Western road accepted them as such, and we respectfully recommend that the stockholders should approve them in the same spirit of concession and compromise, and exert themselves to promote the future welfare of the new company and the public interests.

Very respectfully, your obedient servant,
G. TWICHELL,
For Directors of Boston & Worcester R. R.

Mr. Seth Bemis of Watertown moved the acceptance of the report, and that the Directors be authorized to settle with the Directors of the Western Railroad upon the terms mentioned in the report. The motion was carried with but one dissenting vote.

The President stated that he expected the amount of ten dollars per share would be paid by the Western road in season for distribution with the January dividend. He also stated in response to inquiries that the ten dollars is taken from the funds of the Boston and Albany Railroad for the purpose of equalizing the stock. He also gave an account of the meetings which had been held by the Directors of the two roads preparatory to a definite arrangement for consolidation. The Western road for a long time claimed that their stock was worth as much as that of the Worcester road. They also were willing to settle upon the basis of the value of the capital stock of the two roads as it stood on the books. This being declined for good reasons, they proposed to arrange upon the basis of the net earnings of the two roads for the past two years. After all these propositions had failed, the Directors came to the conclusion that the settlement proposed in the above report was the best that could possibly be made. He was surprised that there had been so great unanimity displayed in the adoption of the report, and expressed his great gratification at the result. He hoped that the same harmonious feeling would prevail.

Mr. Seth Bemis proposed the following vote:

Voted, That so much of the vote passed by the stockholders at their meeting Feb. 6, 1861, as refers to the authority of Directors to increase the construction account of this corporation, be, and the same is, hereby rescinded; and that the Directors have the power to increase said account by the addition of such items of expenditures for construction as shall make it more fully represent the actual cost of the road and equipments.

The motion was unanimously carried.

On motion of Hon. F. H. Dewey, a vote of thanks was passed to the President and Directors of the road for their faithfulness, and for settling the terms of consolidation without resort to Commissioners, and also to the other officers of the road, after which the meeting adjourned *sine die*.

Grand Rapids and Indiana Railroad.

The Grand Rapids and Indiana Railroad has been completed twenty miles, from Grand Rapids to Cedar Springs, in Kent Co., Mich.

It is reported that Ransom Gardner has entered into negotiations to build the railroad from Kalamazoo to Grand Rapids, and have the St. Joseph Valley Railroad in good running order, from Three Rivers to Grand Rapids, in ten months.

☞ The Boston and Albany Railroad Co. give notice that they will pay on and after February 1, 1868, the sum of ten dollars on each share of Boston and Worcester Railroad stock, in accordance with the terms of consolidation, and in equalization of the value between the Western and Boston and Worcester Railroad stock on the surrender of the certificates of said stock; said payments to be made to such persons as were stockholders of record on the 30th of November last.

☞ At the recent meeting of the Directors of the New York and Oswego Midland Railroad, in this city, a resolution was adopted to put the whole line under contract as soon as the bonding of the towns of Lebanon, Sydney, and one other is completed, and it is stated that from Oswego to Oneida, and from Norwich to Sydney, the work will be let as soon as maps can be made of the construction survey.

☞ A preliminary survey of the route of the Iowa and Minnesota Railroad from Ames on the Chicago and Northwestern Railroad, *via* Iowa Falls, in Hardin Co., and Hampton, in Franklin Co., northward to the Minnesota State Line, is now being made.

☞ The formal opening of the Flint and Pere Marquette Railroad (Michigan) to Midland City was celebrated on the 30th ult.

☞ The Vermont Legislature has refused to allow the Burdens of Troy to build a Railroad to their iron mines in Shaftsbury.

Massawippi Valley Railroad.

The Sherbrooke *Gazette* states that a sufficient amount of stock has been subscribed to warrant the construction of this road, and that Col. Pomroy recently visited Boston to give assurance of this fact to the directors of the Passumpsic Railroad, and to call on them to redeem the pledge to extend their road into the Province. The call was cordially responded to, and a delegation appointed to visit Stanstead to locate the road; and we understand that a party has arrived and are now engaged in examining the route, and that the road will soon be put under contract. This road is to connect the present terminus of the Passumpsic road at Canada Line, and the Grand Trunk road at Lennoxville, near Sherbrooke. When completed, the Passumpsic will be a competing road for the Canada business, and it is expected that several trains, both passenger and freight will pass over the road daily.

Point of Rocks Railroad.

This road, better known as the Metropolitan branch of the Baltimore and Ohio Railroad, when completed, will fill up the last link in the line of railroad communication between Washington city and the Northwest. The heaviest cutting between Washington and Point of Rocks at Paris Ridge, has been completed, and the condemnation of land is going on with great vigor.

☞ The opinion lately delivered by Chief-Justice Beasley, in the Court of Errors and Appeals, and sustained by a vote of that Court, in the case of the Camden and Amboy Railroad Company *vs.* The Raritan and Delaware Bay Railroad Company and others, has been followed by an injunction commanding the defendants to forever cease using that section of road extending from Jackson to Hampton, a distance of about seven miles, thus severing the connection between New York and Philadelphia.

☞ The Albany and Susquehanna Railroad will soon be opened for travel to Ninevah, 21 miles from Binghamton, and 119 miles from Albany. The last section is said to be all under contract, and a large force at work on it. It is expected that the whole line will be completed by the 1st of November next.

☞ The contractors on the Danville, Urbana, Bloomington and Pekin Railroad are urging on the road to a speedy completion. The grading between Pekin and Tremont is nearly completed, and a strong force is at work between Tremont and Mackinaw.

☞ The Allegheny Valley Railroad connecting Oil City and Franklin with Pittsburg, has been completed. Its total length is 130 miles. The property is represented by capital stock, $1,800,000, and mortgage bonds, $4,000,000 bearing interest at the rate of 7 3-10ths per cent.

☞ The Montreal *Trade Review* says that two railroads, the Toronto, Grey and Bruce, and the Toronto and Nipissing roads, are to be undertaken next season, both on the narrow gauge system—3 ft. 6 in.

☞ The Camden and Amboy Company are engaged in building a new line of railroad from Camden, the southern terminus of their route to Hightstown.

☞ The first passenger train passed over the Buffalo and Washington Railroad on the 7th inst.

UNION PACIFIC R. R. CO.

NOTICE.

THE COUPONS OF
THE FIRST MORTGAGE BONDS
OF THE
UNION PACIFIC RAILROAD CO.;
DUE JAN. 1st, 1868.
WILL BE PAID ON AND AFTER THAT DATE.

Principal and Interest Payable in Gold Coin.

SECURE PROFITABLE INVESTMENT.

THE
Central Pacific Railroad
First Mortgage Thirty-Year Six Per Cent. Coupon Bonds,

Principal and Interest Payable in Gold Coin,

Represent the preferred claim upon one of the MOST IMPORTANT LINES OF COMMUNICATION IN THE WORLD, as it is the sole link between the Pacific Coast and the Great Interior Basin, over which the immense overland travel must pass, and the

Main Trunk Line across the Continent.

The road is now nearly completed from Sacramento to the Richest Mining Regions in the Salt Lake Basin, and is being rapidly carried forward by the largest force of laborers ever employed by any Railroad Company on this Continent.

The natural, legitimate, commercial business of the road surpasses all previous expectation, and is profitable beyond parallel, even among the oldest roads in existence. The Earnings and Expenses for the Quarter ending Oct. 31, were as follows, IN GOLD:

Gross Earnings.	Operating Expenses.	Net Earnings.
$593,847.92	**$102,088.61**	**$491,759.31**

This result, however, would have been far greater but for the inability of wagon teams to forward the freight and passengers from the temporary terminus in the mountains.

The United States Government and the State and Cities of California have so aided and fostered the Great Enterprise, that the Company will assume very light annual Interest obligations, and will have the following ample Resources at command for the Construction:

DONATIONS in Lands, Bonds, Concessions, etc., (without lien)	$12,800,000
CAPITAL STOCK, Net Earnings, etc, (no lien)	11,000,000
LOANS (subordinate lien)	3,000,000
U. S. SUBSIDY BONDS, **736** miles, (subordinate lien)	25,517,000
FIRST MORTGAGE BONDS	25,517,000
Resources, first **736** miles	$77,834,000

The FIRST MORTGAGE BONDS are in sums of $1,000 each, with semi-annual gold coupons attached, and are offered for sale, for the present, at **95** per cent. and accrued interest from July 1st, in currency, at which rate they yield nearly NINE PER CENT. UPON THE INVESTMENT.

These Bonds, authorized by the Pacific Railroad Acts of Congress, are issued only as the work progresses, and to the same extent only as the Bonds granted by the Government, and are the prior lien upon the whole valuable property furnished by the above Resources. They possess special assurances and advantages over other Corporate Securities, and are destined to rank among THE BEST INVESTMENTS IN THE WORLD, from their unusual attractions of safety, soundness and profit.

Conversions of Government Securities
INTO
Central Pacific First Mortgage Bonds,
now realize for the holders from **19 to 18 per cent. Advantage,** WITH THE SAME RATE OF INTEREST.

Bonds can be obtained through the subscribers directly, or through responsible Banking agencies.

Bonds, Descriptive Pamphlets, Maps and information can be had at the

Office of the C. P. R. R. Co., No. 54 William St., N. Y., and of

Special Deposits for one year or more may be made at five per cent.

JERSEY CITY
LOCOMOTIVE WORKS FOR SALE.

THE WELL KNOWN LOCOMOTIVE WORKS AT Jersey City, known as the Jersey City Locomotive Works, comprising 24 full lots of lands, with substantial and well arranged buildings thereon, together with the machinery and tools, which are in excellent order, and of the best description, and capable of turning out 6 to 8 first class locomotives per month.

The character of the work turned out of the shops of this company is well known, and has a high reputation on most of the leading railroads in the United States. Adjoining and connected with these works are also offered for sale, 26 lots of grounds with the buildings thereon, and which, added to the property of the Jersey City Locomotive Works, make the whole one of the most desirable establishments for the manufacture of locomotive engines and other machinery in the country. The price and terms will be made highly favorable, as the parties interested are solicitous to close up the concern. Apply to

CHARLES KNEELAND, 49 William street.
W. G. HAMILTON, 21 Broadway.
4849 McANDREW & WANN, 12 Pine street.

525 MILES
OF THE
Union Pacific Railroad
Running West from Omaha
Across the Continent,
ARE NOW COMPLETED.

This brings the line to the eastern base of the Rocky Mountains, and it is expected that the track will be laid thirty miles further, to Evans Pass, the highest point on the road, by January. The maximum grade from the foot of the mountains to the summit is but eighty feet to the mile, while that of many eastern roads is over one hundred. Work in the rock-cuttings on the western slope will continue through the winter, and there is now no reason to doubt that the entire grand line to the Pacific will be open for business in 1870.

The means provided for the construction of this Great National Work are ample. The United States grants its Six Per Cent. Bonds at the rate of from $16,000 to $48,000 per mile, for which it takes a *second lien* as security, and receives payment to a large if not to the full extent of its claim in services. These bonds are issued as each twenty-mile section is finished, and after it has been examined by United States Commissioners and pronounced to be in all respects a first-class road, thoroughly supplied with depots, repair shops, stations, and all the necessary rolling stock and other equipments.

The United States also makes a donation of 12,800 acres of land to the mile, which will be a source of large revenue to the Company. Much of this land in the Platte Valley is among the most fertile in the world, and other large portions are covered with heavy pine forests and abound in coal of the best quality.

The company is also authorized to issue its own First Mortgage Bonds to an amount equal to the issue of the Government and no more. Hon. E. D. Morgan and Hon. Oakes Ames are Trustees for the Bondholders, and deliver the Bonds to the Company only as the work progresses, so that they always represent an actual and productive value.

The authorized capital of the Company is One Hundred Million Dollars, of which over five millions have been paid in upon the work already done.

EARNINGS OF THE COMPANY.

At present, the profits of the company are derived only from its local traffic, but this is already much more than sufficient to pay the interest on all the Bonds the Company can issue, if not another mile were built. It is not doubted that when the road is completed the through traffic of the only line connecting the Atlantic and Pacific States will be large beyond precedent, and, as there will be no competition, it can always be done at profitable rates.

It will be noticed that the Union Pacific Railroad is, in fact, a *Government Work*, built under the supervision of Government officers, and to a large extent with Government money, and that its bonds are issued under Government direction. It is believed that no similar security is so carefully guarded, and certainly no other is based upon a larger or more valuable property. As the Company's

First Mortgage Bonds

are offered for the present at NINETY CENTS ON THE DOLLAR, they are the cheapest security in the market, being more than 15 per cent., lower than U. S. Stocks. They pay

SIX PER CENT. IN GOLD,

or over NINE PER CENT. upon the investment. Subscriptions will be received in New York at the Company's Office, No. 20 Nassau street, and by

CONTINENTAL NATIONAL BANK, 7 Nassau st.,
CLARK DODGE & CO., Bankers, 51 Wall st.,
JOHN J. CISCO & SON, Bankers, 33 Wall st.,

and by the Company's advertised Agents throughout the United States. Remittances should be made in drafts or other funds par in New York, and the bonds will be sent free of charge by return express. A NEW PAMPHLET AND MAP, showing the Progress of the Work, Resources for Construction, and Value of Bonds, may be obtained at the Company's Offices or of its advertised Agents, or will be sent free on application.

JOHN J. CISCO, Treasurer, New York.

COLLINS & CO.'S NEW PATENT SCREW WRENCH.

THE STRONGEST AND MOST DURABLE WRENCH IN MARKET.

All Consumers have noticed that their wrenches first fail by reason of the forcing back of the handle, and by the springing of the bar. Our improvement remedies both these defects, the bars being finished wider than any other wrench in market, and the handle cannot be displaced, as all strain on it is prevented by the screw thimble, D, (see cut.) Already adopted as *the best* by the principal railroads and machine shops, and for sale by Hardware dealers generally. Address

TO RAILROAD CAR BUILDERS AND OTHERS.

The undersigned, being the duly authorized Agent in the United States for the sale of **PEACOCK & BUCHAN'S CELEBRATED AND APPROVED PAINT COMPOSITIONS**, Nos. 1, 2, 3, and 4, solely manufactured in Southampton, England, invites the attention of Railroad car builders, owners and others to the PAINT COMPOSITION No. 3, IN ALL COLORS AND TINTS. It is hermetically soldered up in convenient sized tins of 7 lbs., 14 lbs., and 28 lbs. each, and warranted to keep good in any climate for many years. Being MIXED READY FOR IMMEDIATE USE, it will be found of great advantage, as it can be packed away like preserved meats, and will not deteriorate. It has been opened after TEN YEARS and found to be quite good and READY FOR USE. Being ground first on roller mills of polished granite, and then of burnished steel, by steam power, it is as fine as artist's color, and is applicable to the first-class Railroad Car, Counting House, or Drawing-Room, or the cabin of the yacht, steamer, or sailing ship—each tin forming a ready Paint Pot. It dries in a few hours, with a beautiful brilliant surface, without any stickiness or unpleasant smell, and stands longer than ordinary paint—never blistering, cracking, or flaking. IT IS GENERALLY ADOPTED BY THE CHIEF RAILWAY COMPANIES OF EUROPE, AND IS **CHEAPER AND BETTER THAN ANY OTHER** PAINT IN THE MARKET.

J. M. ALLEN, Sec. and Treas. **LICENSES GRANTED.**

PLASTIC SLATE
FOR
Roofing & Other Purposes.

The process of reconstructing Slate Stone from a disintegrated state was
PATENTED FEBRUARY 21st, 1865.
It is a combination of
Pulverized Slate and Viscous Matter,
(the latter possessing qualities of geological and chemical affinity for the former,) and is a development of one of the simple but unalterable tendencies of nature.

As a Roofing Material it Stands Unrivalled.

A mastic—it adapts itself to every shape and slope. Non-combustible, impervious, non-expansive, and undecaying.

Frost does not Crack nor Heat Dissolve it.

The only roofing material ever discovered that will resist the action of the elements as long as the structure it protects. Being susceptible of little, if any wear, from exposure, and
Perfectly Fire-Proof,
It is unequalled as a coating for Railroad and Farm Buildings, Fences, Bridges, bottoms of Vessels, Vaults, etc.

ESTABLISHED IN 1836.

ENGINEERING WORKS.

ENGINEER'S FIELD BOOK,
By C. S. CROSS, Civil Engineer.

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent **free by mail,** upon receipt of the price. For sale at this office. Price **$1.50.**

LYONS' TABLES.
To Civil Engineers and Contractors.

FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

Sheet No.				Sheet No			
1.	General Table for all Bases and all Slopes.			13.	for Base 18 ft. Slop.		1½ to 1
2.	For Side Hill Cuts and Fills.			14.	" 20 "		1½ to 1
3.	Base 12 ft. Slopes		1½ to 1	15.	" 24 "		1½ to 1
4.	" 14 "		1½ to 1	16.	" 24 "		1½ to 1
5.	" 15 "		¾ to 1	17.	" 25 "		1½ to 1
6.	" 15 "		1 to 1	18.	" 26 "		1½ to 1
7.	" 16 "		1½ to 1	19.	" 28 "		¾ to 1
8.	" 16 "		¾ to 1	20.	" 30 "		1 to 1
9	" 16 "		1 to 1	21.	" 30 "		1½ to 1
